AQUACAR™ 742 Water Treatment Microbiocide

A highly effective microbiocide for use in controlling bacteria in systems that contain cooling water and other water-based systems including cooling water systems and water-based systems used in conjunction with wastewater treatment systems and water treatment systems. AQUACAR 742 Water Treatment Microbiocide is a microbicidal agent that effectively controls the growth of aerobic and anaerobic bacteria in water systems. It is designed to provide long-term control of bacterial growth in water systems such as cooling systems, condensate return systems, and other water-based systems. AQUACAR 742 Water Treatment Microbiocide is a liquid formulation of ethylene glycol and water. It is effective at temperatures as low as 0°F (-18°C) and as high as 140°F (60°C).

Active Ingredients:
- Glutaraldehyde (42.5%)
- Alkyl (C14-16) (40.0%)
- C12 (5.0%)
- Dimethyl amine (5.0%)
- Ammonium nitrate (10.0%)

Total: 100.0%

DIRECTIONS FOR USE

Use AQUACAR 742 Water Treatment Microbiocide in accordance with the instructions on the label. It is a water-based solution and is designed for use in water systems. It is effective against a wide range of bacteria, including those found in cooling systems, condensate return systems, and other water-based systems. AQUACAR 742 Water Treatment Microbiocide is not recommended for use in food contact systems. It is designed for use in systems that are not food contact systems. AQUACAR 742 Water Treatment Microbiocide is a liquid formulation of ethylene glycol and water. It is effective at temperatures as low as 0°F (-18°C) and as high as 140°F (60°C).

Manufacturers Warning: AQUACAR 742 Water Treatment Microbiocide is not a disinfectant and should not be used as such. It is not intended for use as a disinfectant in water systems. AQUACAR 742 Water Treatment Microbiocide is a water-based solution and is designed for use in water systems. It is effective against a wide range of bacteria, including those found in cooling systems, condensate return systems, and other water-based systems. AQUACAR 742 Water Treatment Microbiocide is a liquid formulation of ethylene glycol and water. It is effective at temperatures as low as 0°F (-18°C) and as high as 140°F (60°C).
