Inspire Super®

Fungicide

Active Ingredients:
Difenoconazole* ........................................................................................................ 8.4%
Cyprodinil** ............................................................................................................. 24.1%
Other Ingredients: 67.5%
Total: 100.0%

*CAS No.119446-68-3
**CAS No. 121552-61-2

Contains 0.73 lbs. of difenoconazole active ingredient and 2.09 lbs of cyprodinil active ingredient per gallon.

KEEP OUT OF REACH OF CHILDREN.

CAUTION

EPA Reg. 100-1317

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed. Before using Inspire Super as permitted according to this supplemental label, read and follow all applicable directions, restrictions, and precautions on the EPA registered label on or attached to the pesticide product container. This Supplemental Labeling contains revised use instructions and or restrictions that may be different from those that appear on the container label. This Supplemental Labeling must be in the possession of the user at the time of pesticide application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Application:** Application may be by ground or air. For best results, sufficient water volume must be used to provide thorough coverage. Use a minimum of 10 gallons/A spray volume by air. Use a minimum of 50 gals./A for ground applications. If using more than 40 gal/A, refer to Application Instructions under MIXING AND APPLICATION METHODS.

**Specific Use Restrictions:**
- Make no more than two applications by air.
- Do not apply Inspire Super to sweet cherries.
- Do not apply more than 80 fl. oz. of Inspire Super per crop per year.
- Do not apply more than 0.46 lb. ai/A of difenoconazole containing product per crop per season.
- Do not apply more than 1.4 lb. ai/A of cyprodinil containing products per crop per year.
- Do not apply within 2 days of harvest (2 day PHI).

| Strawberries | Anthracnose  
\( (Colletotrichum\) spp.)  
Gray mold  
\( (Botrytis\) cinerea)  
Leaf spot  
\( (Cercospora\) fragariae)  
Powdery mildew  
\( (Sphaerotheca\) macularis)  
Leaf rust  
\( (Phragmidium\) potentillae)  | 16-20             | Begin applications prior to disease onset when conditions are conducive for disease. Apply Inspire Super on a 7-14 day schedule making no more than 2 sequential applications before alternating to another fungicide with a different mode of action.  
Optional language if label has a rate range:  If disease pressure is high, use the highest rate.  
Optional language if label has a single rate:  If disease pressure is high, use the shortest interval.  
Optional language if label has a rate range and interval range:  If disease pressure is high, use the shortest interval and highest rate. |

**Application.** Application may be by ground, air, or chemigation. For best results, sufficient water volume must be used to provide thorough coverage. Use a minimum of 10 gallons/A spray volume by air. Use a minimum of 10 gals./A for ground applications. If using more than 40 gal/A, refer to Application Instructions under MIXING AND APPLICATION METHODS. For chemigation, apply in 0.1-0.25 inches/A of water. Chemigation with excessive water may lead to a decrease in efficacy.

**Specific Use Restrictions:**  
- Make no more than two applications by air.  
- Do not apply more than 80 fl. oz. of Inspire Super per crop per year.  
- Do not apply more than 0.46 lb. ai/A of difenoconazole containing product per crop per season.  
- Do not apply more than 1.3 lb. ai/A of cyprodinil containing products per crop per year.  
- May be applied the day of harvest (0 day PHI).
