MCP AMINE 4
FOR BROADLEAF WEED CONTROL IN ALFALFA, CLOVER, FLAX, GRASSLAND, PEAS, SMALL GRAINS, AND NON-CROP AREAS.

ACTIVE INGREDIENT:
2-Methyl-4-chlorophenoxyacetic acid, dimethylamine salt .......................................................... 52.0%
OTHER INGREDIENTS: ...................................................................................................................... 48.0%
TOTAL 100.0%

*Equivalent to 42.5% 2-Methyl-4-chlorophenoxyacetic acid or 4.0 pounds acid equivalent per gallon.

INTENDED ONLY FOR SALE TO, USE AND STORAGE BY AGRICULTURAL PERSONNEL OR COMMERCIAL APPLICATORS.

KEEP OUT OF REACH OF CHILDREN
DANGER—PELIGRO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)
Corrosive. Causes irreversible eye damage. Do not get in eyes or on clothing. Harmful if swallowed, inhaled or absorbed through skin. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. See First Aid on Page 2.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS—PELIGRO

Corrosive. Causes irreversible eye damage. Do not get in eyes or on clothing. Harmful if swallowed, inhaled or absorbed through skin. Prolonged or frequent repeated skin contact may cause allergic reactions in some individuals.

Personal Protective Equipment:

Some materials that are chemical-resistant to this product are any waterproof material. If you want more options, follow the instructions for category “A” on an EPA chemical-resistant category selection chart.

Makers, loaders, applicators, flaggers and other handlers must wear:

• Long-sleeved shirt and long pants.
• Protective eyewear.
• Shoes plus socks.
• Chemical-resistant gloves made of any waterproof materials which meet the requirements of EPA selection Category A, when mixing, loading, or using any hand-held equipment.

Additional PPE requirements for mixers and loaders supporting aerial application to rangelands, pasture lands, or non-crop land. These mixers/loaders must also wear a chemical-resistant apron and must wear a National Institute for Occupational Safety and Health (NIOSH) approved half-mask respirator equipped with any N, R, P or HE series particulate air filters and has the approval number prefix (84A-XXX).

It is recommended that you require that respirator wearers be fit tested, and trained in the proper use, care, cleaning, inspection, and storage of the respirator. Refer to the Occupational Safety and Health Administration (OSHA) standard on respiratory protection (29 CFR 1910.134) for additional information.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

See engineering controls for additional requirements.

Engineering controls:

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets with requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

Pilots must use an enclosed cockpit that meets the requirements listed in the WPS for agricultural pesticides [40 CFR 170.240 (d)(6)].

For a Medical Emergency Involving This Product Call:

1-866-944-8565.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Note to Physicians - Probable mucosal damage may contra-indicate the use of gastric lavage.

USER SAFETY RECOMMENDATIONS

Users should:

• Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide may be toxic to fish, aquatic invertebrates and aquatic plants. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may affect non-target plants and be hazardous to aquatic organisms in water adjacent to treated areas. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours. Do not contaminate water when disposing of equipment wash waters or rinsate.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Groundwater Contamination:

Most cases of groundwater contamination involving phenoxy herbicides such as MCPA have been associated with mixing/loading and disposal sites. Caution
should be exercised when handling MCPA pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

Cleaning of Equipment: When cleaning equipment, do not pour washwater on the ground, spray or drain over a large area away from wells and other water sources.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Keep people and pets out of the area during application. Do not allow people or pets to enter the area until sprays have dried.

For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance.

It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls,
- Chemical-resistant gloves made of any waterproof material,
- Shoes plus socks,
- Protective eyewear.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not allow people (other than applicator) or pets on treatment area during application.

Do not enter or allow others to enter treated areas until sprays have dried.

PRODUCT INFORMATION
This product is an amine salt formulation of MCP (2-Methyl-4-chlorophenoxyacetic acid), a selective herbicide similar to 2,4-D. Certain crops, such as flax, oats, and rice appear to be more tolerant of MCP than 2,4-D, and some weeds such as mustard and Canada thistle are more easily controlled by MCP than 2,4-D.

