**STOP - READ THE LABEL BEFORE USE.**
**KEEP OUT OF REACH OF CHILDREN.**

**CAUTION**

- Maintain control with fewer applications
- Remains efficacious for up to 90 days on aggressive substrates, like high pH concrete or cement
- Better, more uniform distribution of AI particles than possible with conventional SC formulations
- Exclusive PolyZone technology creates a microscopic polymer film that protects AI from weather, precipitation, irrigation and mechanical abrasion
- Exclusive PolyZone technology binds AI to surface, and slowly releases over time to achieve extended control

**ACTIVE INGREDIENT:**
* Deltamethrin .................................................... 4.75%
**OTHER INGREDIENTS:** .................................. 95.25%
**TOTAL:** ........................................................... 100.00%
*Contains 0.42 lb deltamethrin per gallon

EPA Reg No. 432-1514

**RE  U SE .**

**D RE N.**

**Ants • Bed Bugs • Spiders**

Net Contents:
**30 Gallons (114 L)**
81769265
81740615C 140204AV2
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**
Causes moderate eye irritation. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Contact with product may result in transient tingling and reddening of the skin. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS**
This product is extremely toxic to fresh water and estuarine fish and invertebrates. Use with care when applying in areas adjacent to any body of water. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will also help in this regard.

**PHYSICAL & CHEMICAL HAZARDS**
Physical hazards include the potential for eye injury, skin irritation and respiratory irritation. Pesticides may also contribute to acute and chronic health effects in humans and wildlife such as motor, sensory and coordination difficulties, and behavioral or mental changes. To reduce potential pesticide exposure, read and follow directions carefully.

**PRECAUTIONARY STATEMENTS**

**FIRST AID**

If in eyes: Hold eyes open and rinse slowly and gently with water for 15-20 minutes.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**Note to Physician:** No specific antidote is available. Treat the patient symptomatically.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**
This product is a suspension concentrate formulation containing 0.42 lb of deltamethrin per gallon. A small volume mixing test with other products is recommended to ensure compatibility. Observe all restrictions and precautions which appear on the labels of these products.

**Environmental Hazards**
This product is designed for use on both indoors and outdoors and will provide effective control of the pests listed on this label

**For residential, industrial and institutional control of major nuisance and public health pests listed on the label.**

**Will not damage paints, plastics, fabrics or other surfaces where water alone causes no damage.**

**Controls**
- Indoor, General Household Pests
- Outdoor/Perimeter Pests
- Wood-Infesting Pests
- For list of specific insects, see inside

**Where to Apply**
- Apply where pests have been seen or found, or can be expected.
- In and around buildings and structures.
- On established landscape ornamentals around residential and commercial properties.

**Dilution Rates**
1. When 1.5 fluid ounces (45.4 milliliters) is diluted in one gallon of water, the active ingredient concentration is equivalent to 0.006% deltamethrin. Use of the 1.5 fluid ounce (0.09%) rate is recommended for severe pest infestations or when longer residual control is desired.
2. When 0.75 fluid ounce (22.7 milliliters) is diluted in one gallon of water, the active ingredient concentration is equivalent to 0.03% deltamethrin. Use of the 0.75 fluid ounce (0.03%) rate is recommended for initial or control treatments.
3. When 0.25 fluid ounce (7.5 milliliters) is diluted in one gallon of water, the active ingredient concentration is equivalent to 0.1% deltamethrin. Use of the 0.25 fluid ounce (0.01%) rate is recommended for maintenance treatments.

**Mixing Information**
This product is intended to be mixed with water and applied with hand pressurized or power operated sprayers. Shake this product well before measuring concentrate for dilution in water.

**Tank Mixing**
The product may be tank mixed with other registered pesticides unless expressly prohibited by the product label. A small volume mixing test with other products is recommended to ensure compatibility. Observe all restrictions and precautions which appear on the labels of these products.

**How to Apply**
- General surface applications, spot treatments, crack & crevice sprays, or void injections by sprays, mists, or foams.
- Foliar application to established landscape ornamentals.

**Re-Apply**
Treatments may be applied at 21-day intervals, or as necessary to maintain adequate control.

**Re-Entry**
- Avoid contact with treated surfaces until dry.
- People and pets may re-enter after the treated area is dry.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not formulate this product into other end-use products.

