Sanitizer 54
Low Temp Dish Machine Sanitizer

This product is to be used with mechanical dishwashing equipment to sanitize tableware made of stainless steel, glass, porcelain, china, plastics, polyethylene and other nonporous materials marked as “dishwasher safe.” This product is effective against cultures of Salmonella typhi. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR USE:

Use Spartan Sanitizer 54 into final rinse water at a concentration of 110 ppm available chlorine. Adjust dishmachine’s chemical dispensing device to meter proper amount of product into the dishwashing machine.

For sanitizing tableware in low temperature dishwashing machine, inject Spartan Sanitizer 54 into high rinse water at a concentration of 110 ppm available chlorine. This product is applied in the final sanitization cycle of low temperature dishwashing machines.

This product is for use with mechanical dishwashing machines. Sanitizer 54 into final rinse water at concentration of 200 ppm should be used.

Sanitizer 54 into final rinse water at concentration of 200 ppm should be used.

When sanitization cycle is complete, remove sanitized tableware from the dishwashing machine and allow items to air dry. Do not rinse sanitized tableware from the dishwashing machine. Check with your local public health department for regulations in your area. Use the toilet and wash hands before eating, drinking, and other food-related activities.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage. If Inhaled:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, mouth to an unconscious person.

If Swallowed:

Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

FIRST AID:

If Inhaled:

If the skin is exposed to the chemical, remove contaminated clothing and wash skin with soap and water for 15 minutes. Use plastic or impervious gloves where available while handling the chemical.

If Swallowed:

Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
