Contains no phosphorous.

Kills C. difficile spores in 3 minutes

DIRECTIONS FOR USE:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Always refer to manufacturer's care instructions before using on equipment or devices.

To Refill: Remove trigger sprayer from empty bottle. Pour:
Unscrew cap on refill and pour contents directly into empty bottle. Use:
Replace trigger sprayer and use as you normally would.
To Clean, Disinfect and Deodorize Hard, Nongorous Surfaces: Spray 6"–8" from surface until surface is thoroughly wet. Allow this product to remain wet for 1 minute. To kill Clostridium difficile spores: let stand for 3 minutes. Then wipe with a clean, damp cloth. For heavily soiled areas, a precleaning is required. Rinse with potable water for food-contact surfaces.
To Clean:
Follow directions above or apply with a clean cloth, mop, or sponge saturated with Clorox Healthcare® Bleach Germicidal Cleaner until surface is completely wet. (When applying with a saturated cloth or sponge, gloves should be worn.) No standing time is required. If streaking is observed, wipe with a clean, damp cloth or paper towel.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

CAUTION:
Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. FIRST AID: If in Eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. If present, remove contact lenses after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor or going for treatment. PHYSICAL OR CHEMICAL HAZARDS: Do not use this product with ammonia or acids such as vinegar, rust removers, or toilet bowl cleaners. This product not intended for use on fabrics.

Clorox Healthcare Bleach Germicidal Cleaner [22 oz]
**DIRECTIONS FOR USE continued:** Special Instructions for Cleaning Prior to Disinfection Against *Clostridium difficile* spores. Personal Protection: Wear appropriate barrier protection such as gloves, gowns, masks, and eye covering. Cleaning Procedure: Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with a clean cloth, mop, and/or sponge saturated with this product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soilied clothes. Infectious Materials Disposal: Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal. Disinfection Procedure: Spray 6”–8” from surface until surface is completely wet. Let stand for 3 minutes. Wipe with a clean, damp cloth or paper towel. 

**OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS**

Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soilied clothes. Infectious Materials Disposal: Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal. Disinfection Procedure: Spray 6”–8” from surface until surface is completely wet. Let stand for 3 minutes. Wipe with a clean, damp cloth or paper towel. 

**PROCEDURE:**

1. **Infectious Materials Disposal:** Use disposable gloves, gowns, masks, and eye coverings. Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

2. **Cleaning:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before applying this product. **Contact Time:** Let stand for one minute. For all other organisms, see directions for contact times. **Disposal of Infectious Materials:** Use disposable impervious gloves, gowns, masks, and eye coverings. Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

**Blood and Body Fluids:**

Blood and other body fluids must be thoroughly cleaned from surfaces and objects before applying this product. **Contact Time:** Let stand for one minute. For all other organisms, see directions for contact times. **Disposal of Infectious Materials:** Use disposable impervious gloves, gowns, masks, and eye coverings. Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

**Product Use:** This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.
### ORGANISMS

#### Bacteric 1 minute contact time
- Acinetobacter baumannii
- Bordetella pertussis
- Campylobacter jejuni
- Enterobacter aerogenes
- Enterobacter cloacae
- Escherichia coli
- Klebsiella pneumoniae
- Methicillin-resistant Staphylococcus aureus (MRSA)
- Pseudomonas aeruginosa
- Salmonella enterica
- Staphylococcus aureus
- Staphylococcus epidermidis
- Streptococcus pyogenes
- Stenotrophomonas maltophilia
- Staphylococcus aureus – New Delhi Metallo-Beta Lactamase-1 (NDM-1)
- Staphylococcus aureus – Vancomycin-intermediate-resistant (VISA)
- Staphylococcus aureus – Vancomycin-resistant (VRSA)
- Vancomycin-resistant Enterococcus faecium (VRE)
- Vancomycin-resistant Enterococcus faecalis (VRE)
- Enterococcus hirae
- Enterococcus faecium
- Enterococci
- K. pneumoniae – New Delhi Metallo-Beta Lactamase-1 (NDM-1)
- Enterococci
- Enterococci
- Enterococci
- Enterococci
- Enterococci
- Enterococci
- Enterococci
- Enterococci
- Enterococci
- Enterococci
- Enterococci

#### Bacteric 3 minute contact time
- B. pertussis
- C. jejuni
- K. pneumoniae
- S. maltophilia

#### Viruses 1 minute contact time
- Adenovirus Type 2
- Avian Influenza A (H3N2) Virus
- Canine Parvovirus
- Enterovirus Type D68
- Feline Panleukopenia Virus
- Hepatitis A Virus (HAV)
- Hepatitis B Virus (HBV) (Duck Hep B Virus [DHBV] as surrogate)
- Influenza A H1N1 Virus
- Influenza A Virus
- Influenza B Virus
- Hepatitis C Virus (HCV)
- Human Immunodeficiency Virus Type 1 (HIV-1) (HIV Viral as surrogate)
- Norovirus (Feline Calicivirus as surrogate)
- RSV
- Influenza A H1N1 Virus
- Influenza A Virus
- Influenza B Virus
- Measles Virus
- New Influenza Virus
- Varicella Virus

