Supplemental Label

AREN A 50 WD G INSECTICIDE® FOR BASAL TRUNK APPLICATION

This supplemental label expires on December 31, 2012 and must not be used or distributed after this date.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF APPLICATION. READ THE LABEL AFFIXED TO THE CONTAINER FOR ARENA 50 WD G INSECTICIDE® BEFORE APPLYING. USE OF ARENA 50 WD G INSECTICIDE® ACCORDING TO THIS LABELING IS SUBJECT TO THE USE PRECAUTIONS AND LIMITATIONS IMPOSED BY THE LABEL AFFIXED TO THE CONTAINER FOR ARENA 50 WD G INSECTICIDE®.

Ornamentals in Commercial and Residential Outdoor Landscape and Interior Plantscapes and other sites where plants are grown for Aesthetic and climate modification purposes.

Arena 50 WD G Insecticide® for use on ornamentals for insect control in commercial and residential landscapes and interior plantscapes. To assure optimum effectiveness, good spray coverage of the target plant is essential. Application can be made by foliar application or soil applications including soil injection, drenches, and broadcast sprays. For optimum control, make applications prior to anticipated pest infestation.

Apply Arena 50 WD G Insecticide® when threshold populations are observed. Do not wait until population beyond threshold has been established. Apply Arena 50 WD G Insecticide® in sufficient water to ensure uniform and thorough coverage of foliage. Thorough coverage is required for optimum control. To achieve adequate coverage, use proper spray pressures, nozzles, nozzle spacing and water volume per acre.

Choose lower rate for light infestations and/or smaller plants and higher rate for heavy infestations and/or larger plants.

RESTRICTIONS AND LIMITATIONS
- Do not apply more than a total of 12.8 oz (0.4 lb active ingredient clothianidin) of Arena 50 WD G Insecticide® per acre per season.
- Basal bark trunk or drench or broadcast applications will provide control of insects feeding on the plants, however, control will not be achieved until the product has been taken up by the plant vascular system and translocated to the area where the insects are feeding.
- If making broadcast applications, water in with enough irrigation or rainfall to move the product into the zone where insects are active.
- For drench applications, use enough water to move the product into the zone where the insects are active.
**BASAL BARK TRUNK APPLICATION TO TREES**

For systemic insect control in ornamental trees, interior plantscapes and outdoor landscapes (commercial, industrial, recreational and residential); when applied as a basal bark trunk application. Basal bark trunk application is defined as an application to the bottom 4 feet of a tree.

<td>Ornamental Plants including: Bedding Plants Evergreens Flowering Plants Foliage Plants Ground Covers Non-Bearing Fruit Trees Non-Bearing Nut Trees Non-Bearing Vines Ornamental Trees Shrubs</td>
<td>Aphids Adelgids including Hemlock Woolly Flakeheaded Borers (excluding Emerald Ash Borer) Lacebugs Leaf Beetles Leathoppers Mealybugs Psyllids Roundheaded Borers (excluding Asian Longhorned Beetle) Scales Whiteflies</td>
<td>Apply 0.76 to 2.2 grams per inch of tree diameter. Required concentration is 1.2 to 4.8 oz per gallon which will treat between 60 and 80 inches (depending on bark texture and thickness) of trunk diameter at breast height. Apply to trunk from soil level to 48 inches up the tree, to the point of runoff.</td>
<td>When applied on the trunk, Arena 50 WDG Insecticide is absorbed through the bark and into the vascular system, and then transported throughout the tree. Speed of control will be dependent on tree size, tree health, environmental conditions and how actively pests are feeding. In actively transpiring trees, control may be evident in as little as 3 to 4 weeks after application. Apply to bark on trunk and buttress roots from soil surface to 4 to 5 feet above the soil surface. Adjust nozzle to uniformly distribute solution over the entire circumference of the tree trunk and buttress roots. Wet bark to just to the point of saturation and run off onto soil. Apply with a low volume applicator operated at 10 to 20 PSI to avoid tree damage, bounce back and off tree movement. For optimal control, apply to actively growing tree, and time application so that Arena 50 WDG Insecticide has had time to move to insect feeding sites of the target species. Bark penetration and insect control may be improved by mixing Arena 50 WDG Insecticide with an organo-silicone surfactant. Do not apply to wet bark, during rainfall or if rain is expected within 4 hours.</td>

</tbody>
</table>

1 level teaspoon contains 3 grams and one cup (8 fl oz) contains 5 oz of Arena 50 WDG Insecticide.

Arena 50 WDG Insecticide is a systemic insecticide and must move to the area of the plant were the target pest is feeding. Control of pests may be delayed following an application for one or more weeks as Arena 50 WDG Insecticide moves to the feeding site. Factors such as plant size, soil type, and water demands will impact the time between application and obvious insect control.

Arena 50 WDG Insecticide may be tank mixed or co-applied with other compatible insecticides. Please confirm product compatibility using the water volumes planned with a jar test prior to mixing up a large amount of material.
