CHEMTREAT CL-3000

This product is intended for the Treatment of Industrial Process Water, Food Processing Water, and Process Water Systems, and Control of Slime in Cooling Towers.

KEEP OUT OF REACH OF CHILDREN
CAUTION

ACTIVE INGREDIENTS
Chlorine dioxide.................................0.30%
OTHER INGREDIENTS.............................99.70%
TOTAL: ............................................100.00%

CHEMTREAT CL-3000 contains 3000 ppm (3000 mg/liter) chlorine dioxide (available chlorine 0.85%)

FIRST AID

IF ON SKIN OR CLOTHING: • Remove contaminated clothing. • Rinse exposed skin immediately with plenty of water for 15 to 20 minutes. • Call a poison control center or doctor immediately for treatment advice.

IF SWALLOWED: • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.

IF INHALED: • Move person to fresh air. • If person is not breathing, call 911 or an ambulance then give artificial respiration. • Call a poison control center or doctor for further treatment advice.

IF IN EYES: • Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor immediately for treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

HOTLINE NUMBERS
For chemical spill information, call CHEMTREC: 1-800-424-9300
For emergency medical information, call the National Pesticide Information Center: 1-800-858-7378

See insert booklet for additional precautionary statements and directions for use.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Caution: Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Harmful if swallowed, absorbed through the skin, or inhaled. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet.

Handlers applying chlorine dioxide in an occupational setting must wear gloves. People must vacate the premises during high pressure spraying treatments. For spraying operations user must wear a half-face respirator with acid gas cartridge and N95 filter.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Chlorine dioxide is a strong oxidizing agent. Contamination with materials such as acids, chlorine, and organic chemicals may cause a chemical reaction resulting in evolution of chlorine dioxide and heat. Explosion and/or fire could result. Keep all chemicals and foreign material away from this solution. DO NOT FREEZE.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Carefully read and follow the instructions for the CHEMTREAT CL-3000 dosing equipment provided by the manufacturer or its authorized agent.

*NOT FOR USE IN CALIFORNIA

AGRICULTURAL PREMISES AND EQUIPMENT
TREATMENT OF POULTRY CHILLER WATER/CARCASS SPRAY AND DIP WATER TO CONTROL SPOILAGE-CAUSING BACTERIA
When used in a pre-chiller or chiller tank, add CHEMTREAT CL-3000 to water at a dose of 0.5-3 ppm (0.5 – 3.0 mg/liter) chlorine dioxide (a dilution ratio 1:6000 – 1:1000). When used as a carcass spray or dip solution, add CHEMTREAT CL-3000 to water at a maximum dose of 10 ppm (10.0 mg/L) (a dilution ratio of 1:300) to maintain a maximum residual of 3 ppm (3.0 mg/L) chlorine dioxide (a dilution ratio of 1:1000). Adjust feed dosage to maintain 0.5-3 ppm (3.0 mg/L) residual
measured immediately following the carcass spray or in the dip solution. Handlers applying chlorine dioxide in an occupational setting must wear gloves.

**COMMERCIAL, INSTITUTIONAL AND INDUSTRIAL PREMISES AND EQUIPMENT**

**GENERAL DISINFECTANT**

This product may be used to disinfect (100 ppm for 10 minutes — a dilution ratio of 1:30) to treat, control and prevent fungi, bacteria, and algae, slimes, and mildews; and to remove slimes (30 ppm for 12 hours continuous treatment — dilution ratio of 1:60) in non-potable water systems.

**FOOD PROCESSING PLANTS, FOOD-HANDLING ESTABLISHMENTS AND RESTAURANTS**

This product can be used to control microbial contamination, slime and odor in food processing waters and to sanitize previously cleaned food contact surfaces.

