PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER. CORROSIVE. Fatal if inhaled. Caustic to eyes and skin. Can cause irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe vapor or spray mist. Wear goggles, head shield, or safety glasses. Wear coveralls worn over long-sleeved shirt and long pants and socks. Wear chemical-resistant footwear, and chemical-resistant gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse. Follow the manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Prolonged or frequent repeated skin contact may cause allergic reaction in some individuals.

PHYSICAL OR CHEMICAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge directly into water bodies or wash into drain systems. Use in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product, or any rinse water, without previous notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in any manner inconsis-
tent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions. This product must be loaded and transferred only using a metering pump system or a close load-
ing/application system. Open pouring is prohibited.

BE SURE TO RELEASE ANY PRESSURE IN THE CONTAINER PRIOR TO FULLY OPENING. THIS CAN BE DONE BY LEAVING THE CAP OFF FOR A FEW MOMENTS prior to fully opening the container. DO NOT OPEN WITH FACE CLOSE TO THE CONTAINER OPENING.

RECIRCULATING AND COOLING AND PROCESS WATER SYSTEMS: When used as directed, this product safely controls algae. Larvae and insidious fungi. Use for commercial and industrial cooling towers, evaporative condensers, evaporative coolers, closed loop heating and cooling sys-
tems and central process water systems. Add this product at a point of uniform mixing such as the basin area.

DOSAGE RATES FOR ABOVE APPLICATIONS: Initial Dose: When the system is noticeably fouled, add 6.4 to 19.2 fluid ounces of product per 1000 gallons (50 to 150 milliliters/1000 liters) of water-containing in the system. Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 1.9 to 9.6 fluid ounces of product per 1000 gallons (15 to 75 milliliters/1000 liters) of water-containing in the system. Repeat as needed to maintain control.

Heavy fouled systems must be cleaned before treatment is begun.

AIR WASHERS AND INDUSTRIAL AIR SCOURING SYSTEMS: When used as directed, this product effectively controls algae, bacterial, and fungal spores in air washing systems equipped with a mist elimination and industrial air scouring systems. Add this product at a point of uniform mixing.

DOSAGE RATES FOR ABOVE APPLICATIONS: Initial Dose: When the system is noticeably fouled, add 6.4 to 19.2 fluid ounces of product per 1000 gallons (50 to 150 milliliters/1000 liters) of water-containing in the system. Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 1.9 to 9.6 fluid ounces of product per 1000 gallons (15 to 75 milliliters/1000 liters) of water-containing in the system. Repeat as needed to maintain control.

Heavy fouled systems must be cleaned before treatment is begun.

HEAT TRANSFER SYSTEMS: When used as directed, this product effectively controls algae, bacterial, and fungal spores in brewery pasteurizers, bottle and can washers, and hydrostatic sterilizers and retorts. Add this product at a point of uniform mixing.

DOSAGE RATES FOR ABOVE APPLICATIONS: Initial Dose: When the system is noticeably fouled, add 6.4 to 19.2 fluid ounces of product per 1000 gallons (50 to 150 milliliters/1000 liters) of water-containing in the system. Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 1.9 to 9.6 fluid ounces of product per 1000 gallons (15 to 75 milliliters/1000 liters) of water-containing in the system. Repeat as needed to maintain control.

Heavy fouled systems must be cleaned before treatment is begun.

BELLACIDE 303

For use as an algicide, bactericide, fungicide, for the control of algae, slime forming bacte-
ria, sulfate reducing bacteria, and fungi in air washers and industrial air scouring systems, recirculating cooling water and process water systems including cooling towers, evapo-
rative coolers, brewery pasteurizers, can washers, and hydrostatic sterilizers and retorts, non-
food contact paper and paperboard process water (e.g. brown paper, corrugated sheet, Kraft paper, newsprint, etc.) and enhanced oil recovery systems, oil and gas production and transmission pipelines and systems, gas storage wells and systems, hydrotesting of pipe-
lines and tanks, pipeline pigging and scraping operations and oil gas well drilling and maintenance fluids. FOR INDUSTRIAL APPLICATION using closed metered delivery systems ONLY. Open pouring is prohibited.

