20.0  SC. Use Esplanade 20.0  SC on these grasses only when removal of these grasses is desired.

Application of Esplanade 20.0  SC in the spring or fall to these grasses will control labeled weeds and allow low maintenance turf to develop. A repeat application can be made but not to exceed a total amount of 5 fl oz per acre per year.

Esplanade 20.0  SC may be used to promote the growth of warm season grasses in areas where low maintenance vegetation or erosion control is desired. Established bermudagrass (Cynodon dactylon), bahiagrass (Paspalum notatum), and annually planted warm season grasses (e.g., Zoysia spp., Zoysia sp) are not tolerant to Esplanade 20.0  SC.

Esplanade 200 SC 2.5 gal 80966857C 120822AV1 etl 091012 oversize

12/10/12  2:40 PM  Page 2

**PRECAUTIONARY STATEMENTS**

**GENERAL**

Ground Water Advisory:

- Do not apply in or on irrigation ditches/canals including the outer banks.
- This product is toxic to fish, aquatic invertebrates, and plants. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean water mark. Do not contaminate equipment or a mixing tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available or reconditioning.

**HUMAN HEALTH**

- Call a poison control center or doctor for treatment advice.
- Call a poison control center or doctor immediately for treatment advice.

**ENVIRONMENTAL HAZARDS**

- Herbicide), glyphosate, hexazinone, metsulfuron, picloram, simazine, sulfometuron, and triclopyr.

**APPLICATION INFORMATION**

- Applications made to areas where runoff water flows onto agricultural land may injure crops.
- Do not treat or allow spray drift or runoff to fall into irrigation ditches/canals or other channels that carry water that may be used for irrigation purposes.

**UGC**

- Use restricted to area of treatment.

**WSR**

- Use restricted to area of treatment.

**GROUNDWATER**

- Do not apply in or on irrigation ditches/canals including the outer banks.

**PRECAUTIONARY STATEMENTS**

**WIND**

- Sensible Areas
- Spraying drift control additives and shielded sprayers when practical, and spray when wind speed is low. See the Spray Drift Management section for more details. The use of a hand-held or backpack sprayer may influence wind patterns. The applicator should be familiar with local conditions and understand how they may impact spray drift.

**SUSCEPTIBILITY**

- Apply mixtures so that the spray solution covers the soil surface in a uniform manner. If uniform coverage is not achieved, preemergent activity will be inconsistent.

**COMPOUND TESTING WITH OTHER PRECIPITICS**

- Herbicide), glyphosate, hexazinone, metsulfuron, picloram, simazine, sulfometuron, and triclopyr.

**Pollen, Plant, and Animal Poisoning**

- Esplanade 200 SC is toxic to bees. Do not use near bees or areas accessible to bees and place so as not to be blown to such areas. Remove your face, hair, and clothing before handling this product. Avoid breathing dust or mist. Wash thoroughly after handling, and before eating, drinking, or smoking. Keep children and pets away from treated areas.

**PREVENTION OF ACCIDENTS**

- Maintaining sufficient agitation during application to ensure a uniform spray mixture.

**USE RESTRICTIONS**

- No contact or other direct use is to be on any chipped landscape or other areas that may be required for on-ground crops.

**METHOD OF DISPOSAL**

- Offer for recycling, if available or reconditioning.

**APPLICATIONS**

- Applications are made with ground equipment, such as tractor-mounted or backpack sprayers. For applications made to agricultural land, the application volume should be chosen based on the size of the field and the expected uniformity of the spray pattern. The desired rate of application depends on the residual weed activity required and restrictions on the maximum amount of Esplanade 200 SC per season. Esplanade 200 SC may be applied at 2.5 gallons/1000 square feet.

**DECORATIVE LANDSCAPE**

- Use restricted to area of treatment.

**TREES, SHRUBS, FOLIAGE, SNOW, AND DEBRIS**

- Use restricted to area of treatment.