**SANITIZING SOLUTION FOR FOOD CONTACT SURFACES**

Prior to sanitization, remove all gross food particles and soil by use of a pre-flush, pre-scrape or pre-soak treatment. Prepare a 25-50 ppm solution of CHEMTREAT CL-3000 by using a dilution ratio of 1:60. Using a commercial sprayer, saturate all surfaces with the diluted CHEMTREAT CL-3000. Allow surfaces to remain wet for at least 1 minute. The diluted CHEMTREAT CL-3000 may be irritating if inhaled. For spraying operations, user must wear a half-face respirator with acid gas cartridge and N95 filter. This product is effective against Salmonella enterica serovar Typhi (ATCC 6539) and Staphylococcus aureus (ATCC 6538).

**SANITIZING SOLUTION FOR NON-FOOD CONTACT SURFACES**

Prior to sanitization, remove all gross food particles and soil. Prepare a 25-100 ppm solution of CHEMTREAT CL-3000 by using a dilution ratio of 1:6 to 1:30. Using a commercial sprayer, saturate all surfaces with the diluted CHEMTREAT CL-3000. Allow surfaces to remain wet for at least 1 minute. The diluted CHEMTREAT CL-3000 may be irritating if inhaled. For spraying operations, user must wear a half-face respirator with acid gas cartridge and N95 filter. This product is effective against Salmonella enterica serovar Typhi (ATCC 6539) and Staphylococcus aureus (ATCC 6538). This product may be used to sanitize non-food equipment, such as blast chiller or hold tank equipment, as well as equipment being used for non-food purposes. This product may be used to re-treat non-food equipment, such as blast chiller or hold tank equipment, as well as equipment being used for non-food purposes. This product may be used to re-treat non-food equipment, such as blast chiller or hold tank equipment, as well as equipment being used for non-food purposes.

**SANITIZER FOR FOOD-PROCESSING EQUIPMENT IN DAIRIES, BREWERIES AND BOTTLING PLANTS**

Prior to sanitization, remove all gross food particles and soil by use of a pre-flush, pre-scrape or pre-soak treatment. Prepare a 25-50 ppm solution of CHEMTREAT CL-3000 by using a dilution ratio of 1:6. Fill, immerse, circulate, wipe or spray the target surface with the food contact sanitizing solution to make sure surfaces are thoroughly wet for at least one minute. Hard to reach in-place equipment, pipes, closed vessels, etc., must be filled with the sanitizing solution to ensure contact with all surfaces. The diluted CHEMTREAT CL-3000 may be irritating if inhaled. For spraying operations, user must wear a half-face respirator with acid gas cartridge and N95 filter. All tanks, food contact sanitizing solution to drain from all treated surfaces and air dry. DO NOT rinse treated surface. The food contact sanitizing solution may not be reused for sanitizing but may be diluted to 1:10 with water and used for cleaning of walls, floors and drains of the plant.

**SANITIZER FOR NON-FOOD CONTACT SURFACES IN DAIRIES, BREWERIES AND BOTTLING PLANTS**

Prior to sanitization, remove all gross filth from areas to be sanitized and thoroughly clean surfaces with a suitable detergent. Prepare a 25-500 ppm solution of CHEMTREAT CL-3000 by using a dilution ratio of 1:6. Apply the non-food contact sanitizing solution to hard, non-porous surfaces, thoroughly wetting surfaces with a cloth, mop, sponge, sprayer, or immersion. Treated surfaces must remain wet for at least one minute. Wipe dry with a cloth, sponge or mop or allow to air dry. The diluted CHEMTREAT CL-3000 may be irritating if inhaled. For spraying operations, user must wear a half-face respirator with acid gas cartridge and N95 filter.

**ICE MAKING PLANTS AND MACHINERY**

Ice making machinery should be disassembled and thoroughly cleaned using a suitable detergent followed by a potable water rinse. Add CHEMTREAT CL-3000 to the incoming water line of the ice machine via a chemical feed pump or injector system at a dose of 20 ppm chlorine dioxide (dilution ratio of 1:150). The ice-making machines should then be thoroughly cleaned with a suitable disinfectant. This product may be used to disinfect, to control and prevent fungi, bacteria, and algae, slimes, and mildews; and to remove slimes (30 ppm for 12 hours continuous treatment — dilution ratio of 1:60) in non-potable water systems. The product may also be used to re-treat ice-making machines. This product may be used to re-treat ice-making machines. This product may be used to re-treat ice-making machines.

