MICRON® CSC HS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: This product contains Micron technology to provide excellent, long-lasting anti-fouling protection against all types of fouling. These products are designed to wear away (polish) at a controlled rate similar to a bar of soap. As a result there will be a reduced buildup of old coatings and minimized sanding at reaplication. In addition, this technology allows the boat to be hauled and relaunched the following season without repainting. This product dries to touch coat colors. It will provide excellent anti-fouling longevity against all types of algae, weeds, barnacles, and other shell fouling. This product can be used below the waterline in fresh, salt or brackish water on fiberglass, wood and properly primed metal boat hull and parts. Do not use on aluminum.

COMPATIBILITY: This product can be applied over most anti-fouling paints as long as the old coating is tightly adhered, is in sound condition, and has been thoroughly sanded with 80 grit wet-or-dry sandpaper. Silt anti-fouling paints will need to be removed or overcoated with Micron® before applying. VOC: Less than 385 grams/liter (5.21 lbs/gallon) as supplied. THINNING: Only thin when necessary. Do not exceed 10% by volume. THINNER: Brushing - Brush-Eaze 433™, Spraying - Special Thinner 216. THEORETICAL COVERAGE: 45 sq.ft./gallon. Flits 2.5 mls dry film thickness. DRY TIMES: Touch Dry - 16 hours minimum. At 77°F (25°C) Dry to overcoat - 16 hours minimum. Dry to launch - 16 hours minimum. Spraying - Special Thinner 216™. APPLICATION TEMPERATURES: 65°F (18°C) and above. (Air and hull). * If either hull or air temperature falls below 50°F (10°C) during the 16 hour dry time extend the dry time to a minimum of 36 hours.

APPLICATION SYSTEMS

GENERAL APPLICATION PROCEDURES: Shake or mix well prior to use. Apply at least 2 full coats (2 coats on bare wood) of this product by brush or solvent resistant 3M® roller, Do not apply this product, Keep all the life of the paint is directly related to the amount of paint applied. If during application, brush pulls or roller drags, use Interlux Brush-Eaze 433™ to improve handling. Certain areas of full experience faster polishing than other areas. These areas include the waterline, the leading edge of the hull and rudder, and the bow stem. On these areas, it is suggested that an additional coat of paint be applied to ensure that this product does not wear away before the other areas of the bottom.

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of old paint and contamination by sanding the entire surface well with 60-grit wet or dry sandpaper, or wire brush clean with Interlux Special Thinner 216. Apply at least 2 coats of this product, allowing proper dry time.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old anti-fouling paint with Interlux InterProde® 399 for fiberglass, wood and by sandblasting steel surfaces to a white metal. Proceed with application system for bare wood as described below.

BARE FIBERGLASS: It is very important that bare fiberglass be properly prepared to completely remove the old release wax in order to prevent delamination of the anti-fouling paint. Begin by scrubbing the surface thoroughly with a stiff brush using Interlux Anti-Barrier Boat Soap to remove any dirt and contamination. Flush with fresh water to remove the soap residue and allow to dry. Remove mold release wax using one of the following: Interlux FiberGlass Surface Prep or Interlux FiberGlass Solder Wash following the product label instructions. To be certain that all of the contamination has been removed, run fresh water over the surface, if the water runs up or separates, clean again. When the water runs off, all contamination has been removed. After the surface has been properly cleaned, proceed with one of the application systems below.

BARE STEEL - NO SYSTEM: Clean the surface following the preparation procedure above. Apply one coat of Interlux InterProde® 2000 or Interlux No Sand Primer YPA2200, following the label instructions for applying the primer, and overcoating with anti-fouling paint. Apply two coats of this product, allowing for the appropriate dry times.

BARE FIBERGLASS - EASING SYSTEM: Clean the surface following the preparation procedure described above. Repair any surface imperfections using Watertite Spackle Filler. Sand and wipe clean. Sand the entire surface with 80-grit sandpaper until a flat matte finish is obtained. Wipe the sanding residue off the surface with Fiberglass Solder Wash 207™. Apply at least 2 coats of this product.

