2382-187 Effitix Topical Solution for Dogs 45 to 88.9 lbs_20131203_53.pdf
EFFITIX
Topical Solution for Dogs

FOR USE ON DOGS AND PUPPIES 8 WEEKS OLD OR OLDER
For convenient, quick-acting, long-lasting, effective control of fleas, ticks, mosquitoes, and lice.

- Easy and convenient application
- Stops sucking installeuses and prevents establishment of new installeuses for fleas and ticks
- Starts working on contact
- Waterproof
- Prevents re-infestation for one month
- Repels effective even after bathing, water immersion, or exposure to rain or sunlight
- Kills newly emerged adult fleas prior to egg laying
- Kills fleas that may transmit the following diseases: bartonellosis, tuberculosis, and tapeworm infections
- Kills ticks that may cause Ehrlichiosis (Ehrlichia canis) or Rocky Mountain Spotted Fever, babesiosis, anaplasmosis
- Kills and repels all stages of brown dog ticks, American dog ticks, Lone Star ticks, and Drier lice (that may transmit Lyme disease, Rocky Mountain Spotted Fever, babesiosis, anaplasmosis, and sarcoptes)
- Kills and repels mosquitoes
- Repels and prevents blood-feeding by biting flies
- Kills lice and ants in the control of sanitary mites
- Prevents and controls lice infestations

*FIRST DIRECTIONS* for the use of EFFITIX Topical Solution for Dogs contains the active ingredients fipronil and permethrin, which control installeuses caused by fleas, ticks, and lice, adult, larval, and nymphal stages of mosquitoes.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

- HAZARDS TO HUMANS
  Harmful if swallowed or absorbed through the skin. Causes eye irritation. Avoid contact with skin, eyes, or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

- HAZARDS TO DOMESTIC ANIMALS
  Do not use on puppies under 8 weeks of age. Individual sensitivities, while rare, may occur after using any insecticide product. Dogs may exhibit some temporary irritation at the site of product application. If signs of sensitivity occur, bathe your pet with mild soap or shampoo and rinse with large amounts of water. If signs of sensitivity occur and persist, contact a veterinarian immediately. If your dog has an unusual reaction to the initial application, consult a veterinarian before resuming applications. Certain medications can interact with pesticides. Consult a veterinarian before using on medicated, discolored, aged, pregnant or nursing dogs, or animals known to be sensitive to pesticide products.

FIRST AID

IF SWALLOWED:
- Call a poison control center or doctor immediately for treatment advice.
- If there is no danger, wash person's mouth with water. If able, to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything to an unconscious person.

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

How Product Container or Label with you when calling a poison control center or doctor. Additionally, you may want to call the emergency medical treatment information or pesticide incidents.