**CANNING RETORT AND PASTEURIZER COOLING WATER**

All tanks, tunnels, conveyor chains, heat exchangers, heat exchange towers, lines, spray bars and nozzles should be thoroughly cleaned, when possible, and completely rinsed using clean, potable water prior to treatment. Add CHEMTREAT CL-3000 to water systems, including the cooling or warming tanks or spray systems, towers, lines and all water containing parts of the system using a chemical feed pump. Use chemically treated end use water as a pre-flush, pre-soak, or pre-scrape treatment. The diluted CHEMTREAT CL-3000 may be irritating if inhaled. For spraying operations, user must wear a half-face respirator with acid gas cartridge and N95 filter. Treat as required. Always apply freshly prepared CHEMTREAT CL-3000. DO NOT reuse solution.

**STAINLESS STEEL TRANSFER LINES, HYDROCOOLERS AND PASTEURIZERS**

Clean equipment or line thoroughly using a suitable detergent followed by a clean, potable water rinse before treatment. Add CHEMTREAT CL-3000 to potable make up water at a dose of 20 ppm chlorine dioxide (dilution ratio of 1:150) for each ten gallons of volume in lines and/or equipment. Mix and fill lines and equipment overnight. Drain and allow to air dry just prior to next run start-up.

**PROCESS WATER FOR VEGETABLE RINSES, TANKS AND LINES**

All tanks, lines and equipment must be thoroughly cleaned with a suitable detergent and completely rinsed using clean, potable water prior to treatment. Chill tanks or vegetable rinse tanks may be batch loaded at start-up with a maximum dose of 5 ppm chlorine dioxide (dilution ratio of 1:600 or 1 gallon CHEMTREAT CL-3000 per 600 gallons water) for use on raw agricultural commodities. Make-up waters should be tested using a chemical feed pump or injector system and applied at the same rate per 25 gallons of potable water. Fresh CHEMTREAT CL-3000 should be used daily. For fruit and vegetables that will be processed (i.e. chopped, sliced, peeled, cooked, canned, pasteurized, homogenized, frozen, etc.) the residual chlorine dioxide concentration is not to exceed 3.0 ppm (dilution ratio of 1:1000) and not less than 0.3 ppm. This product is effective against Klebsiella terrigena, Poliovirus and Rotavirus. Note: Chemical feed pumps and injectors must be chlorine resistant for best operation. Available chlorine dioxide levels should be confirmed using an approved chlorine dioxide test kit.

**TREATMENT TO EXTEND FRESHNESS AND SHELF LIFE OF UNCUT AND UNEPELED FRUITS AND VEGETABLES**

1) Before treatment, whole fruits and vegetables should be washed and thoroughly rinsed with clean, potable water, 2) Add CHEMTREAT CL-3000 to water in an immersion tank or sink to achieve a residual of between 0.5 and 3 ppm chlorine dioxide, 3) Immerse the previously cleaned fruit and vegetables and allow them to soak for at least 1 minute. A potable water rinse is not required.

**INDUSTRIAL PROCESSES AND WATER SYSTEMS**

**TREATMENT OF COOLING WATER SYSTEMS, PROCESS WATER SYSTEMS, FLUME WATERS AND COOLING TOWERS TO CONTROL SLIME-FORMING ALGAE**

Add CHEMTREAT CL-3000 to the water at a dose of 50 ppm (50 mg/liter) chlorine dioxide (a dilution ratio 1:60), and circulate or let stand overnight. Drain and rinse with clean water before re-use. To prevent slime growth after initial
treatment, add CHEMTREAT CL-3000 to the water at a dose of 2.0 to 5.0 ppm (2.0 to 5.0 mg/liter) chlorine dioxide (a dilution ratio of 1:1500 to 1:600). 2.5 ppm dose may be fed intermittently or continuously.

