ACCELERON®
DX-910
Biological Fungicide Seed Treatment
FOR USE AS A SEED TREATMENT

Active Ingredient:
Bacillus subtilis, MBI 600* ........................................................................ 0.18%
Other Ingredients: ...................................................................................... 99.82%
Total: ...................................................................................................... 100.00%

*Contains not less than 2.2 x 10^9 viable spores per mL.

Batch code: Located on physical container.

EPA Reg. No. 71840-5-524
EPA Est. No. 67064-IA-001

KEEP OUT OF REACH OF CHILDREN

Net Contents: 30 gallons
Precautionary Statements

FIRST AID

- Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-332-3111 for emergency medical treatment information.

Personal Protective Equipment (PPE)

Applicators and other handlers must wear:
- Long-sleeved shirt and long pants
- Waterproof gloves
- Shoes plus socks

As a general precaution when exposed to concentrations of living microbial products such as this, all mixers/loaders and applicators must wear a dust/mist filtering respirator meeting NIOSH standards of at least N-95, R-95 or P-95. Repeated exposure to high concentrations of microbial proteins can cause allergic sensitization.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables are provided, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Environmental Hazards

For terrestrial uses: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment wash waters or rinsate. Do not apply this product while bees are actively visiting the area.

Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval.

The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard. No restricted-entry interval (REI) is required for this product.

Non-Agricultural Use Requirements

The requirements in this box apply to uses that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses.

General Information

Accleron® DX-910 Biological Fungicide Seed Treatment contains bacteria, which colonize on the developing root system, suppressing disease organisms such as Fusarium, Rhizoctonia, and Alternaria that attack root systems. As the root system develops, the bacteria grow with the roots extending the protection throughout the growing season. As a result of this biological protection, a vigorous root system is established by the plant, which often results in more uniform stands and greater yields. In addition, this product has been shown to increase the amount of nodulation by nitrogen-fixing bacteria when used on many legumes. This improvement in nodulation is a result of a healthier root system allowing more sites for nodules to form from inoculated or naturally occurring soil borne nitrogen-fixing bacteria.

Use Restrictions

Chemigation: Do not apply this product through any type of irrigation system.

For Use as a Commercial Seed Treatment

Dilute Accleron® DX-910 Biological Fungicide Seed Treatment with water and apply directly to dry seed or mix this product with liquid Rhizobium inoculants and/or other registered seed treatment insecticides and fungicides. Do not mix this product with any product containing a label prohibition against such mixing. When tank-mixing this product with any other registered seed treatment insecticide and/or fungicide, always read and follow all use directions, restrictions, and precautions of both this product and the tank mix partner(s). The resulting tank mix must be in accordance with the more restrictive label limitations and precautions. Do not exceed label dosage rates.

ATTENTION: If Rhizobium inoculants are to be used in the tank mix with other seed treatments (fungicides, insecticides, nematocides, fertilizers, etc.), make sure that they are compatible (not harmful) to the Rhizobium. Use only chlorine-free water in the tank mix. If one or more treatments are not compatible (harmful), mix the products in and apply them from a separate mix tank.

Note: This product does not contain dye. To comply with 40 CFR 153.155, all seed treated commercially with this product must be colored with an EPA-approved dye or colorant of a suitable color to prevent accidental use as food for man or feed for animals.
The Federal Seed Act requires that bags containing treated seed shall be labeled with the following information: "This seed has been treated with Bacillus subtilis, MSI 600. Do not use for food, feed or oil purposes."

**CANOLA**

For suppression of root diseases caused by Rhizoctonia and Fusarium, apply 1.6-3.8 fl. oz. of this product per 100 lbs (47-1125 mL per 45 kg) of seed.

---

**Storage and Disposal**

Do not contaminate water, food, or feed by storage and disposal.

**Pesticide Storage:** Store in a dry place.

**Pesticide Disposal:** To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

**Container Disposal:** Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after flow begins to drip. Fill the container 1/4 full with water and rewash. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip.

---

Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration. Do not burn, unless allowed by state and local ordinances.

**Notice – Read Carefully Before Using**

**Conditions of Sale and Limited Warranty Statement**

Monsanto Company warrants that this product conforms to the specifications on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below.

To the extent permitted by applicable law, Monsanto Company makes no other express or implied warranty of merchantability or fitness for a particular purpose or any other express or implied warranty.

**Inherent Risks of Use:** It is impossible to eliminate all risks associated with use of this product. Lack of performance, injury, or other unintended consequences may result because of such factors as use of product contrary to strict label instructions and established safe practice, abnormal conditions (such as excessive rainfall, drought, and Acts of God), presence of other materials, use in combination with other materials, the manner of application, or other factors, all of which are beyond the control of Monsanto Company or the seller. All such risks shall be assumed by the buyer.

**Limitations of Remedies:** To the extent permitted by applicable law, the exclusive remedy for losses or damages resulting from this product (including claims based on contract, negligence, strict liability, or other legal theories), shall be limited to, at Monsanto Company's election, one of the following: (1) replacement of the amount of the product used; or (2) refund of the purchase price paid for the product. Monsanto Company shall not be liable for losses or damages resulting from handling, storage, or use of this product contrary to label instructions unless Monsanto Company is promptly notified of such loss and damage in writing. To the extent permitted by applicable law, Monsanto Company shall not be liable for consequential or incidental damages or losses. Monsanto Company neither assumes nor authorizes any person to assume for it, any other liability in connection with the sale, storage, use, or handling of this product other than expressly set forth herein.
