This label for TriStar 8.5 SL Insecticide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2026.

Acetamiprid GROUP 4A INSECTICIDE

TriStar® 8.5 SL Insecticide
EPA Reg. No. 8033-106 SLN No. WA-110010

DIRECTIONS FOR USE
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Follow all applicable directions, restrictions, and precautions on the EPA registered label.
- This labeling must be in the possession of the user at the time of pesticide application.

CROP
Apples, crabapples, pears, ornamental plants and trees, and non-bearing fruit and nut trees (Non-bearing crops are perennial crops that will not produce a harvestable raw agricultural commodity for 365 days after application).

PESTS CONTROLLED
Apple Maggot

USE RATE
12.5 – 25.3 fl. oz. of TriStar 8.5 SL Insecticide per 100 gallons of finished spray. Use the high rate under heavy pest pressure. Product can be applied with water volume needed to provide thorough coverage.

METHOD OF APPLICATION
Applications should be started within 10 days after the first flies are detected on traps placed in host trees. Mix TriStar 8.5 SL Insecticide with sufficient water and apply as a foliar spray to obtain thorough and uniform spray coverage of the plants. Applications should be repeated every 14 days as long as flies are still being detected in traps and in accordance with local and state spray programs but not to exceed 4 times per calendar year.
RESTRICTIONS

- Do not make more than 4 applications per calendar year.
- Do not apply more than once every 12 days.
- Do not apply more than 92.5 ounces of TriStar 8.5 SL Insecticide per acre (0.55 lb ai/A) per calendar year.
- Do not apply within 7 days of harvest (7 day PHI).
- For use under the SLN label do not apply through any type of irrigation system.

ENVIRONMENTAL HAZARDS

This product is toxic to wildlife. This product is toxic to bees and other pollinating insects exposed to direct treatment. Do not apply this product while bees or other pollinating insects are actively visiting the treated area. Risk to managed bees and native pollinators from contact with pesticide spray or residues can be minimized when applications are made at dawn or dusk or when temperature is below 55°F at the site of application. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Do not contaminate water used for irrigation or domestic purposes.

WSDA CONTAINER DISPOSAL GUIDANCE

Completely empty the contents of the pesticide container into application equipment, and apply to a labeled crop or site. Information regarding the disposal of waste pesticides in Washington is available on the WSDA Waste Pesticide Program website at https://agr.wa.gov/wastepesticide. Cleaned containers may be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

NOTE

This product is sold subject to the Conditions of Sale set forth on the container label.
