Based on the information provided, the product is intended to be used in water treatment systems for microbiocide purposes. It is crucial to follow the directions for use carefully to ensure safety and effectiveness. The product can be used to control bacteria and reduce the potential for biofouling in various industrial water systems, such as cooling systems, reverse osmosis systems, and wastewater treatment plants. It is recommended to consult the EPA, state, and local authorities for proper disposal instructions, especially concerning the secondary container. The:DOW CHEMICAL COMPANY

**PRODUCT INFORMATION**

**Active Ingredients:**
2,2-Dibromo-3-nitrilopropionamide 20%
Inert Ingredient(s): 80%

**Recommended Use:**
This product is intended for use in industrial water systems to control bacteria and prevent biofouling.

**Storage and Disposal:**
- Store at temperatures below 35°C (95°F) to maintain product quality.
- Keep out of reach of children.
- DISPOSAL: Contact your State Water Board or Regional EPA for information.

**Personal Protective Equipment:**
- goggles
- impervious gloves
- long-sleeved shirt
- long pants
- coveralls
- chemical-resistant boots and gloves

**Engineering Controls:**
- local exhaust ventilation

**USER SAFETY INFORMATION:**
- Observe local, state, and federal regulations and Codes of Practice.
- Observe all applicable OSHA, EPA, and other state and local regulations.

**NOT FOR FOOD USE:**
- Not for food, animal, or feed use.
- Not for use as a co-treatment with chlorine.
- May contain dominate bacteria.
- May cause allergic reactions.

**IN CASE OF AN EMERGENCY:**
- Call a poison control center or doctor immediately for emergency treatment.
- Treat symptoms appropriately.
- Observe all applicable OSHA, EPA, and other state and local regulations.

**EMERGENCY OR INDUSTRIAL COOLING WATER SYSTEMS:**
- Not for use in industrial cooling systems.
- Use in cooling or industrial cooling water systems as either continuous or slug dosing.
- Apply the product to the system after all other additions in order to avoid decomposition of the active ingredient due to high pH conditions.

**INDUSTRIAL OR COMMERCIAL COOLING WATER SYSTEMS:**
- Not for use in industrial cooling systems.
- Use in industrial cooling water systems as either continuous or slug dosing.
- Apply the product to the system after all other additions in order to avoid decomposition of the active ingredient due to high pH conditions.

**APPLICATIONS:**
- Cooling systems
- Industrial cooling systems
- Reverse osmosis systems
- Wastewater treatment systems
- Bioreactors
- Photobioreactors

**NOTES:**
- Keep the secondary container in a location that will ensure uniform distribution of AQUCAR DB 20 Water Treatment Microbiocide in the mass of fiber and water after handling and after before eating, drinking, chewing gum, using the toilet or using tobacco. Remove and discard all contaminated clothes separately before reuse.

**NOTES:**

**CONTACT INFORMATION:**
- DOW Chemical Company
- 9164 Fairview Road
- Midland, Michigan 48640
- 989-636-4400
- Fax: 989-636-4480

**RECOMMENDED USES:**
- For industrial cooling systems.
- For industrial cooling water systems.
- For reverse osmosis systems.
- For wastewater treatment systems.

**NOTES:**
- The product is safe for use in drinking water systems.
- The product does not react with chlorine.
