**DISCLAIMER OF WARRANTIES:**

By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

BayCare CropScience LP does not warrant or guarantee the results to be obtained from the use of this product, and no representation, express or implied, as to fitness for a particular purpose or merchantability of this product is given or made. The user or buyer accepts all risks in connection with the use of this product, including all risks of injury, death, or damage to property and/or the environment. BayerCropScience LP has no obligation to keep this product in inventory or to modify the warranties contained herein. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, Bayer CropScience LP DISCLAIMS ANY LIABILITY WHATSOEVER FOR DAMAGES INCURRED IN CONNECTION WITH THE USE OF THIS PRODUCT, WHETHER IN CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, WHICH LIMITATION OF LIABILITY SHALL NOT APPLY TO PERSONAL INJURY OR PROPERTY DAMAGE (INCLUDING DEATH) CAUSED BY INFRINGEMENT OF BAYER CROPSCIENCE LP’S INTELLECTUAL PROPERTY RIGHTS OR THE SALE OR USE OF THIS PRODUCT IN VIOLATION OF LAW. Bayer CropScience LP makes no representations or warranties regarding the use of this product in compliance with Federal, State, or local laws or regulations. Only a State’s, Federal, or local Government Official or Environmental or Regulatory Authority should be qualified to make determinations regarding whether or not a specific activity is regulated under a federal, State, or local law or regulation.

The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product.

Precautionary Statements, Directions for Use and Warnings on label are mandatory and must be followed. Any exceptions or exclusions are beyond the control of Bayer CropScience LP. All such risks shall be assumed by the user or buyer.

**IMPORTANT READ BEFORE USE**

Read the entire Document before Use. Consultation of the label can be critical to safety and results. If any item appears to be incorrect, please do not hesitate to contact Bayer CropScience LP or a Bayer CropScience Authorized Retailer. Use of this product in quantities greater than those specified on this label may make this product subject to the provisions of the Resource Conservation and Recovery Act and/or other Federal State or Local Environmental Regulations. Bayer CropScience LP recommends that only the quantities specified on this label be used to avoid the need for disposal and/or the need to possibly follow the provisions of these Acts or Regulations. If the user or buyer is uncertain about the quantities to use, please contact Bayer CropScience LP or a Bayer CropScience Authorized Retailer. Information on the use of this product must be reviewed by and approved by the user or buyer’s authorized representative in each instance. USE ONLY AS DIRECTED.

Bayer CropScience LP may change the technical or commercial specifications of this product at any time. Bayer CropScience LP reserves the right to modify the Warranties at any time.

*NOTE: Not all conceivable conditions that might occur in the field are listed.*

Bayer CropScience LP is not responsible for the use of this product in any manner not in accordance with the instructions found on the label. To the extent consistent with applicable law, Bayer CropScience LP disclaims any liability whatsoever for damages incurred in connection with the use of this product, whether in contract, warranty, tort, negligence, strict liability or otherwise, which limitation of liability shall not apply to personal injury or property damage (including death) caused by infringement of Bayer CropScience LP's intellectual property rights or the sale or use of this product in violation of law.
SHAKE CONTAINER WELL BEFORE USING.

This Product is toxic to fish, aquatic invertebrates, and plants. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean water mark. Do not contaminate

ENVIRONMENTAL HAZARDS

requirements may be reduced or modified as specified in the WPS.

• chemical resistant gloves made of any waterproof material such as natural rubber

Harmful if swallowed, absorbed through the skin or inhaled. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water

NOTE:

If on skin:

• Rinse skin immediately with plenty of water for 15-20 minutes.

When this document is printed at 100% (actual size), this text is 6 pt Helvetica 75 Bold.

A compatibility test must be conducted with any potential tank mix partner with Esplanade 200 SC. Using a clear container, conduct the test as described below:

Esplanade 200 SC has minimal post emergent activity and generally does not control weeds that have emerged. A post emergent herbicide such as Finale® Herbicide may be mixed with Esplanade

Esplanade 200 SC can be applied to terrestrial non-crop sites and unimproved turf sites that contain areas of casual water of a temporary nature as a result of surface water collecting in equipment

Esplanade 200 SC is to be applied in a tank mixture with other pesticides, add the appropriate amounts of the tank mix partners in the following order: (a) products in water-soluble packaging (WSP),

For all applications, follow these guidelines: use spray volumes of 10-100 gallons per acre, spray boom height and spray pressures as low as practical, use coarse droplet producing nozzle tips, use

Spray drift management

For this herbicide to be effective, it must be applied when weeds are small, when they are actively growing, and when they are in good condition. Slow growth in the spring and fall make weeds more susceptible to control.

