CRABGRASS & WEED PREVENTER
FOR LAWNS & ORNAMENTAL BEDS

For Use on Cool Season & Warm Season Turf Grass
Treats up to 5,000 sq. ft.

SPRING
PHASE 1

Provides control of crabgrass and many other weeds in established lawns and residential landscapes.

Keep Out Of Reach Of Children
CAUTION

Contains Diquat + 2,4-D, Ramiculon (Salicylic Acid) & 2-Chloro-4-(2,4-Trimethylphenyl)Azoxyethane (3,5-Dichloro-2-[(2,4-Trimethylphenoxy)iminomethyl]phenol)

**APPLICATION TIMING**

Spring Application

Control of Ch meson. This product provides broad-spectrum control of most grasses and a number of broadleaf weeds when applied prior to 6 weeks after germination. For the best control, the grass seed should be planted at least 1 week before the application date and the weed seed should be planted within 3 weeks after the application date. The use rate of 4.0 kg/ha is recommended for effective control of grasses and weeds.

Fall Application

This product can also be applied to control late-season grasses by applying it 4 to 6 weeks after germination. The earlier the application, the better the control. When applied to fall, it is most effective on the new seedlings that have emerged and are beginning to grow. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**WEEDS CONTROLLED OR SUPPRESSED**

The product will provide control of grasses and broadleaf weeds when applied prior to germination. The use rate is based on the date of application and the stage of growth of the crop. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**USE RATES**

The following chart shows the recommended use rates for different regions of the United States:

<table>
<thead>
<tr>
<th>Region of U.S.</th>
<th>Use Rate</th>
<th>Type of Group Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>North</td>
<td>4.0 kg/ha</td>
<td>Early Non-Selective</td>
</tr>
<tr>
<td>South</td>
<td>4.0 kg/ha</td>
<td>Late Non-Selective</td>
</tr>
</tbody>
</table>

**APPLICATION INSTRUCTIONS AND EQUIPMENT**

Application equipment must be properly calibrated to ensure accurate and consistent application of the product. The use rate must be adjusted based on the stage of growth of the crop and the date of application. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**USE RESTRICTIONS FOR AGRICULTURAL COMMODITIES**

The product is labeled for use on the following agricultural commodities:

- Barley
- Canola
- Corn
- Cotton
- Soybeans
- Wheat

**USE RESTRICTIONS FOR NON-AGRICULTURAL LANDS**

The product is labeled for use on the following non-agricultural lands:

- Gardens
- Lawns
- Home landscapes
- Industrial areas

**USE RESTRICTIONS FOR ENVIRONMENTAL COMMODITIES**

The product is labeled for use on the following environmental commodities:

- Streams
- Ponds
- Wetlands
- Marine environments

**USE RESTRICTIONS FOR HUMAN HEALTH**

The product is labeled for use in human health applications. The use rate must be adjusted based on the stage of growth of the crop and the date of application. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**APPLICATION PROCEDURES**

Application equipment must be properly calibrated to ensure accurate and consistent application of the product. The use rate must be adjusted based on the stage of growth of the crop and the date of application. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**USES RECOMMENDED**

- Control of grasses and broadleaf weeds when applied prior to germination.
- Control of grasses and broadleaf weeds when applied after germination.

**USES NOT RECOMMENDED**

- Control of grasses and broadleaf weeds when applied after the crop has emerged.
- Control of grasses and broadleaf weeds when applied after the crop has reached the seedling stage.

**USE RESTRICTIONS**

The product is labeled for use in human health applications. The use rate must be adjusted based on the stage of growth of the crop and the date of application. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**APPLICATION INSTRUCTIONS AND EQUIPMENT**

Application equipment must be properly calibrated to ensure accurate and consistent application of the product. The use rate must be adjusted based on the stage of growth of the crop and the date of application. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**USE RESTRICTIONS FOR AGRICULTURAL COMMODITIES**

The product is labeled for use on the following agricultural commodities:

- Barley
- Canola
- Corn
- Cotton
- Soybeans
- Wheat

**USE RESTRICTIONS FOR NON-AGRICULTURAL LANDS**

The product is labeled for use on the following non-agricultural lands:

- Gardens
- Lawns
- Home landscapes
- Industrial areas

**USE RESTRICTIONS FOR ENVIRONMENTAL COMMODITIES**

The product is labeled for use on the following environmental commodities:

- Streams
- Ponds
- Wetlands
- Marine environments

**USE RESTRICTIONS FOR HUMAN HEALTH**

The product is labeled for use in human health applications. The use rate must be adjusted based on the stage of growth of the crop and the date of application. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**APPLICATION PROCEDURES**

Application equipment must be properly calibrated to ensure accurate and consistent application of the product. The use rate must be adjusted based on the stage of growth of the crop and the date of application. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.

**USES RECOMMENDED**

- Control of grasses and broadleaf weeds when applied prior to germination.
- Control of grasses and broadleaf weeds when applied after germination.

**USES NOT RECOMMENDED**

- Control of grasses and broadleaf weeds when applied after the crop has emerged.
- Control of grasses and broadleaf weeds when applied after the crop has reached the seedling stage.

**USE RESTRICTIONS**

The product is labeled for use in human health applications. The use rate must be adjusted based on the stage of growth of the crop and the date of application. The recommended use rate is 4.0 kg/ha for effective control of grasses and weeds.
