Open one foil pouch and remove applicator.

Step 1. Hold in upright position away from your face and snap tip open by bending it and folding it back on itself.
Step 2. Part the hair and place applicator tip against the skin at the base of skull. Applying the product at the base of the skull will help prevent the cat from licking the product.
Step 3 Apply entire contents of tube evenly to four spots on the back from between the shoulder blades to the base of the tail. At each spot, part the hair until skin is visible. Place the tip of the applicator on the skin and gently squeeze a portion of the solution on the skin. Do not apply an excessive amount of solution at any one spot which could cause some of the solution to run off the side of the dog. Avoid run off of product. Avoid contact with treated areas until dry.