**INDOOR PESTS**
Indoor applications to residential buildings and structures may only be made as a spot treatment, crack and crevice applications or void (spray, mist, foam) injections. This includes schools, factories, stores, warehouses, hospitals, food processing facilities (non food/feed areas), and modes of transportation. For a list of common facilities where this product may be used, see Appendix.
Silverfish, Firebrats, Centipedes, Millipedes, Clothes Moths

How to Apply

Spots

Apply as a coarse, low pressure (do not exceed 50 psi at nozzle tip) spot or crack and crevice spray to areas that these pests normally inhabit.

Bed Bugs

Spray bed bugs and eggs directly wherever possible following site directions below. For infested mattresses, remove linens and wash before re-use. Apply to mattresses, especially tufts, folds, and edges until moist. Allow to dry before re-entering bed.

Carpet Beetles, Fleas and Ticks

A total integrated pest management program is recommended. It is suggested that infested areas be thoroughly vacuumed prior to treatment. These areas include all carpet, upholstered furniture, baseboards, and other indoor areas frequented by pets. The vacuum cleaner bag should be discarded in an outdoor trash container upon completion. Pet bedding should be cleaned or replaced.

Pet Kennels

For residual control of crawling and flying insects in and around these structures, apply as a general surface and/or crack and crevice spray. Optimal control results if facilities to be treated are clean and if the exterior perimeter is concurrently treated with this product. Apply only to areas of facility where animals are not present. Allow spray to dry before allowing re-entry of animals into treated areas. Do not apply to animal feed or watering equipment. DO NOT treat pets with this product.

Non-Food/Non-Feed Areas of Food/Feed Handling Establishments

Examples of non-food/non-feed areas include garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and storage (after packaging, canning or bottling). In such non-food/non-feed areas, this product may only be applied as spot treatments, crack & crevice sprays, or void injections (sprays, mists, or foams) where labeled insect inactive or may enter the facility.

APPLICATION FOR INDOOR PESTS

Treat areas where pests normally feed or hide, such as baseboards, corners, around water pipes, behind and under refrigerators, cabinets, sinks and stoves.

Treat entry points around water pipes, utility penetrations, windows, doors, vents and eaves.

How to Apply

Spray, Mist or Foam Crack and Crevice or Void Applications

Spray, mist or foam directly into cracks and crevices or voids where pests or their nests are present. Apply the volume of spray, mist, or foam sufficient to cover the area.

Spray. Use a low pressure system (do not exceed 50 psi at nozzle tip) with a pin-point or variable pattern nozzle to apply the spray mixture to areas such as 20 feet cracks and crevices in and around baseboards, walls, expansion joints, areas around water and sewer pipes or utility penetrations, and voids created by equipment and appliances.

Mist. Use appropriate mist generating equipment. Do not allow mist to drift out of void spaces into commonly occupied areas of structure.

Foam. Use foam to treat structural voids and control pests in walls, under slabs or other void areas. Using appropriate foam generating equipment, mix solution with manufactures specified volume of foaming agent and apply sufficient volume of foam.

When to Apply

When pests are seen or found. Treatments may be applied at 21-day intervals, or as necessary to maintain adequate control.

Restrictions

Do not apply in food/feed areas of food and feed handling establishments.

Do not apply broadcast treatments to floors or floor coverings.

Do not apply as a space spray.

Remove or tightly cover fish tanks and disconnect aerators during application.

Keep people and pets away from sites of application until treated area has dried.

When treating areas directly over your head, wear eye protection (safety glasses, goggles or face shield) and dust/mist mask or respirator.

Pantry Pest Control

To kill adult and accessible immature stages of insects such as lesser grain borers, grain weevils, flour beetles, saw-toothed grain beetles, carpet beetles, fleas and flies, gnats, midges, mosquitoes and silverfish.

APPLICATION FOR FOOD PESTS

Spot Applications

Spot Applications

Apply as a coarse, low pressure (do not exceed 50 psi at nozzle tip) spot or crack and crevice spray to areas that these pests normally inhabit.

Apply a low pressure system (do not exceed 50 psi at nozzle tip) to spot or crack and crevice spray to areas that these pests normally inhabit.

Pay particular attention to dark corners of rooms and closets; floor drains; cracks and crevices in walls; along and behind baseboards; beneath sinks, stoves, refrigerators, and cabinets; around plumbing and other utility installations; doors, windows and in attics and crawl spaces. Spot applications may be made to floor surfaces along baseboards and around air ducts. Let surfaces dry before allowing people or pets to contact surfaces.

