STERILECLEAN
SODIUM HYPOCHLORITE-12.5

ACTIVE INGREDIENT:
Sodium Hypochlorite

DIRECTIONS FOR USE

KEEP OUT OF REACH OF CHILDREN
DANGER
SEE PRECAUTIONARY STATEMENTS

FIRST AID
IF IN EYES Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Close eyelids firmly. Seek medical advice if irritation persists.
IF ON SKIN OR CLOTHING Take off contaminated clothing. Rinse skin immediately and thoroughly.
IF INHALED Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Seek medical advice if person is not breathing.

NOTE TO PHYSICIAN: Immediate or delayed skin damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER. Corrosive. Causes irreversible eye damage. Do not get in eyes, on skin, or on clothing. Wear safety glasses and gloves when handling Sterile Clean. Wash after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

AVOIDING VAPORS: Vapor is not a significant hazard.

STORAGE AND DISPOSAL

Do not contaminate food or feed by storage, disposal or cleaning of equipment.

DIRECTIONS FOR USE

NEVER USE A DEBRIS FEED TO TREAT WATER OR AIR OR DEBRIS CAPTURES.

NEVER USE A DEBRIS FEED TO CLEAN THE INTERIOR OF A BUILDING OR STRUCTURE.

NEVER USE A DEBRIS FEED TO CLEAN ANY SURFACE THAT IS CONSTRUCTED OF A MATERIAL THAT IS NOT RESISTANT TO THE ACTION OF THE DETERGENT SOLUTION.

NEVER USE A DEBRIS FEED TO CLEAN ANY SURFACE THAT IS CONSTRUCTED OF A MATERIAL THAT IS NOT RESISTANT TO THE ACTION OF THE DETERGENT SOLUTION.

SANITATION OF NONPOTABLE FOOD CONTACT SURFACES

RINSE METHOD-Solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of available chlorine must be tested and adjusted periodically to ensure that the available chlorine does not drop below 50 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 1 oz. of Sterile Clean with 1 gal. of water. If no test kit is available, adjust the solution periodically to ensure that the available chlorine does not drop below 50 ppm.

IMERSION METHOD-Solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of available chlorine must be tested and adjusted periodically to ensure that the available chlorine does not drop below 50 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 1 oz. of Sterile Clean with 1 gal. of water. If no test kit is available, adjust the solution periodically to ensure that the available chlorine does not drop below 50 ppm.
