AGCO BUFFERED ACID

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. AGCO Buffered Acid is a preservative for hay that is baked at 15% to 30% moisture. It can be used on alfalfa, Bermuda grass, bluegrass, brome grass, clover, cowpea hay, fescue, lespedeza, lupines, orchard grass, peanut hay, rye grass, soybean hay, sudan grass, timothy, and vetch that is baked in small square, large round, or large square bales. When used in accordance with label directions, it will prevent the growth of mold in the hay and related heating, discoloration, and loss of feed value.

This product may only be used during the baling process if appropriate baler equipment in use prevents exposure of non-target organisms to this pesticide product. Do not apply to pre-harvest hay and straw, cut hay and straw in the field prior to baling, or to hay and straw after it has been baked. Apply product to the hay and straw as it is fed into the baler, using the rates on this label. The baler application equipment must prevent dripage and drift and must function properly and be used/maintained in accordance with the manufacture’s written operation instructions.

FOR USE ON HAY: Spray AGCO Buffered Acid on the hay as it is fed into the baler using the application rates indicated by the chart below.

FIRST AID

IF IN EYES
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED
Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.

IF INHALED
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING
Take off contaminated clothing. Rinse skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the use of gastric lavage
