STORAGE AND DISPOSAL:

DISINFECTS:

• Influenza A Virus (H1N1)
• RespiratorySyncytial Virus
• Salmonella enterica (Salmonella)
• Escherichia coli with extended spectrum beta-lactamase resistance (ESBL)
• Enterobacter aerogenes

FUNGISTATIC:

• Herpes Simplex Virus Type 1
• Staphylococcus aureus (Staph)
• Influenza H7N9
• Listeria monocytogenes
• Staphylococcus aureus
• Methicillin resistant (HA-MRSA)
• Bathtub & Faucets

ELECTRONICS

• Laptops & Tablets
• Smartphones
• Gaming Consoles
• Remote Controls

Photograph paper that is exposed to light for a long time at room temperature. The results are a reduction in the photosensitive properties of the paper. This will cause the paper to lose its coloration and become more susceptible to further degradation. To prevent this damage, please store the paper in a cool, dark place away from direct sunlight. If you need to store the paper for an extended period of time, it is recommended that you use archival quality materials such as acid-free paper or plastic sleeves. Keep your storage environment clean and free of dust, humidity, and temperature fluctuations. Do not overpack the storage container; leave enough space for air circulation to prevent overheating. Store the paper in a cool, dry place and avoid direct sunlight. To prevent fading, storage should be in a dark environment. To protect the paper from damage, avoid contact with water or other liquids. Do not store the paper in high humidity areas or near sources of moisture. To maintain the quality of the paper, it is important to store it in a cool, dry place and to avoid exposure to direct sunlight or heat. These precautions will help ensure the longevity and quality of the paper. If you suspect that the paper has already been damaged, it is recommended to consult a professional paper conservator for restoration services. To prevent further damage, it is important to follow the storage guidelines outlined above. If the paper is already damaged, please contact a professional paper conservator for restoration services. To prevent further damage, it is important to follow the storage guidelines outlined above.
