GORDON'S

TRIMEC

NUTSEDGE

PLUS LAWN WEED KILLER

CONCENTRATE

Kills Yellow Nutsedge &
200+ Broadleaf Weeds*

Treats Northern
& Southern Grasses

ACTIVE INGREDIENTS:
2,4-D, dimethylamine salt ................. 6.10%
Mecoprop-p, dimethylamine salt ........ 2.20%
Dicamba, dimethylamine salt ............ 0.57%
Sulfentrazone ............................ 0.15%
OTHER INGREDIENTS: ..................... 90.98%

See back panel for substantiation
of ingredient statement.

*As listed in attached booklet.

KEEP OUT OF REACH OF CHILDREN

CAUTION

See attached booklet for complete Precautionary
Statements and Directions for Use (including First Aid
and Storage and Disposal).

NET CONTENTS: ONE U.S. PINT (16 FL. OZ.)
4. Use Tips

An example for a hose-end sprayer is shown below:

FOR DIAL-IN HOSE END SPRAYERS WITH NO PRE-MIXING

1) From the Table below, determine amount of Trimec® Nutsedge Plus Lawn Weed Killer to treat 500 sq.ft. If more or less than 500 sq.ft. is to be treated, adjust the application rate accordingly.

2) Select the application rate from Table 1 below. Carefully measure the proper amount of product into a 1 gallon container. Keep the dial setting and clean the sprayer by rinsing the sprayer jar with water and shake well before spraying.

3) To avoid risk of lawn injury, do not spray drought-stressed lawns.

4) At 1.25 fl.oz. (2.5 Tbs.) of herbicide:

   Use on:
   - Annual bluegrass
   - Crabgrass
   - Dallisgrass
   - Dichondra
   - Kentucky bluegrass, Fescue spp., Perennial ryegrass, Bermudagrass, Bahiagrass, St. Augustinegrass, Bermudagrass, Bentgrass, and St. Augustinegrass.

5) Unused product can be returned to the original container when completed.

6) At 2 fl.oz. (4 Tbs.) of herbicide:

   Use on:
   - Crabgrass
   - Dallisgrass
   - Dichondra
   - Kentucky bluegrass, Fescue spp., Perennial ryegrass, St. Augustinegrass

7) Adjust nozzle to produce a coarse spray. Coarse sprays are less likely to drift. Avoid fine sprays which drift across lawns.

8) To BEGIN spraying:

   • For Kentucky bluegrass: To treat 1,000 sq.ft. of lawn, measure 5.0 fl.oz. of product into a 2 gallon sprayer container. Measure 2.5 fl.oz. for 500 sq.ft. of lawn. Attach hose to sprayer. Extend the garden hose to the farthest section of the lawn. Work back toward faucet so that you do not walk over treated areas. Apply evenly to lawn.

   • For other turfgrasses: Use the appropriate amount from Table 2. Attach hose to sprayer. Extend hose to the farthest area of lawn to be treated and work back toward faucet so that you do not walk over treated areas. Apply evenly to lawn.

9) After spraying:

   • Do not spray exposed roots of ornamentals and trees.
   • Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches.
   • Do not add water to the sprayer jar. Carry the jar full from treated area to partly filled:
   • Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, storm drains or storm sewers, and drain ditches.
   • Do not apply this product to food crops (gardens), forage crops, or ornamental plants established in landscape plantings.
   • Do not add water to the area calculated.
   • For pressure sprayers, mix the indicated amount of product listed above with 1 gallon of water for each 1,000 sq.ft. of lawn. Add the proper amount of water to the "gals." level. Replace sprayer top on jar and shake well before spraying.
   • Do not use on 'Floratam' or other improved varieties of St. Augustinegrass in Florida.
   • Do not spray exposed roots of ornamentals and trees.
   • Applicat...
Spray when weeds are young and actively growing with adequate soil moisture for best results. Fall applications will control weeds that may otherwise go dormant through the winter. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a tree that is young or actively growing may damage the tree. Do not apply near irrigation equipment. Site may become a hazard to children and animals if not adequately treated and steadily maintained until all water has drained from site. Do not contaminate water when disposing of equipment or unevaluated residues. This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target aquatic plants. Do not allow people or pets to enter the treated area until sprays have dried. Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-800-5556 for emergency treatment advice.

