3. APPLICATION:
BeetleBlock - VERBENONE dispensers are for residential use in homes, yards,
lawns and gardens.

Prior to use open foil shipping bag carefully in a well ventilated area to allow any
accumulated vapors to vent. Do not puncture reservoir, staple only through the
colored plastic tab at top of dispenser.

BeetleBlock - VERBENONE dispensers are used to prevent or reduce bark
beetle attacks on susceptible trees or stands containing a significant portion of
pine or spruce trees. BeetleBlock - VERBENONE dispensers emit an anti-
aggregation pheromone that is repellent to Mountain Pine beetle, Southern Pine
beetle, Western Pine beetle and other conifer infesting beetles.

For protection of individual trees, staple at least 2 dispensers on the north face
of the tree (maximum 30 trees/acre) with one dispenser at 6 feet and the other
at 12 feet above the ground. For trees larger than 14 inches in diameter (at
breast height) use four dispensers stapled to the tree in four cardinal directions
(maximum 15 trees/acre). When using four dispensers per tree, alternate the
height of adjacent dispensers, two at 6 feet and two at 12 feet above the ground.

4. TIMING:
Deploy the dispensers before initial beetle flight, usually May - June.