#### Fungi 1 minute contact time
- Candida albicans
- Fungi

### USE SITES

#### Medical
- Dialysis clinics
- Emergency rooms
- Home healthcare
- Hospitals
- Nursing homes
- Operating rooms
- Patient rooms

#### Dental
- Dental clinics
- Labs

### Compatible with a wide variety of surfaces.

### Medical hard, nonporous surfaces:
- Autoclaves
- Blood glucose monitors
- Bed pans
- Bed railings
- Exam tables
- High touch surfaces
- Mattress covers
- Medical equipment surfaces

### Dental hard, nonporous surfaces:
- Counters
- Operator hard surfaces

### General hard, nonporous surfaces:
- Bathroom fixtures
- Counter tops
- Doorknobs
- Exteriar toilet surfaces
- Garbage cans
- Showers
- Tables

### Special instructions for cleaning prior to disinfection.
Follow special instructions for cleaning prior to disinfection.

### For any use site that includes electronics, refer to manufacturers’ instructions before use.

### For unfamiliar surfaces, test in a small, inconspicuous area first. Consult medical equipment warranty information and equipment care and cleaning guides prior to selecting and using any surface disinfectant on plastic surfaces.
**CLEANING**

- **Cleaning Procedure:** Spray 6”–8” from surface until surface is thoroughly wet. Allow this to sit for 3 minutes before wiping. When applying with a saturated cloth or sponge, gloves should be worn. If streaking is observed, wipe with a clean, dry cloth or paper towel. Special instructions for Cleaning Prior to Disinfection against Clostridium difficile spores.

- **Personal Protection:** Wear appropriate barrier protection such as gloves, gowns, masks, and eye covering. Capacitance cleaning procedure: (When applying with a saturated cloth or sponge, gloves should be worn.) No standing time is required. If streaking is observed, wipe with a clean, dry cloth or paper towel. Special instructions for Cleaning Prior to Disinfection against Clostridium difficile spores.

**DISINFECTING**

- **Disinfection Procedure:** Spray 6”–8” from surface until surface is completely wet. Let stand for 3 minutes. Wipe with a clean, damp cloth or paper towel or allow to air dry. KILLS HIV, HBV, AND HCV ON PRE-CLEANED, NONPOROUS SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS.

**STORAGE AND DISPOSAL:** Store this product in a cool, dry area. Do not use this product with ammonia or acids such as vinegar, rust removers, or toilet bowl cleaners. This product is not intended for use on fabrics.

**FORMULA**

Bacteria: 1 minute contact time
- Acinetobacter baumannii
- Bordetella pertussis
- Campylobacter jejuni
- Escherichia coli
- Klebsiella pneumoniae
- Listeria monocytogenes
- Pseudomonas aeruginosa

**VIRUSES: 1 minute contact time**
- Adenovirus Type 2
- human immunodeficiency virus 1
- Human Immunodeficiency Virus (HIV-1) (AIDS Virus)

**FUNGI: 1 minute contact time**
- Candida albicans

**Kills Clorox® disinfectant** in 3 MINUTES in the presence of three-part soil load.

**DIRECTIONS FOR USE**: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Always refer to manufacturer’s care instructions before using on equipment or devices. To refill spray bottles: Remove trigger sprayer and plastic cup or cap and refill. Mix contents thoroughly with Clorox Healthcare® bleach germicidal cleaner. Spray 1% solution directly onto object. Replace trigger sprayer and use as you normally would. To Clean, Disinfect and Deodorize Hard, Nonporous Surfaces: Spray 6–8” from surface until surface is thoroughly wet. Allow product to remain for 3 minutes. Then wipe with a clean, damp cloth. For heavily soiled areas, a prewetting is required. Rinse with potable water for food-contact surfaces. To Clean: Follow directions above to apply with a clean cloth, mop, or sponge saturated with Clorox Healthcare® bleach germicidal cleaner until surface is completely wet. When applying with a saturated cloth or sponge, gloves should be worn. No standing time is required if it is to be observed, wipe with a clean, dry cloth or paper towel. Special Instructions for Cleaning Prior to Disinfection Against Cloroxidisc® difficile spores. Personal Protection: Wear appropriate barrier protection such as gloves, gowns, masks, and eye covering. Cleaning Procedure: Fecal matter must be thoroughly removed from surfaces/objects before disinfecting by application with a clean cloth, mop or sponge saturated with this product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Rainstains are to be cleaned last. Do not reuse soiled cloths. Infectious Materials Disposal: Materials used in the cleaning process that may contain fecal-wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal. Disinfection Procedure: Spray 6–8” from surface until surface is completely wet. Let stand for 3 minutes. For all other areas, see directions for contact times. Disposal of Infectious Materials: Use disposable impermeable gloves, gowns, masks and eye covering. Blood and other body fluids must be thoroughly removed from surfaces and objects before applying this product. Contact: Let stand for 1 minute. For all other areas, see directions for contact times. Disposal of Infectious Materials: Use disposable impermeable gloves, gowns, masks and eye covering. Blood and other body fluids must be thoroughly cleaned from surfaces and objects before applying this product. **ORGANISMS:**

- **Bacteria:**
