**PRECAUTIONARY STATEMENTS**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. Keep Out of Reach of Children. Corrosive. Causes irreversible eye damage and skin lesions. Harmful if swallowed. Inhalation of fumes may irritate the skin. Avoid breathing spray mist. Do not get into eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, or chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARD

This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems that have not been notified of the presence of this chemical or into local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS

Do not eat, drink or smoke during use or exposure, or in areas to which children or pets have access.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE: Open dumping is prohibited. Store only in original container. If a leaky container must be contained within another, mark the outer container to identify the contents. Store pesticides away from food, pet feed, seed, fertilizers, and other similar materials. Keep this product under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use.

PESTICIDE DISPOSAL: Pesticide wastes are hazardous. Improper disposal of excess pesticide, spray containers or rinse water is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Authority, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING DISPOSAL: Triple rinse (or equivalent) the container with this product only. Do not reuse this container for any other purpose.

RESIDUE REMOVAL INSTRUCTIONS: Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before disposal is the responsibility of the user of the pesticide. To clean the container before final disposal, triple rinse promptly after emptying. Triple rinse as follows: Fill the container 1/4 full with water. Tip container on its side and roll it back and forth, creating at least one complete revolution, for 30 seconds. Stand the container on its end and roll it back and forth several times. Then turn the container over onto its other end and tip it back and forth several times. Follow Pesticide Disposal Instructions for rinse disposal. Repeat this procedure two more times.

This product combines the proven efficacy of aquat with a high flammability surfactant system to provide you with an all-in-one system specifically designed for dairy and/ or feedlots to control various feedlot contamination and to control inorganic matter. It is used as an excellent material for use in the removal of feedlot contamination. In addition, it is used as an excellent material for use in the removal of feedlot contamination.

**ACTIVE INGREDIENTS:**

Octyl Dodecyl Dimethyl Ammonium Chloride.......................... 3.0%
Didecyl Dimethyl Ammonium Chloride.............................. 1.5%
Dodecyl Dimethyl Ammonium Chloride.............................. 1.5%
Alkyl (C14, 50%; C12, 40%; C16, 10%) dimethyl benzyl ammonium chloride.................................................. 4.0%

**INERT INGREDIENTS:**

TOTAL:.............................................................................. 100.0%

**KEEP OUT OF REACH OF CHILDREN**

See left panel for additional precautionary statements.

First Aid

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or other emergency service, and then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

**NOTE TO PHYSICIAN:** Probable mucous membrane damage may contraindicate the use of gastric lavage.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Apply this product with a cloth, mop, mechanical spray device or dining device. When applied with a mechanical spray device, surfaces must be sprayed until thoroughly wetted. For disinfection, treated surfaces must remain wet for 10 minutes. For spray applications, use a coarse pump or trigger spray. Spray 6-8 inches from surface. Rub with sponge, brush or cloth. For fogging applications, foam must be applied as a room fog using a 1:128 solution of the disinfectant for operating instructions. Allow to air-dry. Do not use spray sprayer. Rinse with potable water after use on surfaces that come in contact with food.

**NOTE:** With spray applications or fogging device, cover or remove all food products. Prepare a 1:30 solution of the disinfectant when use solution becomes visibly dirty. For heavily soiled areas, a preliminary cleaning is required.

**Precautions for Use:** This product is effective against a wide range of microorganisms, including bacteria, viruses, fungi, and protozoa. It is recommended for use in healthcare facilities, food processing plants, and other environments where pathogen control is necessary.

Do not mix other foam additives to the disinfecting solution. A small amount of water must be flushed down the drain to refill the container. Repeat use at least weekly or as needed to control mold and/or bacterial growth.

**DRAIN/SINK FOAM DISINFECTANT - Not for use in California:** When used as directed, this product removes and controls plugging and odors caused by accumulations of biofilms and other organic contaminants in drain systems. Deodorization will only occur on precleaned surfaces of the drain. Using a foam generator or similar device, slide foam into drain or drainage trough. Set equipment according to the manufacturer’s instructions to deliver 1:128 dilution of this product at 30 psi pressure for 10 minutes, then let air dry or rinse. Do not mix other foam additives to the disinfecting solution. A small amount of water must be flushed down the drain to refill the container. Repeat use at least weekly or as needed to control mold and/or bacterial growth.

**FOAM DISINFECTANT SOLUTIONS:**

- **SANITIZE** To prevent cross contamination from treated areas to treated areas in animal areas, and the packaging and storage areas of food plants, apply a 1:30 dilution of this product to the surface for 10 minutes. After use, surfaces in the area must be thoroughly rinsed with potable water.
- **SHOE FOAM DISINFECTANT SOLUTIONS:**
  - To prevent cross contamination from treated areas to treated areas in animal areas, and the packaging and storage areas of food plants, apply a 1:30 dilution of this product to the surface for 10 minutes. After use, surfaces in the area must be thoroughly rinsed with potable water.

**DIRECTIONS FOR USE:**

- To prevent cross contamination from treated areas to treated areas in animal areas, and the packaging and storage areas of food plants, apply a 1:30 dilution of this product to the surface for 10 minutes. After use, surfaces in the area must be thoroughly rinsed with potable water.