3. When To Use

SPRING:
Apply when daytime temperatures are between 50° and 85°F and soil moisture is adequate for germination and growth of treated weeds. Do not apply when rainfall or irrigation is expected for 48 hours or more after application. Do not apply broadcast treatments to turf that will be grown for hay. Where broadcast treatments have been applied to turfgrass grown for hay, use the broadcast treatments only once. For broadcast treatments, follow the steps below for proper treatment:

1. Weeds Controlled

- Yellow Nutsedge
- Venezuelan Nutsedge
- Creeping mustard
- Creeping lamb’s quarters

Trimec® Nutsedge Plus Lawn Weed Killer Concentrate

1. Weeds Controlled

- BROADLEAF WEEDS:
  - Bedstraw
  - Broomweed
  - Broadleaf dock
  - Bristly oxtongue
  - Blue vervain
  - Blue lettuce
  - Bloodflower milkweed
  - Blessed thistle
  - Black mustard
  - Black-eyed Susan
  - Bitterweed
  - Bittercress, hairy
  - Bitter wintercress
  - Bird vetch
  - Bindweed, field
  - Carolina geranium
  - Canada thistle
  - Canadian fleabane

- GRASSY WEEDS:
  - Celebration bermudagrass
  - Centipedegrass
  - St. Augustinegrass*
  - Bermudagrass
  - Bentgrass
  - Fescue spp., including tall, red and fine leaf fescues
  - Perennial ryegrass

2. Where To Use

- Cool season turfgrass:
  - This product is intended for use by homeowners on lawns including:

- This chemical has properties and characteristics associated with chemicals detected in
  surface water and in ground water and may adversely affect populations of aquatic
  organisms and wildlife. Application around a water table is shallow, may result in
  groundwater contamination. Application around a water table is not recommended.

3. When To Use

- Spray when weeds are young and actively growing with adequate soil moisture for best
  results. Fall applications will control weeds that may otherwise go dormant through the
  winter. Spraying prior to dormancy gives the best control. Spray against weeds that
  resprout the following spring.

- Use broadcast application for large treatment areas when weeds are actively growing.
  Treatments should be applied after rainfall or irrigation to assure good coverage of
  weeds for uniform coverage.

- Spot treatments are limited to 2 per year with a minimum of 30 days between
  applications. Limitations on spot treatments:
  - Do not use on 'Floratam' or other improved varieties of St. Augustinegrass in Florida.
  - Do not use this product on zoysia grass or bentgrass.
  - Do not use on 'Centurion' fescue.
  - Do not use on 'Brunner' fescue.
  - Do not use this product on waterways, drainage basins, and all other bodies of
    water.
  - Do not apply directly to water.
  - Do not contaminate water when disposing of equip-
    ment or wash water.

- Maximum number of broadcast applications is limited to 2 per year with a minimum of
  30 days between applications.

- Maximum number of spot treatments is limited to 2 per year with a minimum of
  30 days between applications.

- Do not apply more than 20 gallons of this product over 2,000 sq. ft. of a single
  broadcast treatment area.

4. How To Use

- Consult the attached booklet.

- Water in treated areas thoroughly. Nozzle adjustments may be necessary to deliver
  small spray droplets of the target weed. Thorough wetting is important for best
  results. Rainfall or irrigation may be necessary to assure good weed coverage.

- Do not make more than 2 broadcast applications per year.

- Do not use on ornamentals or garden plants. Do not contaminate water when disposing
  of equipment or wash water.

- Do not apply this product on grasses or other turf that will not withstand the
  stress of the application.

- Do not use on established turf until it becomes dormant. Turf becomes dormant after
  the fall application.

- Only apply when the temperature is above freezing and before weeds go dormant.

5. Mixing To Use

- Do not use a pump sprayer. Always use a hand or pressure sprayer for best control.