Generally, the lower dosages listed will be satisfactory for young, succulent growth of sensitive weed species. For less sensitive species and under conditions where control is more difficult, the higher dosages will be needed. Use moderate spray pressure (20.0 pounds) and enough spray volume for good coverage, usually 5.0 to 20.0 gallons per acre by ground equipment and at least 2.0 to 5.0 gallons per acre by air. Higher spray volumes may be useful in some situations to provide better spray coverage of weed foliage and to reduce spray drift. The use of adjuvants such as wetting agents may increase herbicidal effectiveness but may also decrease selectivity.

Agitation is helpful to assure uniform mixing, but is not necessary after the product has been completely dispersed. Use of this product may be governed in certain areas by local regulations. MCP produces best results when applied to weeds growing rapidly. Thorough coverage is important. Lack of moisture may cause less effective control. Some perennial weeds may require repeat treatment for control. Treat such weeds at bud stage if this occurs during a period when crop is not unduly susceptible.

RESTRICTIONS
• DO NOT apply this product through any type of irrigation system.
• Extreme care must be used when applying MCP to prevent injuring desirable plants and crops.
• MCP must not be applied in the vicinity of susceptible crops such as cotton, tomatoes, vegetables, grapes, fruit trees, soybeans, tobacco and beans.
• MCP must not be applied in water bodies containing beneficial organisms such as fish or shellfish. Avoid spraying in shallow water bodies where this product may enter and contaminate groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.
• Do NOT allow spray mist to drift on to such plants, since even minute quantities of spray may cause severe injury.
• Do NOT use in greenhouses.
• Do NOT use in any manner other than recommended on the label to avoid possible crop injury or illegal residues at harvest.
• Read and carefully observe the cautionary statements and all other information appearing on labeling of all products used in mixtures.
• Do NOT contaminate water used for irrigation, domestic or spray purposes.
• Do NOT contaminate seed, feed, foodstuffs, fertilizers, insecticides or fungicides.

PRECAUTIONS
• Large amounts of MCP in the soil may temporarily inhibit seed germination.
• It is best to use a separate sprayer for application of MCP herbicides. If the same sprayer must be used for other crop spraying, it must be flushed thoroughly with water immediately after use. Next, fill equipment with water containing 1.0 volume of household ammonia to 100 volumes of water, and allow to stand for 1 day. Then flush equipment thoroughly, including hoses and nozzles, several times with water.

SPRAY DRIFT MANAGEMENT
Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment- and weather-related factors determine the potential for spray drift. The applicator and the grower are responsible for considering all these factors when making decisions.
Apply only as a medium or coarser spray (ASAE standard 572) or a volume mean

diameter of 300 microns or greater for spinning atomizer nozzles.

Apply only when the wind speed is 2 to 10 mph at the application site.

For groundboom applications, do not apply with a nozzle height greater than 4

feet above the crop canopy.

Aerial Applications: The boom length must not exceed 75% of the wingspan or

90% of the rotor blade diameter.

Release spray at the lowest height consistent with efficacy and flight safety. Do

not release spray at a height greater than 10 feet above the crop canopy.

When applications are made with a crosswind, the swath will be displaced down-

wind. The applicator must compensate for this displacement at the downwind

edge of the application area by adjusting the path of the aircraft upwind.

Do not make applications into temperature inversions.

PREPARING THE SPRAY: Mix MCP Amine 4 with water, unless otherwise direct-

ed on this label. Fill the mixing tank or spray tank about half full with water, then

add the required amount of this product with agitation. NOTE: Adding oil, wetting

agent or other surfactant to the spray may reduce selectivity to crops, possibly

resulting in crop injury.

SOME WEEDS CONTROLLED BY MCP

Barberrry Croton Mustards Stinkweed

Beggartick Daisy Peppersweed Sunflower

Buckhorn Dandelion Pigweed Tie vine

Bushclover Dock Plantain Water plantain

Burscucumber Galinsoga Prickly lettuce White top or

Burdock Goatsbeard Pennycress Hoary cress

Chickweed Lambsquarter purs

Cocklebur Marsh elder Sickled

WEED CONTROL IN ESTABLISHED ALFAlA

Weeds Amount/Directions

For control of

Yellow rocket and

other susceptible

broadleaf weeds

such as Pennycress

or Fanweed.

Restrictions

• DO NOT apply more than 1.0 pint of this product (0.5 pound acid equivalent)

• per acre per application.

• DO NOT forage or graze meat animals on treated areas within 7 days of slaughter.