BARE WOOD: Sand entire surface thoroughly with 60 grit production sandpaper, wipe surface clean with Interlux Brush-Eaze 433. Repair imperfections with Watertite Spackle Filler; sand and wipe clean. Apply final coat of this product reduced with Interlux Brush-Eaze 433™ (10% maximum). Fill seams with Interlux Seam Compound 30 between first and second coats of this product.

UNDERWATER METALS: Contact the Interlux Technical Service Department at 1-800-488-7755 for full details on how to properly prime underwater metals. Do not use on aluminum.

NOTE: This product may change color at the waterline.

Color difference may occur between actual paint and color swatch on front of can.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and hat. May be fatal if swallowed or inhaled. Do not breathe vapor or spray mist. While spray painting or sanding or sandblasting boat surfaces, wear a mask and protective goggles approved by the Mine Enforcement and Safety Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If Swallowed:

- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.
- If skin or clothing:
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15-20 minutes
  - Call a poison control center or doctor for treatment advice.

If Inhaled:

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

If In Eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

Others: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate, which may cause asphyxiation pneumonitis.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by emptying of equipment or disposal of waste. Do not apply near fishholes and shallow water areas. Wash all exposed equipment and contaminated disposal vessels. Do not allow any liquid to enter surface water. Ensure that all equipment and waste is disposed of properly. Do not allow material to enter any waterways. This material is toxic to aquatic life. Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticides are subject to hazardous improper disposal of excess pesticide, spray materials, or equipment in violation of Federal Law. They must be disposed of properly. Contact your State Pesticide or Environmental Conservation Agency or the Hazardous Waste Program at your local EPA Regional Office for assistance.

CONTAINER DISPOSAL: Noncorrosive container. Do not re-use or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Then the container is full with water and recap. Shake for 10 seconds. Pour contents into application equipment or a mix tank and store / discard for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causese eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and hat. May be fatal if swallowed or inhaled. Do not breathe vapor or spray mist. While spraying paint or sanding or sanding leaf joint surfaces, wear a mask or respirator jointly approved by the Mine Safety and Health Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If Swallowed:
- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.

If on Skin or Clothing:
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15-20 minutes
- Call a poison control center or doctor for treatment advice.

If Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

In eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Other:
- Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate—vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by dipping or environmental clay or septic treatment systems. Do not do not dispose of this product in lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a Federal or State Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. Refer to guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are considered hazardous. Improper disposal of excess pesticide, spray equipment, and containers is a violation of Federal and State laws. This product cannot be disposed of by use according to label instructions. Contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable containers. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later in use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

For CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMTREC 1-800-642-9000 (DAY OR NIGHT) MEDICAL ADVISORY, CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-555-0125.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling. PRODUCT DESCRIPTION: This product uses micron technology to provide excellent long lasting antifouling protection against all types of fouling. These products are designed to be worn away (polish) at a controlled rate similar to a bar of soap. As a result there will be a reduced build up of old coatings and minimalized staining at repainting. In addition, this technology allows the boat to be hauled and refouled the following season without repainting. This product gives years of long lasting protection. This product can be used below the waterline in fresh, salt or brackish water on fiberglass, wood and properly primed metal hull and parts. Do not use on aluminum.

COMPATIBILITY: This product can be applied over most antifouling paints as long as the coating is tightly adhered, is in sound condition, and has been thoroughly sanded with 80 grit wet/dry sandpaper.

Soft antifouling paints will need to be removed or overcoated with Micron® before applying.

VOC: Less than 356 grams/liter (3.2 lbs/gal) as supplied

THINNING: This only when necessary. Do not exceed 10% by volume.

THINNER: Brushing - Brush-Ease 433®, Spraying - Special Thinner 216

THEORETICAL COVERAGE: 455 sq ft/gal, yields 2 mils dry film thickness.

DRIE TIMES: Touch Dry - 6 hours minimum

At 77°F (25°C) Dry to overcoat - 16 hours minimum

Spraying - Special Thinner 216

APPLICATION TEMPERATURES: 50°F (10°C) and below, and 90°F (32°C) and above, hull and hull. * If either hull or air temperature falls below 50°F (10°C) during the 15 hour dry time extend the dry time to a minimum of 36 hours.