6. Personal Protective Equipment

- Avoid contact with eyes or skin. Wash thoroughly after handling.

7. Wearers Cautionary Statements

- Avoid contact with eyes or skin.

8. Spill Treatment

- Do not apply this product near ponds, lakes, streams, or other bodies of water.

- Symptoms of overexposure include:
  - Drowsiness
  - Sleepiness
  - Irritability
  - Rapid breathing
  - Loss of appetite
  - Nausea
  - Vomiting
  - Seizures
  - Convulsions

- Symptoms of overexposure to spray drift include:
  - Skin irritation
  - Eye irritation
  - Coughing
  - Difficulty breathing

- First Aid:
  - If swallowed:
    - Call a poison control center or doctor immediately for treatment advice.
  - If in eyes:
    - Remove contact lenses. Rinse eyes for 15-20 minutes; keep open.
  - If on skin:
    - Wash with plenty of soap and water for 15-20 minutes.

- Do not give anything to an unconscious person.

- Do not induce vomiting unless told to by a poison control center or doctor.

9. Additional Information

- Do not use this product on 'Floratam' or other improved varieties of St. Augustinegrass in Florida.

- Do not use this product for spot treatments on ornamentals or garden plants.

- Do not use on ornamentals or garden plants. Do not contaminate water when disposing
  of equipment or wash water.

- Only apply when the temperature is above freezing

- Use broadcast application for large treatment areas when weeds are actively growing.

  weeds for uniform coverage.

- Do not apply more than 20 gallons of this product over 2,000 sq. ft. of a single
  broadcast treatment area.

- Maximum number of spot treatments is limited to 2 per year with a minimum of
  30 days between applications.

- Do not use on ornamentals or garden plants. Do not contaminate water when disposing
  of equipment or wash water.

- Do not apply more than 2 broadcast applications per year.

- Do not use on 'Floratam' or other improved varieties of St. Augustinegrass in Florida.

- Do not use this product on zoysia grass or bentgrass.

- Do not use on 'Centurion' fescue.

- Do not use on 'Brunner' fescue.

- Do not use this product on waterways, drainage basins, and all other bodies of
  water.

- Do not apply directly to water.

- Do not contaminate water when disposing of equip-
  ment or wash water.

- Do not apply this product on grasses or other turf that will not withstand the
  stress of the application.

- Only apply when the temperature is above freezing and before weeds go dormant.

- The maximum number of broadcast applications is limited to 2 per year with a minimum of
  30 days between applications.

- The maximum number of spot treatments is limited to 2 per year with a minimum of
  30 days between applications.

- Do not apply more than 20 gallons of this product over 2,000 sq. ft. of a single
  broadcast treatment area.

- Do not use this product near ponds, lakes, streams, or other bodies of water.

- Symptoms of overexposure include:
  - Drowsiness
  - Sleepiness
  - Irritability
  - Rapid breathing
  - Loss of appetite
  - Nausea
  - Vomiting
  - Seizures
  - Convulsions

- Symptoms of overexposure to spray drift include:
  - Skin irritation
  - Eye irritation
  - Coughing
  - Difficulty breathing

- First Aid:
  - If swallowed:
    - Call a poison control center or doctor immediately for treatment advice.
  - If in eyes:
    - Remove contact lenses. Rinse eyes for 15-20 minutes; keep open.
  - If on skin:
    - Wash with plenty of soap and water for 15-20 minutes.

- Do not give anything to an unconscious person.

- Do not induce vomiting unless told to by a poison control center or doctor.

- This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target
  aquatic organisms.

- This product is toxic to bees and other pollinators. Do not apply when bees are present.

- This product contains 0.01 lb Sulfentrazone per gallon or 0.15% and 0.16 lb Mecoprop-p acid equivalent per gallon or 1.82% and 0.44 lb 2,4-D acid equivalent per gallon or 5.08%.

- Other Ingredients:
  - Dicamba, dimethylamine salt: 0.57%
  - 2,4-D, isomer Specific by AOAC Method: 0.01 lb Sulfentrazone per gallon or 0.15% and 0.16 lb Mecoprop-p acid equivalent per gallon or 1.82% and 0.44 lb 2,4-D acid equivalent per gallon or 5.08%.