TREATMENT OF REVERSE OSMOSIS, NANOFLTRATION, AND ULTRAFILTRATION MEMBRANES TO CONTROL SLIME-FORMING ALGAE

Using typical oxidizing agents on these membranes can cause irreparable damage due to the presence of free chlorine. However, testing has shown total chlorine content of CHEMTREAT CL-3000 is less than 10 ppm, thus it is possible to use diluted CHEMTREAT CL-3000 upstream of the membrane without damaging the membrane. Depending on the quality of the water, continuous dosage rates between 0.1 PPM and 0.5 PPM of CHEMTREAT CL-3000 will be sufficient to prevent biofilm fouling of the membrane. A dosage rate above 0.5 PPM may adversely affect the membrane due to the oxidation strength of CHEMTREAT CL-3000. The variation depends on the feed water composition and the amount of organic material present in the feed water. The appropriate dosage rate must be determined by laboratory testing. Caution: the dosage rate of CHEMTREAT CL-3000 should never exceed a level of 0.5 PPM and should always be a minimum of 0.1 PPM. While using CHEMTREAT CL-3000 there will be no increase in the amount of salts passing through an RO membrane. This is a valid indicator that the membrane is not damaged. An automatic sensor should be used to regulate the CHEMTREAT CL-3000 level in the system. Either a chlorine dioxide sensor or potentiostatic analyzer with the ability to measure in the level of sub-part per million should be used. To avoid damage to the membrane, the dosing system to inject CHEMTREAT CL-3000 into the feed water should be controlled by the monitoring sensor and should automatically stop dosing if levels exceed the maximum levels. Appropriate testing by the customer is recommended. CHEMTREAT CL-3000 can be used in the permeate for normal disinfection control and replace existing disinfectants (e.g. chlorine). Follow label directions for either portable or non-portable water.

Care should be used when using CHEMTREAT CL-3000 on cellulose-based membranes. Be sure to always use a very dilute solution. Never use undiluted CHEMTREAT CL-3000 solution. CHEMTREAT CL-3000 should never be used with Ion Exchange resin or EDI membrane system. This product is not for kidney dialysis equipment.

NOTE: Do not add CHEMTREAT CL-3000 in the presence of sodium bisulfite or any other reducing agent which may be added to the feedwater to avoid neutralization of the active ingredient.

FOR MICROBIAL CONTROL IN SWEETWATER COOLING SYSTEMS:
CHEMTREAT CL-3000 may be batch loaded or metered into sweetwater cooling systems at the rate of 3.0 ppm (3.0 mg/l), a dilution ratio of 1:1000. Concentrations should be monitored to maintain the 3 ppm dose.

TREATMENT OF INDUSTRIAL AIR WASHERS, HUMIDIFIERS, AND EVAPORATIVE COOLERS:
CHEMTREAT CL-3000 should be added to the air washer sump with the use of a metering pump. CHEMTREAT CL-3000 can be added on a continuous basis or intermittently as necessary to maintain control. For the control of bacteria and fungi that cause fouling in industrial air washer systems add at a rate of 1 - 5 ppm (1 - 5 mg/l), a dilution ratio of 1:3000 to 1:600.

NOTE: For use only in industrial air washer systems that maintain effective mist eliminating components.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Keep containers tightly closed when not in use. Store in original container in a dark, dry place away from extremes of heat or freezing conditions. Do not store with easily oxidizable materials, acids, bases, or combustible materials.

This product is to be used as directed within 9 months of the manufacture date indicated on the front panel of this label.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of pesticide, prepared solutions, or rinsate is a violation of Federal law. If wastes cannot be disposed of according to label directions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative of your nearest EPA Regional Office for guidance.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over on its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling, or puncture and dispose of in a sanitary landfill or by incineration, or if allowed by local and State authorities, by burning. If burned, stay out of smoke.