ACTIVE INGREDIENT:
- Tributyl Tetradecyldihydroxy Phenolphosphate
  - 15.0%
- Poly(vinylpyrrolidone)/dimethyl imidazolinone (dimethylimidazolinonone)
  - 12.0%
- Other INGREDIENTS
  - 73.0%

TOTAL: 100.0%

KEEP OUT OF REACH OF CHILDREN

POISON DANGER

FIRST AID:
- If IN EYES: Hold eye open and rinse slowly and gently with water for 15-
  20 minutes. Remove contact lenses, if present, after the first 5 minutes, then
  continue rinsing eye.
- If ON SKIN OR CLOTHING: Take off contaminated clothing.
- If SWALLOWED: Keep patient calm.

IF INHALED:
- Open airway if necessary and keep breathing. Keep patient calm.
- Keep patient in supine position. Expose to fresh air.
- Remove contaminated clothing. Keep patient calm.
- Keep patient calm.

DIRECTIONS FOR USE CONTINUED:

PULP, PAPER, AND PAPERBOARD MILLS:

TRICHOSPORON AVISECENS FOR FOOD AND INDUSTRIAL APPLICATION, such as Brown Paper Mills, Sheet for Corrugated Board, Kraft Paper, Newsprint and similar paper / paperboard not intended for food con-

STRUCTION: When used as directed, this product is effective against aerobic and anaerobic al-

ake, paper, and paperboard mill process water systems including white water systems. Treat water at critical areas in the system (e.g. feeders, header tanks, streams, ponds, etc.) with 15 to 30 ppm of the product at the rate of 10 to 20 pounds per 1000 gallons of water. Keep and wash PPE separately from other laundry. Prolonged or frequent repeated skin contact may cause allergic reaction in some individuals.

ENHANCED OIL RECOVERY SYSTEMS:

NEVER USE IN ESTUARINE OR MARINE OIL RECOVERY SYSTEMS: When used as directed this product is effective against aerobic and anaerobic bacteria, fungi, and algae in oil recovery systems. Add the product to ensure maximum distribution of product through the entire internal surface of the pipeline. Follow dosing instructions for enhanced oil recovery systems.

GAS STORAGE WELLS AND SYSTEMS:

Individual injection wells must be treated with a sufficient quantity of product to produce a concentra-
tion of 100-150 ppm of the product when diluted by the water present in the formation. Repeat injections as needed to maintain control.

Individual drops must be treated with sufficient quantity of this product to produce a concentra-
tion of 100-150 ppm of the product when diluted by the water present in the drops. Repeat injections as needed to maintain control.

HYDROTREATING:

Water used to hydrate pipelines or vessels must contain 100-150 ppm of product, depending on water quality and length of time the equipment will remain idle.

PIPELINE PIGGING AND SCRAPING OPERATIONS:

Add this product to a slug of water immediately following the scraper (ideally this water volume can be kept to a minimum and confined between the scraper and the trailing pig). Add sufficient product to produce a concentration of 100-150 ppm of this product in the water at the discharge point of the pipeline or pig (trap) depending on the length of the pipeline and the severity of fouling.

DRILLING, PACKER COMPLETION, WORKOVERS, AND FRACTURING:

This product must be added to these fluids at a point where uniform mixing will occur. Add 1000-1500 ppm of this product to a freshly prepared fluid depending on the severity of contamination.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE:

Keep product dry and store in a cool dry well-ventilated area away from heat or open flame. More in original container.

PESTICIDE DISPOSAL:

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinse water is a violation of Federal Law. These wastes cannot be disposed of by burning or by applying to other locations. Before disposing of materials, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL:

Non-returnable container. Do not reuse or refill this container. Offer for recycling. Follow all applicable restrictions and disposal of in sanitary landfill or by other procedures approved by local authorities. Place the container in a suitable container and label with poison warning label. Add a thirty (30) day period after the container is closed to the waste container and dispose of the container. This is a multi-use product. Close the container using the locking mechanism.

NOTE: Buyer assumes all responsibility for safety and use in accordance with directions.