- Environmental Hazards

- This product is toxic to fish and aquatic invertebrates. Do not contaminate water when disposing of equip-
  ment or wash water.

- This product is toxic to bees and other pollinators. Do not apply when bees are present.

- This product is toxic to bees and other pollinators. Do not apply when bees are present.

## PRECAUTIONS AND RESTRICTIONS

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where groundwater is used for irrigation or drinking water supplies, is not recommended. Rainfall or irrigation at least 7 days after application may be required to achieve lasting control of target weeds. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. Limitations on broadcast applications to residential turfgrass, including: Kentucky bluegrass, Bentgrass, Fescue spp., including tall, red and fine leaf fescues, Zoysiagrass, Bahiagrass, Bermudagrass, and Perennial ryegrass is 4 applications per year with a minimum of 7 days between applications. The maximum number of spot treatments is limited to 2 per year with a minimum of 30 days between applications. Limitations on spot treatments:

- Do not allow people or pets to enter the treated area until sprays have dried.
- Treats Northern & Southern Grasses
- 100+ Broadleaf Weeds *
- 200+ Broadleaf Weeds *

- Mecoprop-p, dimethylamine salt
- 2,4-D, dimethylamine salt
- Dermacol®
- Other ingredients

**Environmental Hazards**

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. Do not apply directly to water. Do not contaminate water when disposing of equipment or rinsate.

### Hazards to Humans and Domestic Animals

**CAUTION:**

- Thoroughly with soap and water after handling and before eating, drinking, or chewing gum.
- Keep out of reach of children.
- Do not drink.
- Do not inhale.
- Do not inhale spray mist.
- Do not inhale dust, fumes, or mists. Wash hands and exposed skin before eating, drinking, chewing gum, or using tobacco.

**WARNING:**

This product is harmful when ingested, inhaled, or absorbed through the skin. Avoid contact with skin and eyes. Wash hands and exposed skin after each use.

### Directions for Use

Spray when weeds are young and actively growing with adequate soil moisture for best results. Avoid spraying on sunny hot days or when weeds are dry. Avoid spraying on hot days as weed control may not be affected. Rainfall or irrigation at least 7 days after application may be required to achieve lasting control of target weeds. 

**SPRING:**

- Shake well before spraying. Spray the target weeds thoroughly with soap and water after handling and before eating, drinking, or chewing gum.
- Do not use on ‘Floratam’ or other improved varieties of St. Augustinegrass in Florida. Do not use this product on any variety of Zoysiagrass or bent grass.
- Do not use on grain crops, ornamentals, or vegetables.
- Do not exceed the maximum number of broadcast applications.
- Do not exceed the maximum number of spot treatments.
- Do not apply to any part of a treated area until the treated area is no longer accessible to livestock.
- Do not apply to anything. Wear long-sleeved shirt and long pants, shoes plus socks and gloves.

**FALL:**

- Shake well before spraying. Spray the target weeds thoroughly with soap and water after handling and before eating, drinking, or chewing gum.
- Do not apply to anything.
- Do not apply to anything.
- Do not apply to anything.
- Do not apply to anything.
TRIMEC® NUTSEDGE PLUS LAWN WEED KILLER

Kills Yellow Nutsedge & 200+ Broadleaf Weeds
Trace® Northern & Southern Grasses

DIRECTIONS FOR USE

Apply when weeds are young and actively growing with adequate soil moisture for best results. Use Trimec® at the rate recommended for broadcast applications to turfgrass...
FOR USE ONLY AS DIRECTED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE MANUFACTURER NEITHER MAKES NOR INTENDS ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY EXPRESSLY DISCLAIMED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO CASE SHALL THE MANUFACTURER BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL, OR SPECIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT.

Three easy steps to mix and apply with hand-operated sprayers:

1) Spray during growing season when weeds are actively growing.
2) For best results, mow lawn 2 to 3 days before treating weeds.
3) Do not apply this product to newly seeded grasses until well-established or after the third mowing.