**PRESERVATION OF WATER DOMESTIC AND NONDOMESTIC SOURCES**

- USE PRECAUTIONS
- Do not apply in or on irrigation ditches/canals including the outer banks.

**PERMENANT TANK MIX PARTNER**

- Esplanade 200 SC is not for sale, distribution, or use in Nassau County or Suffolk County in New York State.

**APPLICATING INFORMATION**

- Esplanade 200 SC is to be applied in a tank mixture with other pesticides, add the appropriate amount of the tank mix partners in the following order: (a) products in water-soluble packaging (WSP), emulsifiable or liquid concentrates. Shake or gently stir after each addition to mix thoroughly.

**PRECAUTIONARY STATEMENTS**

- Applications made to areas where runoff water flows onto agricultural land may injure crops.

**USAGE LIMITATIONS**

- Herbicide), glyphosate, hexazinone, metsulfuron, picloram, simazine, sulfometuron, and triclopyr.

**SADLY AREAS**

- Applications made to areas where runoff water flows onto agricultural land may injure crops.

**PRECAUTIONARY STATEMENTS**

- Herbicide), glyphosate, hexazinone, metsulfuron, picloram, simazine, sulfometuron, and triclopyr.

**SADLY AREAS**

- Applications made to areas where runoff water flows onto agricultural land may injure crops.

**PRECAUTIONARY STATEMENTS**

- Herbicide), glyphosate, hexazinone, metsulfuron, picloram, simazine, sulfometuron, and triclopyr.

**SADLY AREAS**

- Applications made to areas where runoff water flows onto agricultural land may injure crops.

**PRECAUTIONARY STATEMENTS**

- Herbicide), glyphosate, hexazinone, metsulfuron, picloram, simazine, sulfometuron, and triclopyr.

**SADLY AREAS**

- Applications made to areas where runoff water flows onto agricultural land may injure crops.
Use Esplanade 200 SC on these grasses only when removal of these grasses is desired. Total amount of 10 fl oz per acre per year. Cool season grasses such as Kentucky bluegrass (Poa pratensis) and Zoysiagrass (Zoysia spp.) may be used to promote the growth of warm season grasses in areas where low maintenance vegetation or erosion control is desired. Established Bermudagrass (Cynodon dactylon) and Broadleaf Weeds in Non-Residential Non-Crop Areas, Railroad and Rail Yards, Managed Rangelands, Farm Pasture, Vegetable, Ornamental, Industrial, Marshland, and Government Sites.

### ACTIVE INGREDIENT:
Indaziflam (CAS No: 730979-19-8).................. 19.05%

### OTHER INGREDIENTS: ............................................ 80.95%

Contains 1.67 pounds of indaziflam per gallon. The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product.

**Precautionary Statements, Directions for Use and Storage and Disposal Instructions.**

**GROUP 29 HERBICIDE**

**KEEP OUT OF REACH OF CHILDREN CAUTION**

For MEDICAL or other Emergencies: Call 800-858-1111.

For NON-EMERGENCY, non-pest control use, contact your retailer, local extension service, state agricultural agent, or state regulatory official.

Precautionary Statements, Directions for Use and Storage and Disposal Instructions.
Timings, Use Rates, and Maximum Seasonal Rate for Esplanade 200 SC

Shielded Sprayers

1. Apply Esplanade 200 SC to control existing weeds. Esplanade 200 SC does not control tubers, rhizomes, and woody vegetation.

2. Esplanade 200 SC can be applied to terrestrial non-crop sites and unimproved turf sites that contain areas of casual water of a temporary nature as a result of surface water collecting in equipment wheel or storage. Treatments should be timed to allow 20.125" of rainfall within 10 days of treatment in order to wash the treated site for establishment of vegetation. Applications should be made only when there is little or no risk of spray drift or movement of applied product into sensitive areas. Sensitive areas are defined as bodies of water (ponds, lakes, rivers, and streams), wetlands, habitats of endangered species and non-labeled agricultural crop areas. Applicators must take all necessary precautions and practice at all times to avoid spray drift into sensitive areas.

3. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

4. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

5. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

6. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

7. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

8. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

9. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

10. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

11. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

12. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

13. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

14. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

15. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

16. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

17. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

18. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

19. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

20. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

21. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

22. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

23. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

24. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

25. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

26. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

27. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

28. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

29. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

30. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

31. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

32. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

33. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

34. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

35. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

36. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

37. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

38. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

39. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.

40. For spring applications, apply Esplanade 200 SC in the spring for control of spring and summer germinating weeds and apply in the fall for control of winter weeds.

41. For early fall applications, apply Esplanade 200 SC prior to when the ground freezes.

42. For late fall applications, apply Esplanade 200 SC prior to when the ground freezes.
Esplanade 200 SC 2.5 gal 80966857C 120822AV1 etl 091012 oversize : 9/10/12  2:40 PM  Page 2

germinating weeds, Esplanade 200 SC requires rainfall (minimum 0.25 inches) within several weeks after application to activate the herbicide. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

• Do not apply directly to water or to soil where standing water is present except as specified on this label.

Esplanade 200 SC is a selective, preemergent, alkylazine herbicide for control of many annual grasses and broadleaf weeds in railroad, roadside, hardscapes, industrial areas, utilities, airports, government, SC to control existing weeds. Esplanade 200 SC does not control tubers, rhizomes, and woody vegetation.

USE RESTRICTIONS

Environmental Protection Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

PESTICIDE DISPOSAL:

into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment.

• Call a poison control center or doctor for treatment advice.

This pesticide has properties and characteristics associated with chemicals detected in groundwater. This chemical may leach into groundwater if used in areas where soils are

• Do not use in or around streams, ponds, lakes, or other surface waters.

When spraying close or next to ponds, lakes, rivers, and streams be cognizant of keeping the spray solution from reaching the water.

Applies mixtures so that the spray solution covers the soil surface in a uniform manner. If uniform coverage is not achieved, preemergent activity will be inconsistent.

only apply this product when the potential for drift to adjacent sensitive areas is minimal (e.g. when wind is blowing away from the sensitive areas). The applicator is responsible for considering all

1. After adding all ingredients, let the mixture stand for 15 minutes and look for separation, large flakes, precipitates, gels, and heavy oily film or other signs of incompatibility.

spray pressure. Use high flow rate nozzles to apply the highest practical spray volume. With most nozzle types, narrower spray angles produce larger droplets. Follow the nozzle manufacturer's

• Applications made to areas where runoff water flows onto agricultural land may injure crops.

• Do not treat or allow spray drift or runoff to fall into irrigation ditches/canals or other channels that carry water that may be used for irrigation purposes.

• Applications made during periods of intense rainfall, to soils saturated with water, or soils through which rainfall will not readily penetrate may result in runoff and movement of Esplanade 200 SC.

Apply Esplanade 200 SC with a properly calibrated sprayer according to the manufacturer's directions and check periodically to be certain that the equipment is working properly prior to each use.

• Applications made to areas where runoff water flows onto agricultural land may injure crops.

• Do not apply Esplanade 200 SC to newly seeded turf.

• Do not graze or feed forage, hay or straw from treated areas to livestock.

• Applications made to areas where runoff water flows onto agricultural land may injure crops.

• Do not apply Esplanade 200 SC to new ly seeded turf.

• Do not apply directly to water or to soil where standing water is present except as specified on this label.

1. Do not apply on or near crops that are susceptible to injury from herbicides, or if there is a risk of herbicide movement to the crop.

b) WP, (c) W G or other dry flowables, (d) fertilizers, (e) Esplanade 200 SC, (f) other aqueous suspension products (SC), (g) liquid flowables, (h) emulsifiable concentrates and other organic-solvent based

2. After adding all ingredients, let the mixture stand for 15 minutes and look for separation, large flakes, precipitates, gels, and heavy oily film or other signs of incompatibility.