REV 09/2016

CONDITIONS OF SALE AND WARRANTY

Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use. TO THE EXTENT PERMITTED BY LAW, SELLER DOES NOT MAKE ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS FOR ANY PARTICULAR PURPOSE OR OF MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. THIS WARRANTY DOES NOT EXTEND TO, AND THE BUYER SHALL BE SOLELY RESPONSIBLE FOR, ANY AND ALL LOSS OR DAMAGE WHICH RESULTS FROM THE USE OF THIS PRODUCT IN ANY MANNER WHICH IS INCONSISTENT WITH THE LABEL DIRECTIONS. Seller offers this product, and the Buyer accepts it, subject to the foregoing Conditions of Sale and Warranty. Seller is not authorized to vary or exceed the terms of this Warranty in any manner;
CHEMTREAT CL-3000

This product is intended for the Treatment of Industrial Process Water, Food Processing Water, and Process Waters and, of Control of Slime in Cooling Towers.

KEEP OUT OF REACH OF CHILDREN

CAUTION

ACTIVE INGREDIENTS

CHEMTREAT CL-3000..............................30%

OTHER INGREDIENTS....................................70%

TOTAL:........................................100.00%

CHEMTREAT CL-3000 contains 3000 ppm (3000 mg/l) chlorine dioxide (available chlorine 0.85%).

FIRST AID

IF ON SKIN OR CLOTHING

- Remove contaminated clothing and shoes. Expose skin immediately with plenty of water for 15 to 20 minutes.

- Call a poison control center or doctor immediately for treatment advice.

IF SWALLOWED

- Call a poison control center or doctor immediately for treatment advice.

- Do not induce vomiting unless told to do so by the poison control center or doctor.

- Do not give anything by mouth to an unconscious person.

IF IN EYES

- Hold open eye and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

- Call a poison control center or doctor immediately for treatment advice.

NOTE TO PHYSICIAN

Possible mucosal damage may contaminate the use of gastric lavage.

HOTLINE NUMBERS

For chemical spill information, call CHEMTRE...1-800-242-9300

For emergency medical assistance, call Poison...1-800-588-7578

See insert booklet for additional precautionary statements and directions for use.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Caution: Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Harmful if swallowed, absorbed through the skin, or inhaled. Wash thoroughly with soap and water after handling, and before eating, drinking, or smoking. Wash hands after handling.

Environmental Hazards

This product is toxic to fish and aquatic organisms. Do not discharge this containing this product into lakes, streams, ponds, estuaries, or other waters unless in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) and/or the permitting authority has been notified in writing prior to discharge. Do not discharge containing this product to sewers without previous notification to the local sewage-treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

Physical and Chemical Hazards

Chlorine dioxide is a strong oxidizing agent. Contamination with materials such as acids, chlorine, and organic chemicals may cause a chemical reaction resulting in evolution of chlorine gas, other toxic gases, and/or fire could result. Keep all chemicals and foreign material away from this solution. Do NOThores.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Carefully read and follow the instructions for the CHEMTREAT CL-3000 treatment device provided by the manufacturer for proper application. This product is intended for use in industrial equipment. Non-food contact surfaces to hard, non-porous surfaces, thoroughly wetting surfaces with a cloth, mop, sponge, or sprayer, and allow to air dry. For spraying operations, user must wear a full-face respirator with at least a P-100 respirator rating, safety glasses, and N-95 or higher particulate respirator. Do not use on cellulose-based membranes. Be sure to always wear a rubber glove or rubber glove and hand protectors when using CHEMTREAT CL-3000 on cellulose-based membranes. Be sure to always wear a rubber glove or rubber glove and hand protectors when using CHEMTREAT CL-3000 on cellulose-based membranes.

This product can be used to control microbial contamination, slime and odor in food processing waters and to sanitize the treatment of industrial air washers, humidifiers, and evaporative coolers. CHEMTREAT CL-3000 may be added to the air washer spray water to achieve a residual of between 0.5 and 3 ppm chlorine dioxide. CHEMTREAT CL-3000 can be used in the permeate for normal disinfection control and replace existing disinfectants (e.g., chlorine). Follow label directions for either potable or non-potable water.