To BEGIN spraying:

1) From the Table below, determine amount of Trimec® Nutsedge Plus Lawn Weed Killer concentrate required to treat each 1,000 sq. ft. of lawn.
2) Pour concentrate into sprayer jar to the required "fl. oz." level.
3) Set dial on sprayer to the "Rate per Gallon" setting from the Table below.
4) At the "Rate per Gallon" setting from the Table below, fill sprayer jar with enough concentrate to cover area to be treated. Do not add additional water to the sprayer jar.
5) Unused product can be returned to the original container when completed.

Acknowledgement

This product is registered with the U.S. Environmental Protection Agency. Its registration is based on its effectiveness against certain weeds and its low potential for harm to beneficial organisms and the environment. The use of this product, when used according to the label directions, will limit its impact on beneficial organisms and the environment.

The product performance claims are based on efficacy testing conducted by the manufacturer and verified by University and State personnel. It is made with the belief that the product will as set forth on the label, but it is the user’s responsibility to ensure that the product is applied in accordance with the label directions.

STORAGE AND DISPOSAL

Store contents under cover and out of the reach of children and pets. Do not store near food or food containers. Discard empty product container after use. Clean up spills as follows:

• Clean up spills on concrete, asphalt, metal, and concrete with water and a broom or garden hose. Allow to dry before walking on. Do not allow to puddle. Do not allow to enter storm drains.
• Clean up spills on grass and turfgrass with water and a broom or garden hose. Allow to dry before walking on. Do not allow to puddle. Do not allow to enter storm drains.
• Clean up spills on hard plastics, stone, and concrete with a dry cloth or broom. Do not allow to enter storm drains.

LIMITED WARRANTY AND DISCLAIMER

FOR USE ONLY AS DIRECTED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE MANUFACTURER NEITHER MAKES NOR INTENDS ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY EXPRESSLY DISCLAIMED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO CASE SHALL THE MANUFACTURER BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL, OR SPECIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT. THE MANUFACTURER MAKES NO REPRESENTATION OR WARRANTY OTHER THAN THOSE EXPRESSLY STATED HEREIN. THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY LOSS, INJURY, OR DAMAGE TO REAL OR PERSONAL PROPERTY THAT OCCURS AS A RESULT OF THE USE OF THIS PRODUCT.

There is a risk of injury by the application of this product. Always wear a respirator and protective clothing when applying this product. Use this product only when you are completely familiar with its hazards and have read and understood the label instructions. If you have questions about the use of this product, contact the manufacturer at 855/8-2011 or www.pbigordon.com.

In the event of skin contact or eye contact, wash with soap and water or, if necessary, with a suitable eye cleanser. In case of ingestion, do not induce vomiting. Call a poison control center or physician immediately. Call 855/8-2011 for additional information.

Do not apply this product to food crops (gardens), forage crops, or ornamental plants. Follow the instructions on the label. Wash the application tools with soap and water before and after use. Keep the dial setting and clean the sprayer by rinsing the sprayer jar with water for one minute.

Do not contaminate water, food, or feed by storage and disposal. Dispose of empty product container per local regulations. Place in trash or offer for recycling if available.

Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. To prevent product run-off, do not water within 6 hours after treatment. Poor weed control may result if rainfall occurs within 3 hours of application.

Do not apply this product to newly seeded grasses until well-established or after the third mowing. Do not apply as a fine mist because of potential for injury to desirable plants. Do not use on 'Floratam' or other improved varieties of St. Augustinegrass in Florida. Do not add water to the sprayer jar.

Do not use this product on carpetgrass, dichondra, legumes, or lawns containing desirable trees and shrubs, since injury may result.

Do not apply this product on carpetgrass, dichondra, legumes, or lawns containing desirable trees and shrubs, since injury may result.

Do not apply this product as a fine mist because of potential for injury to desirable plants. Do not use on 'Floratam' or other improved varieties of St. Augustinegrass in Florida. Do not add water to the sprayer jar.

