PETARMOR™ Plus For Dogs

PETARMOR™ Plus For Dogs acts fast and is an effective, lasting, waterproof, and easy-to-use application for control of fleas, flea eggs, ticks, chewing lice, and mosquitoes. For dogs and puppies weighing up to 22 lbs. and 8 weeks or older.

Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not allow children to apply this product. READ ENTIRE LABEL AND ENCLOSED DIRECTIONS BEFORE EACH USE. CAREFULLY FOLLOW ALL PRECAUTIONARY STATEMENTS AND APPLICABLE USE DIRECTIONS. FOR USE ON DOGS ONLY. DO NOT USE ON RABBITS OR OTHER ANIMALS.

For topical application only. Apply PETARMOR™ Plus For Dogs ONLY to dogs and puppies aged 8 weeks or older, including on breeding, pregnant, and lactating bitches, as indicated below for control of fleas, flea eggs, ticks (including all stages of American Dog ticks, Brown Dog ticks, Deer ticks and Lone Star ticks), chewing lice, and mosquitoes:

How to Apply

1. Open the child resistant package according to the directions on the back of the sealed inner package for each pipette.
2. Snap the tip of the pipette away from your hand.
3. Part the dog's hair and place the tip of the pipette between the shoulders. Ensure that the entire pipette is contained in a single spot.

Frequency of Application

Fleas: According to research studies, adult fleas, flea eggs, and flea larvae are killed for up to three months following an application of fipronil plus (S)-methoprene. If, however, your dog or puppy is susceptible to flea allergy dermatitis, or if you believe there is a risk of reinfection, apply once every month.

Ticks: Each application kills ticks for one month or longer. For best control of ticks, apply once every month.

Chewing Lice: Each application kills chewing lice for one month or longer. For best control of chewing lice, apply once every month.

Do not reapply PETARMOR™ Plus For Dogs for thirty (30) days.

Caution

PetArmor® Plus for Dogs acts fast and is an effective, lasting, waterproof, and easy-to-use application for control of fleas, flea eggs, ticks, chewing lice, and mosquitoes on dogs and puppies. When used as directed, PetArmor® Plus for Dogs can stop infestations of fleas, ticks, and chewing lice and help to prevent reinfestation on dogs and puppies, including on breeding, pregnant, and lactating bitches.

PetArmor® Plus for Dogs kills in the central nervous system and peripheral nervous system. Apply monthly to eliminate sarcoptic mange mites.

Specifically, PetArmor® Plus for Dogs kills:

1. Adult fleas, flea eggs, and flea larvae, including those which could cause flea allergy dermatitis, and can prevent the further development of fleas at the egg, larva, and pupa stages;

2. Brown Dog tick, the American Dog tick, the Lone Star tick, and the Deer tick (including ticks that may transmit Lyme Disease) at all stages;

3. Chewing lice infestations;

PetArmor® Plus for Dogs contains the active ingredient fipronil and the insect growth regulator (IGR) (S)-methoprene.

**Directions for Use**

It is a violative of Federal Law to use this product in a manner inconsistent with its labeling. Do not allow children to apply this product. Read entire label and enclosed directions before each use. Carefully follow all precautionary statements and applicable use directions. For use on dogs only. Do not use on rabbits or other animals.

For topical application only. Apply PetArmor® Plus for Dogs only to dogs and puppies 8 weeks or older, including on breeding, pregnant, and lactating bitches, as indicated below for control of fleas, flea eggs, ticks, chewing lice, and mosquitoes.

**How to Apply**

1. Open the child-resistant package according to the directions on the back of the sealed inner package for each pipette.

2. Snap the tip of the pipette away from you as shown.

3. Part the dog's hair and place the tip of the pipette behind the neck and between the shoulders. Ensure that the entire application of PetArmor® Plus for Dogs is contained in a single spot on the dog's skin. Be sure to squeeze the pipette thoroughly so that the entire contents are applied.

Do not apply the product superficially to the dog's hair. Use only one pipette during each application.

Do not touch the area where the application was made until it is dry.

PetArmor® Plus for Dogs also aids in the control of sarcoptic mange infestations. Apply monthly to eliminate sarcoptic mange mites.

**Frequency of Application**

Fleas: According to research studies, adult fleas, flea eggs and flea larvae are killed up to three months following an application of fipronil plus (S)-methoprene. If, however, your dog or puppy is susceptible to flea allergy dermatitis, or if you believe there is a risk of reinfestation, apply once every month.