Use appropriate mist generating equipment. Do not allow mist to drift out of void spaces into commonly occupied areas of structure.

Use foam to treat structural voids and control pests in walls, under slabs or other void areas. Using appropriate foam generating equipment, mix solution with manufactures specified volume of foaming agent and apply sufficient volume of foam.

APPLICATION FOR INDOOR PESTS

Where to Apply

Non-Food/Non-Feed Areas

Examples of non-food/non-feed areas include garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and storage (after packaging, canning or bottling). In such non-food/non-feed areas, this product may only be applied as spot treatments, crack & crevice sprays, or void injections (sprays, mists, or foams) where labeled insect inactive or may enter the facility.

APPLICATION FOR INDOOR PESTS

Optimal control results if facilities to be treated are clean and if the exterior perimeter is concurrently treated with this product. Apply only to areas of facility where animals are not present. Allow spray to dry before allowing re-entry of animals into treated areas. Do not apply to animal feed or watering equipment. DO NOT treat pets with this product.

Non-Food/Non-Feed Areas of Food/Feed Handling Establishments

Examples of non-food/non-feed areas include garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and storage (after packaging, canning or bottling). In such non-food/non-feed areas, this product may only be applied as spot treatments, crack & crevice sprays, or void injections (sprays, mists, or foams) where labeled insect inactive or may enter the facility.

APPLICATION FOR INDOOR PESTS

When to Apply

When pests are seen or found. Treatments may be applied at 21-day intervals, or as necessary to maintain adequate control.

Restrictions

Do not apply in food/feed areas of food and feed handling establishments.

Do not apply broadcast treatments to floors or floor coverings.

Do not apply as a space spray.

Treatments may be applied at 21-day intervals, or as necessary to maintain adequate control.

Do not apply as a space spray.

Do not apply broadcast treatments to floors or floor coverings.

Do not apply as a space spray.

Remove or tightly cover fish tanks and disconnect aerators during application.

Keep people and pets away from sites of application until treated area has dried.

When treating areas directly over your head, wear eye protection (safety glasses, goggles or face shield) and dust/mist mask or respirator.

Pantry Pest Control

To kill adult and accessible immature stages of insects such as lesser grain borers, grain weevils, flour beetles, saw-toothed grain beetles, carpet beetles, fleas and flies, gnats, midges, mosquitoes and silverfish.

APPLICATION FOR FOOD PESTS

Spot Applications

Spot Applications

Apply as a coarse, low pressure (do not exceed 50 psi at nozzle tip) spot or crack and crevice spray to areas that these pests normally inhabit.

Apply a low pressure system (do not exceed 50 psi at nozzle tip) to spot or crack and crevice spray to areas that these pests normally inhabit.

Pay particular attention to dark corners of rooms and closets; floor drains; cracks and crevices in walls; along and behind baseboards; beneath sinks, stoves, refrigerators, and cabinets; around plumbing and other utility installations; doors, windows and in attics and crawl spaces. In such non-food/non-feed areas, this product may only be applied as spot treatments, crack & crevice sprays, or void injections (sprays, mists, or foams) where labeled insect inactive or may enter the facility.

APPLICATION FOR INDOOR PESTS

Where to Apply

Non-Food/Non-Feed Areas

Examples of non-food/non-feed areas include garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and storage (after packaging, canning or bottling). In such non-food/non-feed areas, this product may only be applied as spot treatments, crack & crevice sprays, or void injections (sprays, mists, or foams) where labeled insect inactive or may enter the facility.

APPLICATION FOR INDOOR PESTS

Optimal control results if facilities to be treated are clean and if the exterior perimeter is concurrently treated with this product. Apply only to areas of facility where animals are not present. Allow spray to dry before allowing re-entry of animals into treated areas. Do not apply to animal feed or watering equipment. DO NOT treat pets with this product.
OUTDOOR/PERIMETER PESTS

Use this product to control outdoor pests by application as a perimeter treatment, residual spray or broadcast application to exterior surfaces of buildings, lawns, grounds, and ornamental plantings.

</thead>
</table>

**Application Restrictions**

- Do not water the treated areas to the point of run-off.
- Do not make applications during rain.

**How to Apply**

**OUTDOOR/PERIMETER PESTS**

Apply as a coarse low-pressure (do not exceed 50 psi at nozzle tip) spray at the rate of 0.25 to 1.5 fluid ounces of this product per 1,000 square feet of treated surface in a sufficient volume of water to provide adequate coverage but do not allow run-off to occur.