Do not apply this product to food crops (gardens), forage crops, or ornamental plants. Follow the instructions on the label. Wash the application tools with soap and water before and after use. Keep the dial setting and clean the sprayer by rinsing the sprayer jar with water for one minute.

Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. To prevent product run-off, do not water within 6 hours after treatment. Poor weed control may result if rainfall occurs within 3 hours of application.

Do not apply this product to newly seeded grasses until well-established or after the third mowing. Do not apply as a fine mist because of potential for injury to desirable plants. Do not use on 'Floratam' or other improved varieties of St. Augustinegrass in Florida. Do not add water to the sprayer jar.

Do not use this product on carpetgrass, dichondra, legumes, or lawns containing desirable trees and shrubs, since injury may result.
Three easy steps to mix and apply with hand-operated sprayers:

1. Measure the total lawn area to be treated. This is done by multiplying the length of the lawn by the width of the lawn. The total lawn area calculated is the area to be treated.

2. Select the application rate from Table 1 below. Carefully measure the proper amount of concentrate to be applied per 1,000 sq.ft. of lawn.

3. Shake the spray solution before and during application. Use a spray pattern that gives small droplets without any fine mist.

For Concentrate-Plus-Water Sprayers or Hose-End Sprayers:

1. From the Table below, determine amount of Trimec® Nutsedge Plus Lawn Weed Killer Concentrate to be applied for each 1,000 sq.ft. of lawn.

2. Fill sprayer jar with enough concentrate to cover area to be treated. Do not add any water to the sprayer jar.

3. At the time of use, measure and add the exact amount of concentrate indicated above to the sprayer jar. Return unused concentrate and any additional concentrate you will not use to the original container.

4. Do not apply this product to newly seeded grasses until well-established or after the third mowing.

5. Do not apply this product to newly seeded grasses until well-established or after the third mowing.

6. Treated areas may be reseeded 3 to 4 weeks after application.

7. Adjust nozzle to produce a coarse spray. Coarse sprays are less likely to drift. Avoid fine mists.

For dial-in hose-end sprayers with no pre-mixing:

1. Measure the total lawn area to be treated. This is done by multiplying the length of the lawn by the width of the lawn. The total lawn area calculated is the area to be treated.

2. Select the application rate from Table 1 below. Carefully measure the proper amount of concentrate to be applied per 1,000 sq.ft. of lawn.

3. Shake the spray solution before and during application. Use a spray pattern that gives small droplets without any fine mist.

4. Fill sprayer jar with enough concentrate to cover area to be treated. Do not add any water to the sprayer jar.

5. At the time of use, measure and add the exact amount of concentrate indicated above to the sprayer jar. Return unused concentrate and any additional concentrate you will not use to the original container.

6. Do not apply this product to newly seeded grasses until well-established or after the third mowing.

7. Adjust nozzle to produce a coarse spray. Coarse sprays are less likely to drift. Avoid fine mists.

EXAMPLE:

An example for a hose-end sprayer is shown below:

1. Measure the total lawn area to be treated. This is done by multiplying the length of the lawn by the width of the lawn. The total lawn area calculated is the area to be treated.

2. Select the application rate from Table 1 below. Carefully measure the proper amount of concentrate to be applied per 1,000 sq.ft. of lawn.

3. Shake the spray solution before and during application. Use a spray pattern that gives small droplets without any fine mist.

4. Fill sprayer jar with enough concentrate to cover area to be treated. Do not add any water to the sprayer jar.

5. At the time of use, measure and add the exact amount of concentrate indicated above to the sprayer jar. Return unused concentrate and any additional concentrate you will not use to the original container.

6. Do not apply this product to newly seeded grasses until well-established or after the third mowing.

7. Adjust nozzle to produce a coarse spray. Coarse sprays are less likely to drift. Avoid fine mists.

STORAGE AND DISPOSAL

Follow container instructions. Store in original container in a locked storage area inaccessible to children and pets. Consult local regulations for proper disposal. Do not allow product to contact desirable trees and shrubs, since injury may result.

Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. To prevent product run-off, do not apply to lawn during or immediately before rain. Rinse applicator over lawn area only. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans.

