MAYOSPERSE 7700-15

ACTIVE INGREDIENT:
Poly (octamethyleneimino)ethyleneimino)chloride) ........................................... 15.0%

INERT INGREDIENTS: .............................. 85.0%

TOTAL: .................................................. 100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

FIRST AID

If in Eyes:
Hold eye open and rinse slowly and gently with water for 15-20 minutes.
Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
Call a poison control center or doctor for further treatment advice.

If on Skin:
Take off contaminated clothing.
Rinse skin immediately with plenty of water for 15-20 minutes.
Call a poison control center or doctor for further treatment advice.

If Swallowed:
Call poison control center or doctor immediately for treatment advice.
Have person sip a glass of water, if able to swallow.
Do not induce vomiting unless told to do so by the poison control center or doctor.
Do not give anything by mouth to an unconscious person.

If Inhaled:
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible.
Call a poison control center or doctor for further treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a Poison Control Center or doctor for treatment.

IN CASE OF EMERGENCY ENDANGERING LIFE OR PROPERTY, CALL: 800-424-9300

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if Swallowed, absorbed through the skin, or inhaled. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Avoid breathing vapors. Wash thoroughly with soap and water after handling and before eating, drinking, and chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds or estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharging. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

Manufactured by:
Compass Chemical International, LLC
5544 Oakdale Road
Smyrna, GA 30082
404-996-6711
EPA Establishment No. 008574-GA-001

Net Contents: 55 gallons
EPA Reg. No. 67262-3

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Mayosperse 7700-15 is used to control the growth of algae in swimming pools, heated swimming pools, exterior whirlpools, hot tubs, and decorative fountains. It is used to control algae, bacteria, and fungi in recirculating commercial and industrial cooling water towers.

RECIRCULATING COOLING WATER TOWERS
Prior to using Mayosperse 7700-15 in recirculating cooling water towers, systems shall be cleaned to remove algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 3.9-8.8 fluid ounces of Mayosperse 7700-15 per 1000 gallons of water to provide 52-80 ppm Mayosperse 7700-15, based on the total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 0.8-8.8 fluid ounces of Mayosperse 7700-15 per 1000 gallons of water (8-80 ppm) every 2-5 days or as needed. The frequency of addition depends upon the relative amount of bleed-off and the severity of the microbiological problem. Slug additions shall be made in the cooling water tower sump.

INDUSTRIAL AIR WASHING SYSTEMS
Mayosperse 7700-15 is used to control bacteria in industrial air washing systems that maintain effective mist eliminating components. Prior to its use, systems must be cleaned to remove bacterial slime and other deposits. An initial slug dose of 13.9-22.2 fluid ounces of Mayosperse 7700-15 per 1000 gallons of water is recommended. Subsequent slug additions should be made at 0.2-2.2 fluid ounces of Mayosperse 7700-15 per 1000 gallons of water should be employed every 1-5 days, as needed. The frequency of addition depends upon the relative amount of bleed-off and severity of the bacterial problem. Slug additions may be made to the sump or to the water collection tray of the air wash system.

SWIMMING POOLS, HEATED SWIMMING POOLS, EXTERIOR WHIRLPOOLS, AND HOT BATHS
For maximum effectiveness of Mayosperse 7700-15 in swimming pools, heated swimming pools, exterior whirlpools, and hot baths, those with heavy growths of algae must be cleaned prior to using Mayosperse 7700-15. For pools having visible algae growth, add an initial dose of 44-68 fluid ounces of Mayosperse 7700-15 per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 24-44 fluid ounces of Mayosperse 7700-15 per 10,000 gallons of water. To maintain pools free of visible algae growth, subsequent additions of 6-16 fluid ounces of Mayosperse 7700-15 per 10,000 gallons of water must be made every 5-7 days after the initial treatment. Uniform distribution of Mayosperse 7700-15 throughout the water in the pool is necessary for maximum effectiveness. Mayosperse 7700-15 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Mayosperse 7700-15 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Mayosperse 7700-15 with concentrated dry or liquid chlorine products.

DECORATIVE Fountains
Mayosperse 7700-15 is used to control the growth of algae in decorative fountains. Systems containing heavy growths of algae must be manually cleaned prior to treatment. Fountains with visible algae growth require an initial dose of 4.4 fluid ounces of Mayosperse 7700-15 per 1000 gallons of water in the system. To treat a freshly cleaned and filled fountain, add 2.4 fluid ounces of Mayosperse 7700-15 per 1000 gallons of water. Maintenance dosages of 0.8-2.0 fluid ounces of Mayosperse 7700-15 per 1000 gallons of water must be added every 5-7 days as needed. Additions of Mayosperse 7700-15 should be made at a point to ensure uniform distribution throughout the system. Mayosperse 7700-15 may be used in fountains treated with chlorine chemicals, but do not mix Mayosperse 7700-15 with concentrated dry or liquid chlorine products.

PAPER MANUFACTURE
Mayosperse 7700-15 will retard microbial growth that causes degradation of cooked starch used in paper manufacture. Mayosperse 7700-15 is added at a rate of 100-1000 ppm based on the total weight of the starch and water. The treatment rate necessary to retard spoilage of the starch will vary with the extent of contamination of the make-up water and the length of storage.

NOTE: Do not use in paper and paperboard that will contact food.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL

PECTOSE STORAGE: Do not stack more than four (4) drums high. Leaking or damaged drums should be placed in over-pack drums for disposal. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

PECTOSE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonmetallic container. Do not reuse or refill. Triple rinse (or equivalent), then offer for; recycling or reconditioning, or puncture and dispose in a sanitary landfill, incineration, or, if allowed, by state and local authorities, burning. If burned, stay out of smoke.
