PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Covers moderate eye irritation. Avoid contact with eyes, skin, or clothing. Inhale if swallowed, inhaled through the skin, or inhaled. Avoid contact with open wounds, eyes, or clothing. Wash thoroughly with soap and water after handling. Wash before eating, drinking, smoking, using tobacco, or using the toilet.

Handling applying chlorine dioxide in an occupational setting may cause exposure. People may require the presence during dispensing. Users must wear a half-mask respirator with acid gas cartridges and P95 filter.

ENVIRONMENTAL HAZARDS

This product is not to be shipped and aquatic organisms. Do not discharge effluent containing this product into lakes, rivers, ponds, streams, adjoint, or other bodies of water in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product in water systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Chlorine dioxide is a strong, irritating agent. Contact with corrosive materials such as acids, chlorine, and organic compounds may cause a chemical reaction resulting in evolution of chlorine dioxide and heat, explosion and/or fire could result. Keep at moderate and usage away from this material.

STORAGE AND HANDLING

Do not store in an open, well-ventilated area. Do not store in contact with metal. Do not store in contact with acetone or dissolvable fumes. Do not store in contact with water, non-potable water, or any other fluid that may cause the release of chlorine dioxide gas. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material.

Stabilizing/Preservation: Inerting materials, such as a silicate of metallic oxide, are used to store in contact with water, non-potable water, or any other fluid that may cause the release of chlorine dioxide gas. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material.

POTENTIAL HAZARDS: Chlorine dioxide is a strong, irritating agent. Contact with corrosive materials such as acids, chlorine, and organic compounds may cause a chemical reaction resulting in evolution of chlorine dioxide and heat, explosion and/or fire could result. Keep at moderate and usage away from this material.

STORAGE AND HANDLING

Do not store in an open, well-ventilated area. Do not store in contact with metal. Do not store in contact with acetone or dissolvable fumes. Do not store in contact with water, non-potable water, or any other fluid that may cause the release of chlorine dioxide gas. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material. Do not store in contact with any flammable material.