APPLICATION SYSTEMS
GENERAL APPLICATION PROCEDURES: Shake or mix well prior to use. Apply at least 2 coats (20% on bare wood) of this product by brush or solvent resistant 3/8" nap roller. Do not apply thin coats. Keep in mind that the life of the paint is directly related to the amount of paint applied. Do not apply paint in temperatures below 50°F (10°C). If application occurs below 50°F (10°C), it is suggested an additional coat of paint be applied to ensure that this product does not wear away before the other areas of the bottom.

PREVIOUSLY PAINTED SURFACES: GOOD CONDITION. Remove all traces of loose paint and contamination by sanding the entire surface with 80 grit wet or dry sandpaper and wipe clean with InteLux Special Thinner 216. Apply at least 2 coats of this product, allowing proper dry times.

PREVIOUSLY PAINTED SURFACES: POOR CONDITION. Completely remove all old antifouling paint with InteLux InterCoat® 299E for fiberglass, wood, and by sandblasting steel surfaces to near white metal. Proceed with application system for bare wood as described below.

BARE FIBERGLASS: It is very important that bare fiberglass be properly prepared to completely remove the mold release wax in order to prevent contamination of the antifouling paint. Begin by sanding the surface thoroughly with a stiff brush using InterLux High-Purpose Boat Soap to remove the old varnish and contamination. Rinse with fresh water to remove the soap residue and allow to dry. Remove mold release wax using one of the following InterLux Fiberglass Surface Prep or InterLux Fiberglass Solvent Wash following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water runs off or separates, clean again. When the water runs off and all contamination has been removed, After the surface has been properly cleaned, proceed with one of the application systems below.

BARE FIBERGLASS - NO SAND SYSTEM: Clean the surface following the preparation procedure above. Apply one coat of InterLux InterCoat® 2990 or InterLux InterCoat® 2990, following the label instructions for applying the primer, and overcoating with antifouling paint. Apply two coats of this product, allowing for the appropriate dry times.

BARE FIBERGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure described above. Repair any surface imperfections using Warréite Epoxy Filler Sand and wipe clean. Sand the entire surface with 80-grit sanding paper until a flat matte finish is obtained. Wipe the sanding dust off the surface with Fiberglass Solvent Wash 2027®. Apply at least 2 coats of this product.

BARE WOOD: Sand the entire surface thoroughly with 80 grit production sandpaper; wipe surface clean with InterLux Brush-Ease 433. Repair imperfections with Warréite Epoxy Filler Sand and wipe clean. Apply first coat of this product reduced with InterLux Brush-Ease 433 (15% maximum). Fill seams with InterLux Seam Compound 1-30 before first and second coats of this product.

UNDERWATER METALS: Contact the InterLux Technical Service Department at 1-800-468-7588 for specific details on how to properly prime underwater metals. Do not use on aluminum.

NOTE: This product may change color at the waterline. Color difference may occur between actual paint and color swatches on front of can.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING
Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as long-sleeved cotton shirt, long pants and hat. May be fatal if swallowed or inhaled. Do not breathe vapor or spray mist. While spraying paint or sanding or sand blasting boat surfaces, wear a mask or respirator approved by the Mine Safety and Health Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID
If Swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

If on skin or clothing:
Take off contaminated clothing.
Rinse skin immediately with plenty of water for 15-20 minutes
Call a poison control center or doctor for treatment advice.

If Inhaled:
Move person to fresh air.
If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
Call a poison control center or doctor for further treatment advice.

If In eyes:
Hold eye open and rinse slowly and gently with water for 15-20 minutes.
Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
Call a poison control center or doctor for treatment advice.

Other:
Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Certain petroleum distillate – vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS
This material is toxic to fish. Do not apply directly to water by draining of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in approved landfill. Do not discharge effluent containing this product into tributaries, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting agency has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD
Flammable. Keep away from heat and open flames.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PERSISTENT DISPOSAL: Petroleum wastes are acutely hazardous. Improper disposal of excess petroleum, spray mixture or rinses is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Petroleum or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour into equipment application or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL EMERGENCY, SPRILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL-Free: CHEMTRAC 1-800-424-8280 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL FEDERAL CONTROL CENTER OR CALL 1-800-454-6813.