• DO NOT forage or graze dairy animals on treated areas within 7 days after treatment.

Precautions

• Do not apply MCP Amine 4 in the Pacific Northwest.

• DO NOT forage or graze meat animals on treated areas within 7 days of slaughter.

• DO NOT forage or graze dairy animals on treated areas within 7 days after treatment.

Precautions

• Temperature at spraying should be above 40 °F.

• Stem twisting will show up for a short time after application. Some growth

reduction may occur.

FLAX

Weeds Amount/Directions

Broadleaf weeds Apply 0.25 to 0.5 pt

of this product (0.125 to 0.25 lb AE)

Apply by ground sprayer or by

airplane. Use sufficient water to

give uniform and adequate

coverage. Apply only when weeds

are up and when flax is 4 to 8

inches high and before it comes

into bud.

Restrictions

• DO NOT apply more than 0.5 pint of this product (0.25 pound acid equivalent)

per acre per year.

• DO NOT forage or graze meat animals on treated areas within 7 days of slaughter.

• DO NOT forage or graze dairy animals on treated areas within 7 days after treatment.

Precautions

• Treatment after early bud stage may result in severe damage.

</tbody>
</table>

**Restrictions**

• ONLY FOR USE IN THE PACIFIC NORTHWEST.
• Use on peas to control susceptible weeds only where recommended by local agricultural Extension Service or Experiment Station specialists.
• DO NOT apply if peas are taller than 7 inches or when they are stressed for lack of soil moisture.
• DO NOT apply when temperatures are over 90 °F.
• Preharvest interval (PHI) is 3 days.
• DO NOT apply more than 0.75 pint of this product (0.375 pound acid equivalent) per acre per application. |
• DO NOT forage or graze meat animals on treated areas within 7 days of slaughter. |
• DO NOT forage or graze dairy animals on treated areas within 7 days after treatment. |

**Precautions**

• MCP can cause injury and delayed maturity in the pea crop. |
• Higher rates may be used to improve control of difficult weeds but crop injury is more likely to occur. |
CONTROL OF WHITEBRUSH ON RANGELAND

Whitebrush  Apply 3.0 pt of this product (1.5 lb AE) with enough water for good spray coverage, usually 6.0 to 10.0 gal/A by aircraft. First mix this product in the water, then add the oil with agitation. Apply in spring or fall when plant foliage is well developed and actively growing. Spraying during bloom is recommended but not immediately after shedding of blossoms. Retreatments may be needed in succeeding years.

Restrictions
• DO NOT apply more than 3.0 pints of this product (1.5 pounds acid equivalent) per acre per application.
• DO NOT apply more than 2 applications per year.
• Minimum interval of 21 days between applications.
• DO NOT forage or graze meat animals on treated areas within 7 days of slaughter.
• DO NOT forage or graze dairy animals on treated areas within 7 days after treatment.

Precautions
• Spray should be kept agitated during spraying to avoid separation in the tank.
• DO NOT use where legumes are present unless injury to them can be tolerated.

SMALL GRAINS (Barley, Oats, Rye, Triticale and Wheat) Underseeded with Alfalfa, Bird's-foot, Lespedeza, Red and White Clover, Trefoil

Weeds    Amount/A  Directions
Susceptible broadleaf weeds  Apply 0.5 to 1.0 pt of this product (0.25 to 0.5 lb AE) as a water mix spray by ground sprayer or airplane.

Less susceptible weeds  Apply up to 1.5 pt of this product (0.75 lb AE) as a water mix spray by ground sprayer or airplane.

Restrictions
• DO NOT apply more than 1.5 pints of this product (0.75 pound acid equivalent) per acre per year.
• DO NOT forage or graze meat animals on treated areas within 7 days of slaughter.
• DO NOT forage or graze dairy animals on treated areas within 7 days after treatment.

Precautions
• For small grains underseeded with legumes, see the following section.

NON-CROP SPRAYING: (In Non-Crop Areas: Fence Rows, Rights-of-Way, Road-sides)

Canada thistle, White top and Meadow buttercup, European barberry, other more difficult to control weeds:

Broadcast treatment  Apply up to 3.0 pt of this product (1.5 lb AE) in sufficient water to give coverage.

Spot treatment  Apply 0.25 pt of this product (0.125 lb AE) for more extensive areas.

