CaviWipes™ are effective against the following microorganisms on hard, nonporous surfaces when used as directed:

- Mycobacterium tuberculosis var. bovis (BCG)
- Staphylococcus aureus
- Pseudomonas aeruginosa
- Salmonella enterica
- Trichophyton mentagrophytes
- Candida albicans
- Multi-Drug Resistant (MDR) Acinetobacter baumanii
- Klebsiella pneumoniae
- Bordetella pertussis
- Methicillin Resistant Staphylococcus aureus (MRSA)
- Methicillin Resistant Staphylococcus epidermidis (MRSE)
- Venezuelan Encephalitis (VZE)
- Staphylococcus aureus with Reduced Susceptibility to Vancomycin
- Vancomycin Intermediate Staphylococcus aureus (VISA)
- ESBL Echerichia coli
- Hepatitis B Virus (HBV)*
- Hepatitis C Virus (HCV)*
- Herpes Simplex Virus Types 1 and 2*
- Human Immunodeficiency Virus (HIV-1)*
- Human Coronavirus (not associated with Severe Acute Respiratory Syndrome or SARS)*
- Influenza A, H1N1 Virus*
- Adenovirus**

1 This product has demonstrated effectiveness against Adenovirus II with a 3 minute contact time.
2 This product has demonstrated effectiveness against Influenza A virus and is expected to inactivate all Influenza A viruses including the Pandemic 2009 H1N1 Influenza A Virus.
DO NOT USE AS A BABY WIPES. Not For Use On Skin.

DO NOT FLUSH WIPES.

DESCRIPTION

Caviliner™ Disinfecting Towelettes are non-woven disposable towelettes pre-saturated with Cavicide™.

Caviliner™ Disinfecting Towelettes are multi-purpose disinfectant/contaminant cleaning wipes for use on hard, non-porous inanimate surfaces.

Caviliner™ are recommended for use in healthcare settings such as hospitals, hospital operating rooms, emergency medical settings, emergency rooms, medical related facilities, ambulatory surgery centers (ASC), Life Science laboratories, surgical centers, pathology labs, ICUs, cardiac housing, medical centers, clinics, patient care areas, nursing homes, home health care, hospitals, laundry rooms, newborn nurseries, orthopedic and ophthalmic care facilities, orthopedic physical therapy, physicians offices, radiology, recovery rooms, rehabilitation, respiratory therapy, schools, transport vehicles, buses, cruise ships, drug preparation rooms, pharmacy clean rooms, clean rooms, X-Ray, dialysis centers, donation centers, blood, plasma, x-rays, milk, adhesive, dental offices, dental operators, animal care facilities, veterinary facilities, kennels, animal dental operators, pet areas, beauty salons, manicure salons, skin care salons, tattoo parlor, barber shops, spa salons, emergency vehicles, ambulances, police and fire vehicles, health club facilities, kitchens, food preparation areas, bathrooms, day care centers, correctional facilities, mortuaries, mortuaries, funeral homes, and other critical care areas where control of cross contamination between treated surfaces is important.

Caviliner™ will effectively clean and disinfect, when used as directed, such items as interior and exterior surfaces of infant incubators, bassinets, cribs and warehouses, infant/child care equipment surfaces, baby cribs, toys, toys, stocked, lab equipment and surfaces, oxygen hoods, operating room tables and lights, all lamps, physical therapy (PT) equipment surfaces, exterior surfaces of stethoscopes, patient monitoring equipment, patient support equipment, patient delivery equipment, gurneys, stretchers, wheelchairs, washers, stethoscopes, spine back boards, Kenwood Extraction Device, ambulance equipment surfaces, stretchers, stretchers, hard, non porous exterior surfaces of ultrasound transducers or probes, exam tables, cabinets, refrigerators, IV poles, dialysis machines, glucometers, blood pressure cuffs, dental unit instrument trays, operating light switches, exterior surfaces of anesthesiologist and dental curing lights, exterior surfaces of anesthesiologist equipment, exterior surfaces of diagnostic equipment, SkilPane™ with Dermatofix™ workstations, dental counters, dental chairs, non-porous dental impression material, dental impression trays, dental equipment trays, dental equipment lines, interior surfaces of dental operatory, dental x-ray sensors, digital x-ray plates, dental curing lights, dental intra oral cameras, dental endodontic equipment, such as Ipex, Ortho, i-Smart, i-Swee 3D finite, i-Moss, motors, stairs, counters, dental unit instrument trays, veterinary care surfaces, animal cages, kennels, salon surfaces, hair/cut care implements, shampoo bowls, hair dryers, razors, hair cutting implements, scissors, knives, combs, brushes, hair dryers, manicure tables, manicure implements, tanning beds, weight-lifting surfaces, non-food contact surfaces, exterior surfaces of appliances such as refrigerators, microwaves, food processors and stoves, dining tables, sinks, food service countertops, food serving trays, pitchers, floors, walls, handrails, door knobs, bed rails, counter tops, tables, chairs, vanity tops, faucets, bathroom fixtures, exterior toilet surfaces, bathing units, shower stalls, cabinets, garbage cans, computers, keyboards, computer mouse, fax machines, filing cabinets, headsets, workstations, carts, lights, telephones which are made of plastic (i.e., polycarbonate, polystyrene, polystyrene, polystyrene, polystyrene, polystyrene, polystyrene, polystyrene), and use sites listed on this label consisting of non-porous vinyl, stainless steel, painted surfaces, Plexiglas®, Formica® and glass.

**To Disperse Towelettes:**

1. Start fresh, remove cover and discard seal. From corner of towelette roll, pull up to towelette corner, twist it into a point and thread it through the hole in the container cover. Pull through about one inch. Replace cover. Pull out first towelette and tear off at a 45° angle. Remaining towelettes feed automatically, ready for next use. When not in use, keep cover cap closed to prevent solution loss.

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**CLEANING INSTRUCTIONS:**

Use one Caviliner™ towelette to completely pre-clean surface of all gross debris.

**For use as a disinfectant:**

Use a second Caviliner™ towelette to thoroughly wet the surface. Repeated use of the product may be required to ensure that the surface remains visibly wet for 1 minute at room temperature (86°F/30°C) for Tuberculocid, bactericidal, fungicidal, and virucidal activity.

**FOR PRE-CLEANING INSTRUMENTS PRIOR TO DISINFECTION:**

1. Remove gross filth and heavy soil loads.

2. To disinfect external surfaces of ultrasound transducers: Pre-clean ultrasound golf from external transducer to be disinfected. Then thoroughly wet the probe with a Caviliner™ towelette. Repeated use of the product may be required to ensure that the surface remains visibly wet for 1 minute at room temperature (86°F/30°C).

**Notes:**

Critical and semi-critical devices must be followed by appropriate terminal sterilization/high-level disinfection process.