3. Applications made during periods of intense rainfall, to soils saturated with water, or soils through which rainfall will not readily penetrate may result in runoff and movement of Esplanade 200 SC.

• Applications made to areas where runoff water flows onto agricultural land may injure crops.

• Do not apply directly to water or to soil where standing water is present except as specified on this label.

1. Do not apply on or near crops that are susceptible to injury from herbicides, or if there is a risk of herbicide movement to the crop.
Esplanade 200 SC controls weeds by reducing the emergence of seedlings through inhibition of cellulose biosynthesis (CB Inhibitor). Necrosis or yellowing may also be observed if the herbicide is applied to your State or Tribe, consult the agency responsible for pesticide regulation.

Esplanade 200 SC can be applied to terrestrial non-crop sites and unimproved turf sites that contain areas of casual water of a temporary nature as a result of surface water collecting in equipment wheel tracks. Esplanade 200 SC may only be applied by ground equipment only.

**Safety Precautions**

- **First Aid**: Do not apply Esplanade 200 SC through an irrigation or chemigation system. Do not apply Esplanade 200 SC to newly seeded turf. Do not exceed 10 fl oz per acre of Esplanade 200 SC for all Industrial Vegetation Management applications within a calendar year or in a 12 month period from the previous application. Applications should be made only when there is little or no risk of spray drift or movement of applied product into sensitive areas. Sensitive areas are defined as bodies of water (ponds, lakes, rivers, streams, canals, storm drains and ditches) and areas inhabited by wildlife. Treated soil should be left undisturbed to reduce the potential for Esplanade 200 SC movement by soil erosion, by wind, or water. Apply Esplanade 200 SC with a properly calibrated sprayer according to the manufacturer's directions and check periodically to be certain that the equipment is working properly prior to each use.

- **Compatibility Tests with Other Products**: Applications made with current formulations of Esplanade 200 SC are compatible with current formulations of 2,4-D (2,4-D sodium). Applications made with 2,4-D (2,4-D sodium) are compatible with current formulations of Esplanade 200 SC. Applications made with other 2,4-D formulations may be compatible with current formulations of Esplanade 200 SC. For additional information, contact the manufacturer of the product to be used in combination with Esplanade 200 SC.

- **Drift Control Additive**: Set the boom and make applications at the lowest height that safely permits uniform coverage of the soil and minimizes droplet evaporation. Avoid application if wind conditions are gusty. Local terrain can also affect droplet size. Be aware of factors that may affect droplet size when making decisions.

- **Controlling Droplet Size**: Shielding the boom or individual nozzles may also reduce the potential for drift. However, it is the responsibility of the applicator to verify that the shield does not interfere with uniform spray coverage.

- **Mixing Instructions**: Before mixing the chemicals, please review the compatibility tests noted above. The mixing order is as follows: (a) products in water-soluble packaging (WSP), water, and then the herbicide solution. The herbicide solution is then added to the equipment tank at the concentration rate. If a formulation has an Acidic Control Additive, continue to fill the tank with water to the desired volume while agitating. If a formulation has a Neutral Control Additive, then mix the contents of the bag according to the directions provided on the bag. After adding all ingredients, let the mixture stand for 15 minutes and look for separation, large flakes, precipitates, gels, and heavy oily film or other signs of incompatibility. If no signs of incompatibility are observed, continue to fill the tank with water to the desired volume while agitating. Formulations can vary in color and the fluid may become cloudy. This is normal and there is no need to discharge the tank.

