LIQUID WEED & FEED

- 1 Quart Covers Up To 7,500 Sq. Ft.
- The Fast, Easy Way To Weed Control
- And Fertilize Your Lawn.
- No Spreading - No Complicated Mixing.

15-0-0

NET CONTENTS 32 Oz.

ACTIVE INGREDIENTS:
- Dimethylamine salt of 2,4-dichlorophenoxyacetic acid 3.75%
- Dimethylamine salt of (+)-R-2-(2-methyl-4-chlorophenoxy)propionic acid 1.63%
- Dimethylamine salt of (+)-R-7-(2,4-dichlorophenoxy)propionic acid 1.61%
- OTHER INGREDIENTS: 93.51%
- TOTAL: 100.00%

THIS PRODUCT CONTAINS:
- 0.56 lb 2,4-dichlorophenoxyacetic acid equivalent per gallon or 2.70%
- 0.13 lb (+)-R-2-(2-methyl-4-chlorophenoxy)propionic acid equivalent per gallon or 1.35%
- 0.13 lb (+)-R-7-(2,4-dichlorophenoxy)propionic acid equivalent per gallon or 1.35%

Isoiner Specific by AOAC Methods.

A lawn will typically utilize 1 to 4 pounds of nitrogen per 1,000 square feet each growing season. When applied as directed this product supplies 0.05 to 0.08 pounds of nitrogen per 1,000 square feet with each application. Use this product in conjunction with an additional fertilization program to provide at least 1 pound of nitrogen per 1,000 square feet each growing season. Consult your local agricultural horticultural extension agent for the proper amount of nitrogen to be applied in your area.

**WHERE TO USE:**

- *Expert Gardener* Liquid Weed & Feed controls chickweed, clover, dandelion, knotweed, plantain, and most broadleaf weeds in lawns, vacant lots, playgrounds, and other similar areas.

- For bentgrass, bermudagrass, Kentucky bluegrass and fescues - Apply *Expert Gardener* Liquid Weed & Feed with a hose end sprayer at 6.4 fluid ounces of product per 1,000 square feet, 1 quart of product per 5,000 square feet.

- For St. Augustinegrass and centipedegrass - Apply *Expert Gardener* Liquid Weed & Feed with a hose end sprayer at 4.3 fluid ounces of product per 1,000 square feet, 1 quart of product per 7,500 square feet. Exercise care to avoid over-dosing by spraying evenly and uniformly. This treatment may cause temporary injury (chlorosis) to the St. Augustinegrass and centipedegrass. Do not spray *Expert Gardener* Liquid Weed & Feed on St. Augustinegrass and centipedegrass during periods of heat stress, high temperatures, or drought stress. Do not use this product on 'Floratam' St. Augustinegrass.

**Limitations on broadcast applications to residential turfgrass:**

- The maximum application rate is 6.4 fl oz of product per 1,000 sq ft per application. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum seasonal rate is 12.8 fl oz of product per 1,000 sq ft.

**WHEN TO USE:**

1. Spray any time during the growing season when weeds are actively growing.
2. On new lawns, wait until the grass has reached a height of 2 inches before making an overall (broadcast) spray treatment. Wait 3 weeks before putting new grass seed or stolons down in the bare spots.
3. Poor weed control may result if spray is applied during drought or just before rain.
4. For best results, mow 1 to 2 days before treating.
5. Do not water lawn within 24 hours after treatment.

**HOW TO USE:**

- Shake Well Before Using. Connect attached spray nozzle to garden hose. Turn the water control "ON/OFF" valve on spray nozzle to the "OFF" position. Turn on water at faucet.

- To begin spraying, point spray nozzle towards area to be treated and turn the water control "ON/OFF" valve to the "ON" position. The water automatically mixes with the product. Walk at a steady pace while spraying using an even sweeping motion, slightly overlapping treated areas. To stop spraying, turn the water control valve to "OFF"; turn water off at faucet. To relieve pressure, turn water "ON/OFF" valve to the "ON" position before removing nozzle from hose, being careful to point the nozzle away from you. For storage turn valve to off position.
