CyKill Place Packs
KILLS RATS AND MICE
BREACKS THE CYCLE

Norway Rats, Roof Rats, and House Mice usually consume a lethal dose in a single night’s feeding, but it may take two or more days from the time of bait consumption for these rodents to die. Rodents cease feeding after consuming a toxic dose.

This product kills anticoagulant resistant Norway Rats, Roof Rats & House Mice.

For indoor and outdoor (within 100 feet of buildings) control of Norway Rats, Roof Rats & House Mice.

For sale to professional pest control operators only.