- **Contamination of Surface Water**: Esplanade 200 SC may only be applied to terrestrial non-crop sites and unimproved turf sites that contain areas of casual water of a temporary nature as a result of surface water collecting in equipment wheel tracks. This pesticide has properties and characteristics associated with chemicals detected in groundwater. This chemical may leach into groundwater if used in areas where soils are permeable and have a high potential for reaching surface water via runoff for several months or more after application. Esplanade 200 SC is to be applied in a tank mixture with other pesticides, add the appropriate amounts of the tank mix partners in the following order: (a) products in water-soluble packaging (WSP), water, and then the herbicide solution. The herbicide solution is then added to the equipment tank at the concentration rate. If a formulation has an Acidic Control Additive, continue to fill the tank with water to the desired volume while agitating. If a formulation has a Neutral Control Additive, then mix the contents of the bag according to the directions provided on the bag. After adding all ingredients, let the mixture stand for 15 minutes and look for separation, large flakes, precipitates, gels, and heavy oily film or other signs of incompatibility. If no signs of incompatibility are observed, continue to fill the tank with water to the desired volume while agitating. Formulations can vary in color and the fluid may become cloudy. This is normal and there is no need to discharge the tank.

- **Spill Clean-Up**: Do not apply Esplanade 200 SC to new soils. Do not exceed 10 fl oz per acre of Esplanade 200 SC for all Industrial Vegetation Management applications within a calendar year or in a 12 month period from the previous application. Applications should be made only when there is little or no risk of spray drift or movement of applied product into sensitive areas. Sensitive areas are defined as bodies of water (ponds, lakes, rivers, streams, canals, storm drains and ditches) and areas inhabited by wildlife. Treated soil should be left undisturbed to reduce the potential for Esplanade 200 SC movement by soil erosion, by wind, or water. Apply Esplanade 200 SC with a properly calibrated sprayer according to the manufacturer's directions and check periodically to be certain that the equipment is working properly prior to each use.

- **Drift Control Additive**: Set the boom and make applications at the lowest height that safely permits uniform coverage of the soil and minimizes droplet evaporation. Avoid application if wind conditions are gusty. Local terrain can also affect droplet size. Be aware of factors that may affect droplet size when making decisions.

- **Controlling Droplet Size**: Shielding the boom or individual nozzles may also reduce the potential for drift. However, it is the responsibility of the applicator to verify that the shield does not interfere with uniform spray coverage.

- **Mixing Instructions**: Before mixing the chemicals, please review the compatibility tests noted above. The mixing order is as follows: (a) products in water-soluble packaging (WSP), water, and then the herbicide solution. The herbicide solution is then added to the equipment tank at the concentration rate. If a formulation has an Acidic Control Additive, continue to fill the tank with water to the desired volume while agitating. If a formulation has a Neutral Control Additive, then mix the contents of the bag according to the directions provided on the bag. After adding all ingredients, let the mixture stand for 15 minutes and look for separation, large flakes, precipitates, gels, and heavy oily film or other signs of incompatibility. If no signs of incompatibility are observed, continue to fill the tank with water to the desired volume while agitating. Formulations can vary in color and the fluid may become cloudy. This is normal and there is no need to discharge the tank.
20 0  SC. Use Esplanade 20 0  SC on these grasses only when removal of these grasses is desired.

Centipedegrass (*Eremochloa ophiuroides*) may be used to promote the growth of warm season grasses in areas where low maintenance vegetation or erosion control is desired. Established bermudagrass (*Cynodon dactylon*) may be used for preemergent residual control of certain weeds near railroad tracks, ballasts, and rail yards. Follow application instructions under "Railroads and Rail Yards".

In Rail and Rail yard use sites, the 3.5 oz rate of Esplanade 20 0  SC should only be applied under low weed pressure in combination with another approved herbicide. This rate is not intended for parking lots, and managed areas. Esplanade 20 0  SC may be used alone for residual weed control or in tank mixture. Tank mixtures with post-emergent herbicides help to control existing weeds. Observe the time to apply Esplanade 20 0  SC after application.

**Components:**
- **Primary Herbicides:**
  - Eptam® 4.6 SC
  - Sencor®
  - R-40
d-2

**Label Specifications:**
- **Container Size:** 2.5 gallons
- **Use Restrictions:**
  - Use only on the labeled crop types
  - Do not use on crops to be harvested for food, seed, or feed
  - Do not use on crops for which no safe interval has been established

**Formulation:**
- **Active Ingredient:** 1.67 pounds of indaziflam per gallon
- **Other Ingredients:** 80.95%
- **Total:** 100.00%

**Application Instructions:**
- **Preplant:**
  - Use Esplanade 20 0  SC to control volunteer sedges in the spring or fall before planting.
  - Do not use more than 3.5 oz per acre.

