COPPER NAPHTHENTHATE CONCENTRATE

**Kills**
- Subterranean termites, drywood termites, wood destroying beetles, powderpost beetles, Carpenter ants and dry decay fungi.
- Controls **Synthetic Carbonyl Acids**
- Protects from **100% Copper Based Metal** and by-products from the refining industry

**Non-Emulsifying**
- Non-Oiling
- Non-Sticking
- Non-Carding to Utility Hardware (Railroad Spikes and Tie Plates)

**Storage and Disposal**
- Copper Naphthenate Concentrate is suitable as a feed additive for use in the treatment of copper sulfate residues in feed stuffs. Application depends on the specific processing requirements and the desired performance characteristics.

**Application Precautions**
- To the user or individual, no special knowledge of the product is required.
- The product is not harmful to humans, animals, plants, or the environment.
- The product is compatible with many substances, including water, oil, and other non-polar solvents.
- The product is not flammable.

**Disclaimer**
- The information provided is for general guidance only and does not constitute a warranty or representation of any kind.
- The user is responsible for determining the suitability of the product for their specific application.

**Health Consideration**
- Copper Naphthenate Concentrate is classified as safe for human consumption when used as directed.

**Storage and Disposal**
- Copper Naphthenate Concentrate should be stored in a cool, dry, and well-ventilated area.
- Excess material should be disposed of according to local regulations.
- The product is not harmful to the environment and can be disposed of in a landfill.

**Technical Support**
- For technical support or product information, contact the manufacturer directly.

**Application Precautions**
- The product is not harmful to humans, animals, plants, or the environment.
- The product is not flammable.

**Disclaimer**
- The information provided is for general guidance only and does not constitute a warranty or representation of any kind.
- The user is responsible for determining the suitability of the product for their specific application.

**Stability**
- Copper Naphthenate Concentrate is stable for at least 12 months when stored in a cool, dry, and well-ventilated area.
- The product is not harmful to the environment and can be disposed of in a landfill.

**Storage and Disposal**
- Copper Naphthenate Concentrate is suitable for use in agricultural and industrial applications.
- The product is not harmful to the environment and can be disposed of in a landfill.

**Technical Support**
- For technical support or product information, contact the manufacturer directly.

**Application Precautions**
- The product is not harmful to humans, animals, plants, or the environment.
- The product is not flammable.

**Disclaimer**
- The information provided is for general guidance only and does not constitute a warranty or representation of any kind.
- The user is responsible for determining the suitability of the product for their specific application.

**Stability**
- Copper Naphthenate Concentrate is stable for at least 12 months when stored in a cool, dry, and well-ventilated area.
- The product is not harmful to the environment and can be disposed of in a landfill.