Restrictions
• DO NOT forage or graze meat animals on treated areas within 7 days of slaughter.

Precautions
• DO NOT forage or graze dairy animals on treated areas within 7 days after treatment.

Broadcast Treatment
- DO NOT apply more than 3.0 pints of this product (1.5 pounds acid equivalent) per acre per application.
- DO NOT make more than 2 applications per year.
- Minimum interval of 21 days between applications.

Spot Treatment
- DO NOT apply more than 6 pints of this product (3.0 pounds acid equivalent) per acre per year.
- Minimum interval of 21 days between applications.

Precautions
- Local conditions may affect use of this chemical. Consult State agricultural extension or Experiment Station weed specialists for specific recommendations for local weed problems and for information on possible lower dosages.

Storage & Disposal cont’d.

For later use or disposal, insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

For 30 gal drums: Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Repeat this procedure two more times. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinseate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

For refillable containers: Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinseate into application equipment or rinseate collection system. Repeat this rinsing procedure two more times.

For help with any spill, leak, fire or exposure involving this material, call day or night CHEMTREC – 1-800-424-9300.

Conditions of Sale and Limitation of Warranty and Liability

Before Buying or Using This Product, read the entire Directions for Use and the following Conditions of Sale and Limitation of Warranty and Liability. By buying or using this product, the buyer or user accepts the following Conditions of Sale and Limitation of Warranty and Liability, which no employee or agent of LOVELAND PRODUCTS, INC. or the seller is authorized to vary in any way.

Follow the Directions for Use of this product carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop or other plant injury, ineffectiveness, or other unintended consequences may result from such risks as weather or crop conditions, mixture with other chemicals not specifically identified in this product’s label, or use of this product contrary to the label instructions, all of which are beyond the control of LOVELAND PRODUCTS, INC. and the seller. The buyer or user of this product assumes all such inherent risks.

Subject to the foregoing inherent risks, LOVELAND PRODUCTS, INC. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use when the product is used in strict accordance with such Directions for Use under normal conditions of use. EXCEPT AS WARRANTED IN THIS LABEL AND TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THIS PRODUCT IS SOLD "AS IS," AND LOVELAND PRODUCTS, INC. MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED,
INCLUDING BUT NOT LIMITED TO MERCHANTABILITY, FITNESS FOR A PARTICU-
LAR PURPOSE, OR ELIGIBILITY OF THIS PRODUCT FOR ANY PARTICULAR 
TRADE USAGE.

IN THE UNLIKELY EVENT THAT BUYER OR USER BELIEVES THAT LOVELAND 
PRODUCTS, INC. HAS BREACHED A WARRANTY CONTAINED IN THIS LABEL 
AND TO THE EXTENT REQUIRED BY APPLICABLE LAW, BUYER OR USER MUST 
SEND WRITTEN NOTICE OF ITS CLAIM TO THE FOLLOWING ADDRESS: LOVE-
LAND PRODUCTS, INC., ATTENTION: LAW DEPARTMENT, P.O. BOX 1286, GREE-
LEY, CO 80632-1286.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE BUYER’S OR 
USER’S EXCLUSIVE REMEDY FOR ANY INJURY, LOSS, OR DAMAGE RESULT-
ING FROM THE HANDLING OR USE OF THIS PRODUCT, INCLUDING BUT NOT 
LIMITED TO CLAIMS OF BREACH OF WARRANTY OR CONTRACT, NEGLIGENCE, 
STRIC T LIABILITY, OR OTHER TORTS, SHALL BE LIMITED TO ONE OF THE FOL-
LOWING, AT THE ELECTIO N OF LOVELAND PRODUCTS, INC. OR THE SELLER: 
DIRECT DAMAGES NOT EXCEEDING THE PURCHASE PRICE OF THE PRODUCT 
OR REPLACEMENT OF THE PRODUCT. TO THE EXTENT CONSISTENT WITH 
APPLICABLE LAW, LOVELAND PRODUCTS, INC. AND THE SELLER SHALL NOT 
BE LIABLE TO THE BUYER OR USER OF THIS PRODUCT FOR ANY CONSE-
QUENTIAL, SPECIAL, OR INDIRECT DAMAGES, OR DAMAGES IN THE NATURE 
OF A PENALTY.