**High volume applications using power sprayers:**

You must adjust the rate of product application to ensure the correct amount of the product (see Use Rate column above) is applied per 1,000 square feet of treated surface. For example, mixing 12.5 fluid ounces of this product in a 50 gallon tank, while using an application volume of 3.0 gallons per 1,000 square feet, will apply 0.75 fluid ounces of this product per 1,000 square feet. The table below gives examples of end use dilutions for typical power spraying application volumes.

**Application for Outdoor Perimeter Pests**

- Ants, roaches and other listed crawling pests
- Fleas and ticks (including ticks that may transmit Rocky Mountain Spotted Fever)
- Mosquitoes
- Fire Ants

**Treatments may be applied at 21-day intervals. Begin applications when pests are noticed.**

**When to Apply**

- Begin applications when pests are noticed.

**FOR OUTDOOR/PERIMETER PESTS**

**Occasional invaders including multi-colored Asian lady beetle, elm leaf beetle, brown marmorated stink bug, Carpenter ants, Centipedes**

Where to Apply

- This product may be applied as a residual spray or as a perimeter treatment around residential and non-residential settings.

Residual Spray: Apply to surfaces on building exteriors, porches, patios and other structures, around door and windows, eaves and attic vents, utility entry points, shrubs and other exterior openings (including foundation cracks or drilled holes) where pests enter the structure or where they have been seen or found, or can find shelter.

Perimeter Treatments: Treat the outside of the structure, including walls (to a height of 2 to 3 feet), around door and window frames, and soffits where pests are likely to enter or hide. Treat the soil, turf, or other ground covering adjacent to the structure (in a band up to 10 feet wide) where pests are seen, have been found, or can find shelter.

In arbor management programs, apply to flower, shrub or ornamental plant beds where ants may be nesting, find food or burrow.

**Use Rate**

- 0.5 fluid ounce (7.5 milliliters) per 1,000 square feet of surface
- 0.25 fluid ounce (22.7 milliliters) per 1,000 square feet of surface
- 1.50 fluid ounce (45.4 milliliters) per 1,000 square feet of surface

**Where to Apply**

- Ants, roaches and other listed crawling pests
- Fleas and ticks (including ticks that may transmit Rocky Mountain Spotted Fever)
- Mosquitoes
- Fire Ants

**Ants, roaches and other listed crawling pests**

- Apply as a residual spray and/or perimeter treatment around the infested structure as described above.

- For best results, treat trees and shrubs infested with boxelder bugs, elm leaf beetles and other occasional invading species early in the season. [Tree treatment as described above.]

- For occasional invaders including multi-colored Asian lady beetle, elm leaf beetle, brown marmorated stink bug, Carpenter ants, Centipedes

- Apply directly to insects that have congregated around doors, windows and similar areas where they may enter the structure. Apply a perimeter treatment as described above.

- For best results, treat trees and shrubs infested with brown marmorated stink bug, elm leaf beetle and other occasional invading species early in the season. [Tree spraying may require ornamental license - check with your local regulator]

- Fleas and ticks (including ticks that may transmit Rocky Mountain Spotted Fever)

- Apply as a coarse wet spray to areas where fleas and ticks are most likely to be found, such as dog houses, kennels, runways, along paths or trails, under plants, shrubs, bushes, trees or shaded, moist areas where pests may be found.

- Treat the entire area where these pests could be present. Fleas and ticks may be reintroduced from surrounding areas by host animals.

- Mosquitoes

- Treat with spray or mist around landscape plants, turf and ground cover, under decks, around building foundations and other places where mosquitoes may rest.

- Fire Ants

- Apply as a mound drench. Dilute 1.5 oz per one gallon of water. Gently sprinkle 1 to 2 gallons of the diluted insecticide over the surface of each mound and surrounding area to a 2-foot diameter for best results. Apply in cool weather, 60 to 80°F or in early morning or late evening hours. Treat new mounds as they appear.

(continued)
WOOD-INFESTING PESTS

Drywood termites

- Beetles (con’t)
  - False powderpost
  - Old house borers
  - Wheat borers
- Carpenter ants

Carpenter ants

- New and old house borers
- Whitf or borers

Cluster flies

- Antennals beetles
- Bark beetles

Foam Applications

- This product can be converted to foam and used to treat structural voids to control wood-infesting pests in walls, under slabs, within masonry voids, or in other void areas. Mix end-use dilution with manufacturer’s specified volume of foaming agent.

