SANITE 75

For Fluoro Fluoro Fluoro Fluoro Fluoro Fluoro Fluoro Fluoro Fluoro Fluoro

Sanitary 75 is a concentrated, liquid, non-hazardous, non-flammable cleaning agent and disinfectant. It is intended for use in food contact areas as a cleaner and disinfectant. Sanitary 75 is effective against a wide range of microorganisms, including viruses, bacteria, fungi, and yeast. It is safe to use on all food contact surfaces and can be used as a pre-rinse solution, a cleaning agent, or a disinfectant. Sanitary 75 is potassium hydroxide-based and contains potassium hydroxide as its active ingredient. It is a versatile product that can be used in a variety of settings, including hospitals, laboratories, and foodservice facilities. Sanitary 75 is easy to use and requires no mixing or dilution. It is compatible with most materials and surfaces, but should be tested on a small area before use. Sanitary 75 is available in a 5-gallon pail and can be stored at room temperature. It is recommended for use in clean-in-place (CIP) systems and as a pre-rinse solution, a cleaning agent, or a disinfectant. Sanitary 75 is effective against a wide range of microorganisms, including viruses, bacteria, fungi, and yeast. It is safe to use on all food contact surfaces and can be used as a pre-rinse solution, a cleaning agent, or a disinfectant.
