**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER. CORROSIVE.** Causes eye damage and skin burns. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. May be harmful if inhaled. May be fatal if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapor or mist. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish and wildlife. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste.

**FIRST AID**

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then administer artificial respiration, preferably by mouth-to-mouth if possible.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

**NOTE TO LOCAL AUTHORITIES:** When the system is not naturally treated, add 2.46 to 7.46 lbs. (37 to 113 lbs.) of Isocil IG-C to each 1000 gallons of water in the system. Repeat until control is achieved.

**SUBSEQUENT DOSE:** When microbial control is evident, add 1.25 to 1.86 lbs. (19 to 28 fl. ounces) of Isocil IG-C to each 1000 gallons of water. In the system weekly or as needed to maintain control.

**NOTICE:** Regardless of the manner of incorporation the total active ingredient level in the system must not exceed 35 ppm (equivalent to 2333 ppm Isocil IG-C or 23 gallons per 10,000 gallons system fluid).

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**Pesticide Storage:** Open dumping is prohibited. Store in original container in areas inaccessible to children.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray or mixture of rinses is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**Container Disposal:** Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Plastic containers: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or, if allowed by state and local authorities by burning. If burned, stay out of way of smoke. Metal Containers : Triple rinse (or equivalent), then offer for recycling or reconditioning, or dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. DO NOT cut or weld metal containers.

**KEEP OUT OF REACH OF CHILDREN**

**DANGER**

Isocil IG-C preserves and controls the growth of bacteria and fungi in adhesives, polymer emulsions and natural latex; surfactant solutions; mineral and pigment slurries and dispersions; concrete admixtures; water-based building compounds; and sealants; pesticides for non-food applications, including fungicides, herbicides, insecticides, repellents and biostatistics. Add 0.5 to 4.0 lbs Isocil IG-C (327 - 1814 g) to each 1000 lbs. (463.6 kg) of product to be treated to provide 8 - 63 ppm active isothiazolones. To ensure uniform distribution, slowly disperse Isocil IG-C into product with agitation. Mix thoroughly until evenly dispersed throughout product.

**METALWORKING FLUID PRESERVATION**

Isocil IG-C is used as a preservative for the control of bacteria and fungi in soluble and emulsifiable-type aqueous metal working fluids. For the maintenance of a non fouled system, use Isocil IG-C at 33 fl. ounces (2.2 lbs.) per 1000 gallons of emulsion every 4 weeks or 3 - 141 fl. ounces (2.2 - 9.5 lbs.) per 1000 gallons of emulsion every 8 - 12 weeks. For a noticeably fouled system use an initial dose of 66 - 141 fl. ounces (4.5 - 9.5 lbs.) per 1000 gallons of emulsion to be followed by subsequent maintenance dosages depending upon the treatment interval noted above. A higher dosage and/or increased frequency of treatment may be required depending upon the rate of dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

Isocil IG-C must be dispersed into the use-solution of the metalworking fluid using a metering pump and uniformly dispersed throughout the system.

**METAL CLEANING FLUID PRESERVATION**

Isocil IG-C is used as a preservative for use in the manufacture and use of alkaline, acid and emulsion-based metal cleaning fluids typically used in electroplating, phosphatizing, galvanizing and general metal cleaning operations.

For addition to a metal cleaning concentrate, add Isocil IG-C at a level to ensure that the final use-dilution fluid will contain 420 - 1670 ppm product (6.25 - 25 ppm active isothiazolones). A higher dosage range and/or increased frequency of treatment may be required depending upon rate of dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

Isocil IG-C must be dispersed into the use-dilution of the cleaning fluid using a metering pump and uniformly dispersed throughout the system.

**WATER-BASED HYDRAULIC FLUID PRESERVATION**

Isocil IG-C is used as a preservative for use in the manufacture and use of high water-based hydraulic fluids and industrial water-based hydraulic fluids typically prepared by emulsifying 40% by volume of water in 60% by volume of mineral oil using an an sol stable emulsifying agent.

**ISOCIL® IG-C**

is registered in the USA.

**EPA Reg. No. 6836-259 EPA Est. No. 6836-IL-001 Net Wt. 255 lbs.**
