AQUA GUARD™
5-Step Pool Care System

ALL-IN-ONE CHLORINATING GRANULES
Dissolves Quickly & Completely Controls Algae & Bacteria

FREE POOL CARE ADVICE
1-800-SOS-POOL

ACTIVE INGREDIENT:
Sodium Dichloro-s-triazinetrione-Dihydrate..99.0%
OTHER INGREDIENTS........................................1.0%
TOTAL..........................................................100%
Available Chlorine.........................56%

NET WT.
50 Lbs
(22.68 Kg.)

KEEP OUT OF REACH OF CHILDREN
NO SE DEJE AL ALCANCE DE LOS NIÑOS

DIRECTIONS: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DANGER: Never mix this concentrated chemical with any other substance except generous amounts of water. See CHEMICAL HAZARDS on this label.

The use of AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES also requires the one time use of AQUA-GUARD™ STABILIZER CONDITIONER as described in the directions below under Start Up. This two-component system results in a longer-lasting chlorine residual and reduced chlorine consumption. Both products are completely soluble.

VINYL-LINED POOL CARE: Vinyl-lined pools are easily damaged by chemicals used to treat and maintain pools. ALL-IN-ONE CHLORINATING GRANULES are well suited for use in these pools, especially the above-ground pools which have 3–4 foot depths and are not equipped with a bottom drain. ALL-IN-ONE CHLORINATING GRANULES dissolves fast and completely (is easily pre-dissolved in a bucket of water to help avoid potential problems), so direct contact with the pool liner is reduced and there are no residues to be swept or vacuumed from the pool bottom. ALL-IN-ONE CHLORINATING GRANULES also simplifies pH control because it's pH neutral, compared to other forms of chlorinating products which contain calcium hypochlorite, sodium hypochlorite, and trichloroisocyanuric acid (NOTE: Insoluble crystal-forming reaction will result when using sodium bisulfate (dry pool acid) to adjust pH when used in conjunction with calcium hypochlorite). ALL-IN-ONE CHLORINATING GRANULES will not cloud water even when superchlorinating which often occurs with calcium hypochlorite products.

START UP: Step 1. Condition pool water with AQUA GUARD™ STABILIZER CONDITIONER as per directions on its label. Thereafter, regular use of ALL-IN-ONE CHLORINATING GRANULES alone will maintain proper stabilization. NOTE: Omit Step 1 if pool is already conditioned with a similar stabilizer. Step 2. Concurrently with Step 1, superchlorinate water by adding 12 oz. of ALL-IN-ONE CHLORINATING GRANULES per 10,000 gallons of pool water. See additional superchlorination instructions below.

DAILY CARE: After Step 1 and 2 above, regularly check chlorine residual with a test kit and chlorinate daily or as needed to maintain 1.0 to 1.5 ppm residual chlorine. NOTE: One ounce of this product per 5,000 gallons of pool water will increase an existing chlorine residual by 0.8 ppm (1/8 rounded measuring cup = 1 oz.). Broadcast ALL-IN-ONE CHLORINATING GRANULES directly into the pool water. pH: Keep pH of water between 7.2 and 7.6. Use acid or AQUA GUARD™ pH DOWN to lower pH and AQUA GUARD™ pH UP to raise it.

SUPERCHLORINATION: Whenever the pool water loses its sparkle or turns green or the chlorine residual falls rapidly after regular chlorination, superchlorination is recommended. Experience shows that during summer months, water should be superchlorinated with 6 oz. of ALL-IN-ONE CHLORINATING GRANULES per 5,000 gallons of pool water every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 3 ppm.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTICATED ANIMALS

DANGER: CORROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.
FIRST AID

<table>
<thead>
<tr>
<th>Condition</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If In Eyes</td>
<td>Hold eye open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.</td>
</tr>
<tr>
<td>If Inhaled</td>
<td>Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor immediately for treatment advice.</td>
</tr>
<tr>
<td>If Swallowed</td>
<td>Call a poison control center or doctor immediately for treatment advice. Promptly drink large quantity of water if able to swallow. Do NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.</td>
</tr>
<tr>
<td>If on Skin or Clothing</td>
<td>Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.</td>
</tr>
</tbody>
</table>

Have the product container or label with you when calling poison control center or doctor, or going for treatment. For assistance call 1-800-797-8655.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

ENVIRONMENTAL HAZARD

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to the discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE CONTAINING GASES. DECOMPOSES AT 460° F TO 480° F WITH LIBERATION OF HARMFUL GASES. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to a fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. IN CASE OF FIRE, if possible, isolate container in open air or well ventilated area. Flood with large volume of water.
IN CASE OF CONTAMINATION OR DECOMPOSITION, do not reseal container.

STORAGE AND DISPOSAL: STORAGE: Keep product in tightly closed container when not in use. Store in cool, dry well-ventilated area away from heat or open flame. In case of decomposition, isolate container in open area if possible, and flood with large amounts of water. DISPOSAL: IF EMPTY: Nonrefillable container. Do not reuse or refill this container. Place in trash collection or offer for recycling if available. IF PARTLY FILLED: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