APPLICATION FOR WOOD-INFESTING PESTS

- Exterior wood surfaces may be treated by general surface application to prevent nest cavity excavation by adult carpenter bees.
- Treat soil beneath firewood before stacking at 1 gallon of dilution per 8 square feet. Do not treat firewood with this product.
- Apply a spray or mist, or sufficient volume of foam, directly into gallery entrance holes. Leave entrance open to be sure that returning adult bees are killed. When there is no longer any insect activity, the entrance hole may be sealed with a suitable sealant.
- Exterior wood surfaces may be treated by general surface application to prevent nest cavity excavation by adult carpenter bees.

STORAGE AND DISPOSAL

- Do not contaminate water, food or feed by storage or disposal.

STORAGE

- Mix as needed. Store in original container in a secure dry storage area. Avoid extremes in temperatures. Prevent cross contamination with other pesticides and fertilizers. If the container is leaking and/or material is spilled on floor or paved surfaces, absorb on sawdust or other commercially available absorbing material, sweep up and remove to chemical waste area for your disposal. Concentrate is stable at normal storage temperatures.

PESTICIDE DISPOSAL

- Waste resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING

- Non-refillable container. Do not re-use or refill this container. Triple rinse or pressure rinse container (or equivalent) promptly after emptying. Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tilt container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsewater into application equipment or a mix tank or store rinsewater for later use or disposal. Repeat this procedure two more times. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold the container upright and drain into own application equipment or a mix tank or collect rinsewater for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse on about 40 PSI for at least 30 seconds. Drain on 10 seconds after the flow begins to drip. Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill.
## APPENDIX

Use this product as a general surface (outdoors only), spot, mist, or crack and crevice treatment. Permitted areas of use include the following buildings, structures, and modes of transport:

- Aircraft* (cargo holds only)
- Apartment buildings
- Bakeries*
- Bottling facilities*
- Breweries*
- Buses
- Cafeterias*
- Candy plants*
- Cereal processing and manufacturing plants*
- Correctional facilities
- Dairies and dairy product processing plants*
- Food manufacturing plants*
- Food processing plants*
- Foodservice establishments*
- Frozen food plants*
- Granaries*
- Greenhouses (structures only)
- Hospitals
- Hotels
- Houses
- Industrial buildings
- Kitchens*
- Laboratories
- Livestock housing
- Pet kennels
- Manufacturing establishments
- Mausoleums
- Meat, poultry & egg processing & packaging plants*
- Meat and produce canneries*
- Mobile & motor homes
- Nursing homes*
- Offices
- Pickle factories*
- Poultry houses
- Processing and packing plants*
- Restaurants*
- Schools*
- Spice plants*
- Stores
- Warehouses
- Wineries and similar structures*
- Transportation vessels such as buses, trucks, trailers, rail cars, and marine vessels

For indoor applications at these sites (*), observe the following restrictions:

- Do not apply in food/feed areas of food and feed handling establishments.
- Do not allow people or pets to contact treated areas until spray has dried.
- Do not apply in hospital and/or nursing home rooms while they are occupied.
- Do not apply in classrooms while they are occupied.
- Do not apply in aircraft cabins.
- Do not apply to furniture or upholstery where prolonged contact with humans will occur.
- Do not apply as a space spray.
- Do not allow excessive dripping or run-off to occur when treating vertical or overhead surfaces.
- Do not apply in conduits, motor housings, junction boxes, switch boxes, or other electrical equipment because of possible shock hazard.

### IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

**CONDITIONS:** The directions for use of this product are believed to be adequate and must be followed carefully. However, because of manner of use and other factors beyond Bayer CropScience LP’s control it is impossible for Bayer CropScience LP to eliminate all risks associated with the use of this product. As a result, crop injury or ineffectiveness is always possible. All such risks shall be assumed by the user or buyer.

**DISCLAIMER OF WARRANTIES:** TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER CROPSCIENCE LP MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, THAT EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL. No agent of Bayer CropScience is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER CROPSCIENCE LP DISCLAIMS ANY LIABILITY WHATSOEVER FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES, RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

**LIMITATIONS OF LIABILITY:** TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER FOR ANY AND ALL LOSSES, INJURIES OR DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, WHETHER IN CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, SHALL NOT EXCEED THE PURCHASE PRICE PAID, OR AT BAYER CROPSCIENCE LP’S ELECTION, THE REPLACEMENT OF PRODUCT.
