ACTICIDE® IPS 40

Precautionary Statements:
Hazards to Humans and Domestic Animals

DANGER
Corrosive. Causes irreversible eye damage and skin irritation. May be fatal if absorbed through the skin. Harmful if swallowed or inhaled. Do not get in eyes, on skin, or on clothing. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the restroom. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment
Applicants and other handlers must wear:
- Long-sleeve shirt and long pants;
- Chemical-resistant gloves;
- Chemical-resistant shoes plus socks.

USER SAFETY REQUIREMENTS
Users must wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users must remove personal protective equipment immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly. Users must remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions exist for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, ditches, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewage systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

CONDITIONS OF SALE AND WARRANTY
This dealer warrants the sale of this product subject to its chemical description and is reasonably fit for the purpose stated on the label only when sold in accordance with label instructions and warnings. If this product is not in accordance with the label, the dealer will refund the purchase price of the product. If non-conformance occurs, please contact your local dealer immediately.

PHYSICAL AND CHEMICAL HAZARDS
Materials to avoid: residues from agents.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal or by cleaning equipment.

PESTICIDE STORAGE:
Store in original container in a cool place, protected from excessive heat. Do not store or transport in unlined metal containers. Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

PESTICIDE DISPOSAL:
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinse water is a violation of Federal Law. If waste cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office or Pollution Prevention Hotline.

CONTAINER DISPOSAL:
Non-refillable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple rinse as follows: (For containers > 5 gallons in size) - Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recirc. Drain for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat these procedures two more times. (For containers > 5 gallons in size) - Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water, recirc and then rinse. Fill container on its side and roll it back and forth, allowing at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other side and tip it back and forth several times. Empty the rinse into application equipment or a mix tank or store rinse for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or purchase and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

GENERAL:
CONSULT FEDERAL, STATE OR LOCAL REGULATORY AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES FOR USE.

For Transportation / Spill Emergency: Call Chemtac at 1-800-426-9700

EPA Reg. No. 67371-66
EPA Est. No. 67871-GJR-002

Manufactured By/FoR: Thor GmbH
U.S. office: Thor Specialties, Inc.,
50 Waterfront Drive
Shelton, CT 06484 USA
Tel: (203) 516-6990

UN 3082, ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (3-iodo-2-propynyl) butylcarbamate), S, PG-III

ACTIVE INGREDIENTS:
- 3-iodo-2-propynyl (Butyl) Carbamate 40.00%
- OTHER INGREDIENTS: 59.00%
TOTAL: 100.00%

KEEP OUT OF REACH OF CHILDREN:

DANGER - PELIGRO

See Site guide for additional precautionary statements.

FIRST AID

If In Eyes:
> Hold eye open and rinse slowly and gently with water for 15-20 minutes.
> Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
> Call a poison control center or doctor for treatment advice.

If on Skin or Clothing:
> Take off contaminated clothing.
> Rinse skin immediately with plenty of water for 15-20 minutes.
> Call a poison control center or doctor for treatment advice.

If Swallowed:
> Call a poison control center or doctor immediately for treatment advice.
> If person spits a glass of water, if able to swallow.
> Do not induce vomiting unless told to do so by the poison control center or doctor.
> Do not give anything by mouth to an unconscious person.

If Inhaled:
> Move person to fresh air.
> If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
> Call a poison control center or doctor for further treatment advice.

Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage.

HOT LINE NUMBER: In case of emergency, for additional information call toll free 1-800-426-9700. Have the product label or container with you when calling a poison control center or doctor, or going for treatment.

Aqueous Metalworking, Cutting, Cooling and Lubricating Fluids:
To inhibit the growth of fungi in aqueous metalworking, cutting, cooling and lubricating fluids, add up to 1,000 ppm of this product to the diluted fluid (0.2 gallons per 100 gallons of fluid). Add this product to the fluid at preparation or to the reservoir (sump) containing the fluid. If added to the reservoir, circulate the fluid to ensure mixing.

Concentrates:
To inhibit the growth of fungi in aqueous metalworking, cutting, cooling and lubricating concentrates, add an amount that will give up to 2,000 ppm in the diluted fluid. The amount required in the concentrate will depend on the end use dilution.

SHIPMENT OF ACTICIDE® IPS 40

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

*Wood Preservation

ACTICIDE® IPS 40 is a liquid designed for use as a wood preservative for use in above ground applications. All use levels are in percentage by weight, and refer to this product. Dosage ranges are given for the various applications to indicate the approximate levels for a particular application. Exact level of use must be determined by field trials.

ACTICIDE® IPS 40 may be applied from solvent solutions or aqueous dispersions to new lumber, plywood, particle board, millwork, etc., to prevent the growth of mildew, sapstain and wood rot on these substrates. This product is for use on wood in above ground use only.

Treating solutions may be prepared by diluting this product in alcohols or aromatic solvents or by dispersion in water. Levels of 0.1 – 1.2% of this product are suggested depending upon the severity of conditions for end use, and the extent of time that protection is required.

For freshly sawn lumber, a concentration of 0.2% of this product is suggested as a starting level. A one minute dip at ambient temperatures in a solution or aqueous dispersion containing 0.2% of this product should be adequate to control the development of mildew and sapstain organisms on the lumber. Because of the great variation in susceptibility of fresh sawn lumber relating to the type of wood, sawing and storage techniques, conditions of humidity, method of treatment, etc., it is usually necessary to carry out field tests to determine the most appropriate means of application and the optimum concentration of this product to be used within the range specified.

For best results, lumber must be treated within twenty-four hours after it is sawed. The lumber must be completely immersed in the treating bath, and the treating vat designed to permit easy immersion and removal, and to minimize spillage. The vat may be cleaned by emptying and rinsing with a suitable solvent or by use of a detergent solution. To add additional product while treating, first prepare the proper solution or emulsion in a separate container (of wood, plastic, or stainless steel construction) and add to the treating vessel.

After treatment, lumber must be stacked in a properly maintained seasoning yard with good drainage so that no water will accumulate, in any area. The yard must be kept free from weeds and vegetation, which may hold moisture and promote growth of decay and stain producing fungi. All debris and lumber scraps must be removed from the area. A properly laid out yard must take advantage of prevailing winds to permit good air circulation. Main alleys must be at least 16 feet wide. Stack foundations must be sufficiently elevated to permit ready access of air to the pile, and allow water to drain off quickly.

*Not approved for this use in California
