Steriphene II Brand Disinfectant Deodorant is for use on hard, non-porous surfaces in hospitals, schools, hotels, office buildings, industrial plants and other medical, commercial, institutional or industrial facilities where a sanitary environment is important. Use on bathroom and locker room fixtures, tables, countertops, furniture, doorknobs, walls and wastebaskets.

This product is not to be used as a terminal steriilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to presterilize or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

General Precautions and Restrictions: Do not apply this product in a way that will contact workers or other persons. Only protected handlers may be in the area during application. Following application as a spray, do not enter or allow others to enter the treated area until the sprays have dried.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Clean all surfaces prior to disinfection.

Disinfectant and Deodorization: Shake well. Hold can 6 to 8 inches from surface and apply in a uniform moist film. Treated surfaces must remain wet for 10 minutes. Allow to air dry or wipe off.

Tuberculocidal Activity: Steriphene II Brand Disinfectant Deodorant is tuberculocidal under the above conditions in 10 minutes at 68°F (20°C).

* Kills HBV and HIV on Pre-Cleaned Environmental Surfaces/Objects Previously Soiled with Blood/Body Fluids in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Hepatitis B Virus (HBV) and human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HBV and HIV-1 ON SURFACES OR OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

1. Personal Protection: Clean up must be done wearing protective latex gloves, gowns, masks and eye protection.
2. Cleaning Procedure: Blood or body fluids must be thoroughly cleaned from surfaces and objects before application of disinfectant.
3. Contact Time: Leave surfaces wet for 10 minutes.
4. Disposal of Infectious Material: Contaminated cleaning materials, blood and other body fluids must be autoclaved and/or disposed of according to local regulations for infectious waste disposal.

NOTE: Make sure valve opening is pointed in the direction of intended spray. Do not use on varnished surfaces. Do not use on eyes.

2. Cleaning Procedure:

1. Personal Protection: Clean up must be done wearing protective latex gloves, gowns, masks and eye protection.
2. Cleaning Procedure: Blood or body fluids must be thoroughly cleaned from surfaces and objects before application of disinfectant.
3. Contact Time: Leave surfaces wet for 10 minutes.
4. Disposal of Infectious Material: Contaminated cleaning materials, blood and other body fluids must be autoclaved and/or disposed of according to local regulations for infectious waste disposal.

NOTE: Make sure valve opening is pointed in the direction of intended spray. Do not use on varnished surfaces. Do not use on eyes.

Special Instructions for Cleaning and Decontamination Against HBV and HIV-1 on Surfaces or Objects Soiled with Blood/Body Fluids:

1. Personal Protection: Clean up must be done wearing protective latex gloves, gowns, masks and eye protection.
2. Cleaning Procedure: Blood or body fluids must be thoroughly cleaned from surfaces and objects before application of disinfectant.
3. Contact Time: Leave surfaces wet for 10 minutes.
4. Disposal of Infectious Material: Contaminated cleaning materials, blood and other body fluids must be autoclaved and/or disposed of according to local regulations for infectious waste disposal.

Disinfectant and Deodorization: Shake well. Hold can 6 to 8 inches from surface and apply in a uniform moist film. Treated surfaces must remain wet for 10 minutes. Allow to air dry or wipe off.

Bactericidal / Tuberculocidal
Effective against Antibiotic-Resistant Bacteria***

Fungicidal* / Virucidal**

For Hospital, Institutional and Industrial Use

**Kills Hepatitis B Virus (HBV), Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS).

***Kills Vancomycin resistant Enterococcus faecalis (VRE) and Methicillin resistant Staphylococcus aureus (MRSA)

Kills Pandemic 2009 H1N1 influenza A virus

Effective against Antibiotic-Resistant Bacteria***

Active Ingredients:

- Ethyl alcohol .................................................. 64.000%
- Ortho-Benzyl para-chlorophenol ....................... 0.071%
- Ortho-Phenylphenol ........................................ 0.051%

Inert Ingredients: .................................................. 35.879%

Total ................................................................. 100.000%

Contains sodium nitrate contains sodium nitrite