To deter to determine the direction and distance of possible spray drift. The applicator should be familiar with local conditions and how it may influence spray drift.

Temperature inversion

Controlling droplet size

Spray volume, pressure, and nozzle selection are all important for reducing drift. Select a high flow rate nozzle to apply the highest practical spray volume. High flow rate nozzles produce larger droplets. Lower flow rate nozzles produce smaller droplets. Lower flow rate nozzles are better suited for applications in which drift is a concern. Spraying with low flow rate nozzles will reduce drift potential.

Shielding the boom or individual nozzles may also reduce the potential for drift. However, it is the responsibility of the applicator to verify that the shield does not interfere with uniform spray coverage.

To deter to determine the direction and distance of possible spray drift. The applicator should be familiar with local conditions and how it may influence spray drift.

Preemergent Herbicide for the Control of Annual Grasses and Broadleaf Weeds in Non-Residential Non-Crop Areas, Railroad and Rail Yards, Managed Roadsides, Fence Rows, Utilities, Hardscapes, Industrial, Municipal, and Government Sites

ACTIVE INGREDIENT:
Indaziflam (CAS No: 730979-19-8)..........................19.05%
OTHER INGREDIENTS: ..................................................80.95%
Total:......................................................................100.00%

EPA Reg. No. 432-1516
Contains 1.67 pounds of indaziflam per gallon

KEEP OUT OF REACH OF CHILDREN

CAUTION

For MEDICAL and TRANSPORTATION Emergencies ONLY Call 24 Hours
A Day 1-800-334-7577
For PRODUCT USE Information Call 1-800-331-2867

FIRST AID

If swallowed: • Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything to an unconscious person

If in eyes: • Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

If on skin: • Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If inhaled: • Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

For MEDICAL Emergencies Call 24 Hours A Day 1-800-334-7577
Have the product container or label with you when calling a poison control center or doctor for treatment advice.

HARMFUL IF SWALLOWED, ABSORBED THROUGH THE SKIN OR INHALED. CAUSES MODERATE EYE

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed, absorbed through the skin or inhaled. Causes moderate eye
irritation. Avoid contact with skin, eyes, or clothing. Avoid breathing spray mist.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Protect Esplanade™ 200 SC from freezing temperatures.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are acutely hazardous.
Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available or reconditioning, if appropriate. Then puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities.

Bayer Environmental Science

2 T. W. Alexander Drive
Research Triangle Park, NC 27709

Produced for:

Esplanade™ 200 SC
Protects railroad and managed roadsides, fence rows, utilities, hardscapes, industrial, municipal, and government sites.
Applications to newly seeded turf made sooner than Esplanade 200 SC can inhibit the emergence of seed and damage newly emerged seedlings. Seeding into turf treated with Esplanade 200 SC should be delayed until at least 8 months after application.

Average fl oz per acre. A repeat application can be made but not to exceed a total amount of 10 fl oz per acre per year.

Esplanade 200 SC may be used for preemergent residual control of certain weeds near railroad tracks, ballasts, and rail yards. Follow application instructions under the section of

**BACKGROUND**

Evening primrose, cutleaf evening primrose

Dandelion, common

Dock, common (seedlings)

Dove weed

Dandelion, cat's ear

Cutleaf evening primrose

4/30/12 1:14 PM Page 1
When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) - (f)], the handler PPE after handling and before eating, drinking, chewing gum, using tobacco or using toilet. Remove and wash contaminated clothing before reuse.

Harmful if swallowed, absorbed through the skin or inhaled. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water.

- long-sleeved shirt and long pants
- shoes plus socks
- a protective face mask

If inhaled:

- remove the person from the area
- provide oxygen if breathing has stopped

If swallowed:

- do not give anything to an unconscious person
- do not induce vomiting unless told to do so by a poison control center or doctor.

