Move patient to fresh air immediately. If needed, call 911 or an ambulance. Provide artificial respiration if necessary. Remove patient to fresh air if breathing is difficult. If needed, provide oxygen.

IF RUPTURED:

If rupture occurs, contact a Poison Control Center or see the product literature for immediate treatment.

IF EXPOSED:

Eye contact:

Flush eyes immediately with running water for 15-20 minutes. If a portion of the product contacts the eye, flush the eye with running water for at least 10 minutes. If necessary, see a doctor.

Skin contact:

Wash with soap and water for at least 10 minutes. If necessary, see a doctor.

Inhalation:

Move patient to fresh air. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.

If swallowed:

Do not induce vomiting. Move patient to fresh air and call a Poison Control Center or see the product literature for immediate treatment.

IF ON SKIN OR CLOTHING:

If on skin, wash with soap and water. If on clothing, remove clothing and wash with soap and water. If on skin, wash with soap and water. If on clothing, remove clothing and wash with soap and water.

IF SWALLOWED:

Do not induce vomiting. Move patient to fresh air. If necessary, contact a Poison Control Center or see the product literature for immediate treatment.

IF INHALED:

Move patient to fresh air immediately. If necessary, call 911 or an ambulance. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.

IF EXPOSED:

Eye contact:

Flush eyes immediately with running water for 15-20 minutes. If a portion of the product contacts the eye, flush the eye with running water for at least 10 minutes. If necessary, see a doctor.

Skin contact:

Wash with soap and water for at least 10 minutes. If necessary, see a doctor.

Inhalation:

Move patient to fresh air. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.

If swallowed:

Do not induce vomiting. Move patient to fresh air and call a Poison Control Center or see the product literature for immediate treatment.

IF ON SKIN OR CLOTHING:

If on skin, wash with soap and water. If on clothing, remove clothing and wash with soap and water. If on skin, wash with soap and water. If on clothing, remove clothing and wash with soap and water.

IF SWALLOWED:

Do not induce vomiting. Move patient to fresh air. If necessary, contact a Poison Control Center or see the product literature for immediate treatment.

IF INHALED:

Move patient to fresh air immediately. If necessary, call 911 or an ambulance. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.

IF EXPOSED:

Eye contact:

Flush eyes immediately with running water for 15-20 minutes. If a portion of the product contacts the eye, flush the eye with running water for at least 10 minutes. If necessary, see a doctor.

Skin contact:

Wash with soap and water for at least 10 minutes. If necessary, see a doctor.

Inhalation:

Move patient to fresh air. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.

If swallowed:

Do not induce vomiting. Move patient to fresh air and call a Poison Control Center or see the product literature for immediate treatment.

IF ON SKIN OR CLOTHING:

If on skin, wash with soap and water. If on clothing, remove clothing and wash with soap and water. If on skin, wash with soap and water. If on clothing, remove clothing and wash with soap and water.

If swallowed:

Do not induce vomiting. Move patient to fresh air and call a Poison Control Center or see the product literature for immediate treatment.

IF INHALED:

Move patient to fresh air immediately. If necessary, call 911 or an ambulance. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.

If exposed:

Eye contact:

Flush eyes immediately with running water for 15-20 minutes. If a portion of the product contacts the eye, flush the eye with running water for at least 10 minutes. If necessary, see a doctor.

Skin contact:

Wash with soap and water for at least 10 minutes. If necessary, see a doctor.

Inhalation:

Move patient to fresh air. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.

If swallowed:

Do not induce vomiting. Move patient to fresh air and call a Poison Control Center or see the product literature for immediate treatment.

IF ON SKIN OR CLOTHING:

If on skin, wash with soap and water. If on clothing, remove clothing and wash with soap and water. If on skin, wash with soap and water. If on clothing, remove clothing and wash with soap and water.

If swallowed:

Do not induce vomiting. Move patient to fresh air and call a Poison Control Center or see the product literature for immediate treatment.

IF INHALED:

Move patient to fresh air immediately. If necessary, call 911 or an ambulance. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.

If exposed:

Eye contact:

Flush eyes immediately with running water for 15-20 minutes. If a portion of the product contacts the eye, flush the eye with running water for at least 10 minutes. If necessary, see a doctor.

Skin contact:

Wash with soap and water for at least 10 minutes. If necessary, see a doctor.

Inhalation:

Move patient to fresh air. If breathing is difficult, provide oxygen. Apply artificial respiration if necessary. If necessary, seek medical attention.
