Phytotoxicity Note: Plant safety is an important consideration when using insecticides. However, it is not possible to evaluate the potential adverse effects of this product on numerous plant varieties that may react differently to insecticides in different growth stages or under varying environmental conditions. Before making widespread applications of this product treat a limited number of plants and observe for adverse effects over a one to 10 day period.

HOW TO APPLY: Wearing household latex or rubber gloves, use this ready-to-use bottle to apply product. Water plant thoroughly. Turn spray nozzle to the on position, and hold spray nozzle about 12" from the plants. Spray thoroughly covering, contacting insects on upper and lower leaf surfaces until surfaces are slightly wet. Avoid over-saturating. (Many insects hide on the underside of the leaf.) Apply when air is calm to avoid drift and contact with eyes and skin. Start applying at the farthest corner of the treatment area and work backward. Allow liquid to dry in treated areas before re-entering.

Wash hands thoroughly after handling and before eating or smoking. Do not allow spray to drift to non-target plants or water supplies. Wash all fruits and vegetables before eating. Avoid contamination of food and feedstuffs.

WHEN TO APPLY: Use at first signs of insect infestation, preferably before damage and feeding occurs. Do not wait until plants are heavily infested. Spray may be applied up to and including day of harvest.

For Best Results: Apply in the twilight hours of the evening or just before sunrise to avoid possible harm to honey bees. Honey bees normally forage during the daylight hours, when the temperatures reach or exceed 55 degrees F.

WHERE TO USE: On Vegetables, Fruit and Nut Trees, Fruits, Nuts, Roses, Flowers, Ornamentals, Herbs, Spices, Shrubs, Bushes, Evergreens, Shade Trees. Do not use on lawns or large trees. For trees taller than 10 feet, consider hiring a licensed professional.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

CAUTION
Harmful if swallowed. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing.
Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, ditches, ponds, rivers, or other waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

PHYSICAL OR CHEMICAL HAZARDS
Do not use this product in or on electrical equipment because of shock hazard.