MICRON® CSC HS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: This product uses micron technology to provide excellent, long-lasting antimicrobial protection against a wide variety of mold. The product is designed to be applied on pre-cleaned surfaces. When applied, the product will provide excellent anti-microbial properties against a wide variety of mold, bacteria, and fungi. It is a clear, water-based formulation that can be used on pre-cleaned surfaces.

COMPATIBILITY: This product can be applied to a wide variety of substrates, including wood, metal, glass, and plastic. It is compatible with most pre-cleaned surfaces. It is not recommended for use on unfinished or raw materials.

APPLICATION SYSTEMS

GENERAL APPLICATION PROCEDURES: Stain or mix well prior to use. Apply at least 2 coats of paint to bare wood of this product by brush or bristle paint roller. Do not apply this product to bare wood. Keep in mind that the life of the paint is directly related to the amount of paint applied. If applying spray, check the product instructions for the recommended amount. If applying by brush, check the product instructions for the recommended amount. This product is recommended for use on pre-cleaned surfaces. This product is not recommended for use on unfinished or raw materials.

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of loose paint and contamination by sanding the entire surface with 80-grit wet or dry sandpaper, rinse, and then place clean with Interlux Special Thinner 216. Apply at least 2 coats of this product, allowing proper drying time.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antimicrobial paint with Interlux Interprotect 2000 or Interlux No Sand Primer 128200, then wash the surface with soap and water. Sand the surface with 80-grit sandpaper, rinse, and then place clean with Interlux Special Thinner 216. Apply at least 2 coats of this product, allowing proper drying time.

BEFORE FIBERGLASS: It is very important that bare fiberglass be properly prepared to completely remove the mold release wax and any other contamination from the surface. Begin by blowing the surface with a stiff brush using Interlux Interprotect 2000 to remove any wax and contamination. Rinse with fresh water to remove the soap residue and allow to dry. Remove mold release wax using one of the following Interlux Fiberglass Surface Prep or Interlux Fiberglass Surface Preparation followed by the product label instructions. Be certain that all of the contamination has been removed, run water over the surface. If the water is free of floating materials, the surface is clean. When the water is free of floating materials, the result is a contamination-free surface. Apply at least 2 coats of this product, allowing proper drying time.

BEFORE GLASS-REINFORCED PLASTIC: Clean the surface following the preservative directions. Apply 2 additional coats of this product, allowing proper drying time.

BEFORE FINISHING AND COATING: Clean the surface following the preservative directions. Apply 2 additional coats of this product, allowing proper drying time.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Avoid contact with skin, eyes, or clothing. Wearing protective clothing such as gloves, long-sleeved shirt, long pants, and hat. May be fatal if swallowed or inhaled. Do not breathe the vapor or spray mist. When spraying paint or sanding or sand blasting boat surfaces, use a mask or respirator jointly approved by the Mine Safety and Health Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If Swallowed:
- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.
- If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.
- Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.
- If in eyes:
- Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
- Call a poison control center or doctor for further treatment advice.

Note: Phenylenediamine causes respiratory reactions, may cause asthma, and may cause eye irritation.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by stream or dispersion of waste. Do not allow blowdown or discharge to surface water. Do not dispose of paint debris in an open landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, or other waters unless in accordance with the requirements of a National Discharge Permit. For federal and the permitting agency has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

REPLACEMENT: Prohibited. Waste is acutely hazardous. Improper disposal of excess pesticide, spray mists or residues is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative in the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reutilize or refill this container. Triple rinse as follows:

Empty the remaining contents into a sink or other container and store for 10 seconds after the flow begins to drip. Fill the container with water and replace the cap. Shake for 10 seconds. Pour into the application equipment or a mix tank or store rinsewater for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL, EMERGENCY SPILL, LEAK, EXPOSURE, OR ACCIDENT, CALL TOLL-Free CENCOMM 1-800-244-0300 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-244-0300.