- **Postplant:**
  - Use Esplanade 20 0  SC to control grasses growing in the rows of the crop or groundcovers in the rows of the crop.
  - Use the 3.5 oz rate on crops to be harvested for food, seed, or feed.

**Storage and Disposal:**
- **Not for Home or Vegetable Gardens:**
  - Store in a dry, cool, well-ventilated area away from food and feed.
  - Do not contaminate streams, ponds, or waterways.

**Precautionary Statements:**
- **Dilution:**
  - Before use, follow the specific dilution rates provided in the application instructions.

**Risk Assessments:**
- **Inhalation:**
  - Avoid breathing dust or fumes.
  - Wash hands after use.

- **Skin Contact:**
  - Wash hands after use.

- **Eye Contact:**
  - Avoid contact with eyes.
  - Wash eyes with water for 15 minutes if irritation occurs.

**Environmental Impact:**
- **Non-target Plants:**
  - Some weeds are not killed by Esplanade 20 0  SC.

**Conditions:**
- **Payment:**
  - Payment for this product is not available.

**Limitations of Liability:**
- **Remedies:**
  - The remedies for breach of this warranty are limited to the purchase price paid, or at Bay's election, the replacement of the product.

**Bayer:**
- **Trademarks:**
  - Bay®
  - Bay® Cross (reg’d)
  - Finale®
  - Esplanade™
  - Backed by Bay™

**Other Information:**
- **Use of Other Herbicides:**
  - When using Esplanade 20 0  SC in combination with other herbicides, follow the label instructions for both products.

**For Medical and Transportation Emergencies:**

Esplanade 200 SC 2.5 gal 80966857C 120822AV1 etl 091012 oversize: 9/10/12  2:40 PM  Page 1

20.0 SC. Use Esplanade 20.0 SC on these grasses only when removal of these grasses is desired. Total amount of 10 fl oz per acre per year. Cool season grasses such as Kentucky bluegrass (Esplanade 20.0 SC may be used to promote the growth of warm season grasses in areas where low maintenance vegetation or erosion control is desired. Established bermudagrass (label. Apply Esplanade 20.0 SC at 5-7 fl oz per acre. A repeat application can be made but not to exceed a total amount of 10 fl oz per acre per year. Bareground is the desired result. In situations where warm season turfgrass coverage is desired, such as at railroad crossings, follow use directions under the Warm Season Turf Release section of this label.

Applications to hardscapes (e.g. patios, paved parking lots and walkways) may be made by spot application only. Evening primrose, common eclipta (Eclipta prostrata), common dandelion (Taraxacum officinale), cranesbill (Geranium spp.), and some median strips near highways, hardscapes, parks, airports, utilities, government and military installations, around farm buildings, manufacturing sites, office buildings, educational facilities, and some wet sites are tolerant to Esplanade 200 SC at rates up to 5 fl oz per acre. See inside leaflet for complete First Aid Instructions, Precautionary Statements, Directions for Use and Storage and Disposal Instructions.

CAUTION

For MEDICAL and TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577
For PRODUCT USE Information Call 1-800-331-2867

FIRST AID

If swallowed:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything to an unconscious person.

If on skin:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If inhaled:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

For MEDICAL Emergencies Call 24 Hours A Day 1-800-334-7577
Have the product container or label with you when calling a poison control center or doctor or going for treatment.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed, absorbed through the skin or inhaled. Avoid contact with skin, eyes, or clothing. Avoid breathing spray mist. All mixers, loaders, applicators and other handlers must wear long-sleeved shirt, long pants, shoes plus socks, and waterproof gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using toilet. Remove and wash contaminated clothing before reuse.
