- Theaters
- Trailers
- Trucks
- Warehouses

Flea Fogger

Before you fog, remove or cover exposed food, clothes, bedding, surfaces and food handling equipment. Shut off fans and air conditioners. Close outside doors and windows. Remove pets and birds but leave warm building as this is a primary refuge place for fleas and must be treated for best results. If need to discard pet bedding after treatment, cover or remove this with sheets and cool. Leave doors, drapes and other enclosed furniture in place. This product will not harm furniture when used as directed. Open interior doors and windows and all areas are to be treated. A. Spray around base of furniture and covered furniture in the immediate area surrounding the fogger. (Fog spraying may be need.)

For more effective control of storage pests and Cockroaches, Olibran, Wasp and Ants use all cupboards, doors, hampers, bathtubs, bathroom, pantry, and windows for better penetration of fog. Remove all labels' labels and exposed paper and exposed plastic from surfaces. (See the next page)