Keep the dial setting and clean the sprayer by rinsing the sprayer jar with water for one minute.

Do not apply in the landscape plantings of food crops, fruit crops, or ornamental plants. Do not apply this product on turf areas adjacent to swimming pools, wells, or other bodies of water or septic systems.

Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans.

STORAGE AND DISPOSAL

Follow container instructions. Store in original container in a locked storage area inaccessible to children and pets. Consult local regulations for proper disposal. Do not allow product to contact desirable trees and shrubs, since injury may result.

Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. To prevent product run-off, do not apply to lawn during or immediately after rain. Rinse applicator over lawn area only. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans.

Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans.

---

**PREPARATION:**

1. From the Table below, determine amount of Trimec® Nutsedge Plus Lawn Weed Killer concentrate required to treat each area.
2. For best results, mow lawn 2 to 3 days before treating weeds.
3. To avoid risk of lawn injury, do not spray drought-stressed lawns.
4. Do not apply as a fine mist because of potential for injury to desirable plants. Do not use on food crops, forage crops, or ornamental plants.
5. Do not apply to food crops (gardens), forage crops, or ornamental plants.
6. For pressure sprayers, mix the indicated amount of product listed above with 1 gallon of water for each 1,250 sq.ft. of lawn to be treated. For hand-operated sprayers (backpack, knapsack, tank-type, or pump-up), mix the product per label directions. Unused product can be returned to the original container when completed.

**APPLICATION:**

1. Measure the total lawn area to be treated.
2. Rotate sprayer nozzle tip to direct spray up or down.
3. Turn on water back toward faucet so that you do not walk over treated areas. Apply evenly to lawn.
4. Do not add water to the sprayer jar. Set dial on 4 Tbs. and spray uniformly.
5. Adjust nozzle to produce a coarse spray. Coarse sprays are less likely to drift. Avoid fine sprays.
6. Do not use on ‘Floratam’ or other improved varieties of St. Augustinegrass in Florida. Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches.
7. Adjust nozzle to produce a coarse spray. Coarse sprays are less likely to drift. Avoid fine sprays.
8. If certain tough weeds are not dead within 3 weeks, repeat application using spot treatments.
9. If empty:
   - Store in original container in a locked storage area inaccessible to children or pets.
   - Do not contaminate water, food, or feed by storage and disposal.
   - PEB: Store in original container in a locked storage area inaccessible to children or pets.
   - Do not contaminate water, food, or feed by storage and disposal.

**STORAGE AND DISPOSAL:**

Store under conditions preventing freezing temperatures until application. Store in original container in a locked storage area inaccessible to children or pets. Do not contaminate water, food, or feed by storage and disposal.

**LIMITED WARRANTY AND DISCLAIMER:**

To the extent consistent with applicable law, the manufacturer makes no warranties, whether express or implied, of merchantability or fitness for any particular purpose, with the exception of the limited warranty set forth hereafter. The manufacturer does not warrant that the product will meet user’s requirements, that the operation of the product will be uninterrupted or error free, that any defects in the product will be corrected, or that the user will be able to use the product for any particular purpose.

The manufacturer specifically disclaims all other warranties, whether express or implied, of merchantability or fitness for any particular purpose. The manufacturer shall not be liable for incidental, consequential, or special damages resulting from the use or handling of this product. If these terms are not acceptable, return this product unused product down any indoor or outdoor drain.

To treat 1,000 sq.ft. of fescue pour in concentrate to the 5 fl.oz. mark and add additional water to the sprayer jar.
PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals
CAUTION: Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear long-sleeved shirt and long pants, shoes plus socks and gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

<table>
<thead>
<tr>

<tr>
<td>• Do not induce vomiting unless told to by a poison control center or doctor.</td>
</tr>
<tr>
<td>• Do not give anything to an unconscious person.</td>
</tr>
</tbody>
</table>

| If in eyes: |
| • Hold eye open and rinse slowly and gently with water for 15-20 minutes. |
| • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. |
| • Call a poison control center or doctor for treatment advice. |

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-800-5556 for emergency medical treatment advice.

STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.