If contact with eyes:

- flush with running water for at least 15 minutes
- remove contact lenses, if present, after the first 5 minutes, then continue rinsing.

In case of a fire

- use dry chemical, carbon dioxide, or halon

PESTICIDE DISPOSAL:

- Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide Commissioner, local health department, or authorized institutional official to determine proper disposal method.

STORAGE AND DISPOSAL:

- Store in original container only. Keep out of the reach of children and pets.
- Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide Commissioner, local health department, or authorized institutional official to determine proper disposal method.

APPLICATION INFORMATION:

- Read the label on the product container completely before using. The manufacturer's directions for rate and application have been established to provide maximum performance.
- Never mix Esplanade 200 SC with other products, with the exception of ammonium sulfate, if a drift control additive is used. If drift control additives are used, observe the manufacturer's recommendations and restrictions provided with the product.
- Perform all mixing and handling operations in an area free from all sources of contamination. Use only the recommended mixing equipment.

This product is intended for use only as directed. Improper application may result in crop injury or damage to treated plants. The product is designed for use in turfgrass and non-target crops only. Do not apply to any nontarget area or non-target crop.

Agriculture Use Requirements:

- Do not apply or otherwise permit this product or sprays containing this product to come into contact with any non-target crop or desirable plants.
- Do not apply Esplanade 200 SC to newly seeded turf.

Compatibility Testing with Other Pesticides:

- Perform compatibility testing in the field only after all ingredients have been partially mixed. A 20% to 30% solution of Esplanade 200 SC can be added to many other pesticides, but test compatibility before use.

Drift Control Additive

- Drift control additives must be used in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) - (f)].

Sensitive Areas

- Sprays containing Esplanade 200 SC must not be applied to irrigation ditch banks, fence rows, plant sites, educational facilities, parking lots, or under asphalt or concrete as part of site preparation.

Spray drift management:

- Carefully evaluate drift potential before applying this product. Do not apply to water bodies, ponds, lakes, streams, irrigation systems, or adjacent land. Apply when wind is low and temperature is below 90°F.

- Do not apply directly to water or to soil where standing water is present except as specified on this label.

- Do not apply when weeds are actively flowering, fruiting, or growing from soil; if weeds are actively flowering, fruiting, or growing from soil, apply the herbicide prior to the appearance of the weeds or after they have died.

- Do not apply to a field that has already received a spray application of another herbicide or chemical. Spraying other herbicides or chemicals in the same field may result in increased drift and crop injury.

- Do not apply this product in a manner that may result in drift to adjacent areas, fields, and other properties.

- Do not apply to areas where drift may injure crops, vegetation, or other nontarget vegetation.

- Do not apply directly to water or to soil where standing water is present except as specified on this label.

- Do not apply in a manner that may result in drift to adjacent areas, fields, and other properties.

- Do not apply this product in a manner that may result in drift to adjacent areas, fields, and other properties.

- Do not apply directly to water or to soil where standing water is present except as specified on this label.

- Do not apply in a manner that may result in drift to adjacent areas, fields, and other properties.

- Do not apply this product in a manner that may result in drift to adjacent areas, fields, and other properties.
This pesticide has properties and characteristics associated with chemicals detected in ground water. This chemical may leach into ground water if used in areas where soils are unsuitable for preventing such leaching. It is not known if leaching will occur in areas of this product application.

Storage and Disposal

Do not store this product at a temperature below freezing or above 100°F. Do not store this product in the presence of light. Store this product in a cool, dry location out of the reach of children. Do not store this product in a metal tank or metal tank with a metal liner. Do not store this product in direct sunlight. Do not store this product in the same storage area with other materials.

PRODUCT INFORMATION

This product is a non-selective, residual herbicide. It is used to control a wide range of broadleaf weeds and grasses. It is effective in controlling many weeds that are resistant to other herbicides. It is not selective and will kill all plants in the treated area. It is a systemic herbicide and is absorbed by the plant and transported throughout the plant. It is not effective against dormant weeds. It is effective against broadleaf weeds at any stage of growth.
