Duraturf™ WEED & FEED

with slow release (N) FERTILIZER
Treats up to 5,000 sq. ft.
16-0-8

Controls over 200 weeds!
Including Dandelion, Chickweed, Knotweed

Slow-release nitrogen-helps provide extended feeding
Phosphate-free fertilizer

Phase 2 of a 4 phase process for best results

Kills weeds and fertilizes the lawn

contains VIGOR-X™

Contains iron for deep greening

Keep Out Of Reach Of Children
CAUTION-PRECAUCION
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail)

ACTIVE INGREDIENTS:
2,4-Dichlorophenoxyacetic Acid 0.860%
2-Chloro-4-(octylamino)phenoxyacetic Acid 0.234%
N-Denguyl-2-chloro-4-(octylamino)phenoxyacetamide 0.234%
N-Denguyl-2-chloro-4-(2-hydroxyethylamino)phenoxyacetamide 0.234%
TOTAL 1.538%

Net Wt. 16 LBS (7.25 kg)
DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. READ LABEL BEFORE USING THIS PRODUCT. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

This product is a stable mixture of four herbicides. It is for use on residential turf.

Not for use on food grown for sale or other commercial use as sod, or commercial seed production, or for research purposes.

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow pets or people to enter the treated area until dusts have settled.

Do not apply directly or apply near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of water, fish ponds, lakes, streams, reservoirs, marshes, bays, and oceans. Do not apply directly to water. This product, its residues, or any of its respective ingredients, may be hazardous to the aquatic environment.

This product is also hazardous to live bees. Do not apply when bees are actively flying around the lawn on the driveway, sidewalk, gutter, or street back onto the treated area. To prevent product run-off, do not over-water the treated area or water the treated area during or for 72 hours after when rain is expected that day.

The maximum number of applications per treatment site is 2 per year.

This product may be used on Bahia, common Bermudagrass, Blue Grasses, Centipede, Fescue, Ryegrass, and Zoysia grass. DO NOT USE on Dichondra and Carpet grass. DO NOT USE this product where desirable clovers are present or allow the product to "drift" onto flowering plants, vegetables, ornamentals, shrubs, trees, or other desirable plants.

WHEN TO APPLY

Best results are obtained when weeds are growing actively in Spring or early Fall. Avoid contact with the treated area. Do not apply the product to plant, flowers, or vegetables; especially when applying with a rotary (spinning) type spreader. Do not apply for at least 4 or 7 weeks after application. Do not apply to recently mowed or newly seeded lawns until 2 or 3 days after mowing. For optimum results (1) Avoid mowing 1 to 2 days before and after application; (2) Apply on dry, non-wet soil. Reduce setting for slower drying conditions and increase setting for higher speed dryer. If you spreader can be used on land with poor drainage, clean the spreader thoroughly to prevent over-application. Practice appropriate storage in 30 days may be necessary if farm is heavily overgrown with weeds or adverse local moisture conditions prevail and when the water table is at a state of high pressure, as great injury may occur because damage to leaf may occur.

NOTE: When applying to Southern Grasses - under conditions of moderate moisture, high temperature and high humidity, over-application may cause minor translucency discoloration on Centipede and St Augustine grasses. It is recommended that during hot, dry conditions, application rates should be reduced 50% to avoid possible defoliation or burning of grass.

HOW TO APPLY

This 15 pound bag should be used on 5,000 square feet. Apply evenly with a lawn spreader as a one pass application. No one pass application, cross-cutting the rows at the rate the rows cross each other is also acceptable.

The following settings are approximately for applying contents of this package at a suggested rate of 3.2 pounds per 1,000 square feet. These settings are only a guide. Age, spreader condition, operating speed, and unevenness of terrain can cause variation in application rates. Settings are based on the assumption that the weather is favorable with low or no wind and the spreader is operating at its maximum speed. To avoid over-application, keep your spreader at 250 square feet and adjust to apply the at the rate of 0.8 pounds per 250 square feet.

SPREADER SETTINGS

| Drop Spreader | 6.5 | Republic EZ #3593 | 6.5 | Jonathan Green/precision | 1.5 |
| Rotary Spreaders | 2.5 | Scott Deluxe | 1.5 | Earthway | 1.5 |
| Grasshopper | 1.5 | Jonathan Green/precision | 3.5 |

Sweep (do not wash) at fertilizer materials from surfaces immediately after application, because certain fertilizer materials may cause damage. Sweep a spreader after each use and store it dry after using.

PRECAUTIONARY STATEMENTS

CAUTION - Pesticide: Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Follow all label instructions, when applying, over-exposed areas, and clean-up areas. Do not apply to soil which will be used for growing food, flowers, or vegetables. When applying this product, remove clothing and launder separately before reuse, and pneumatically and thoroughly wash hands with soap and water.

USER SAFETY RECOMMENDATIONS

Users Should:

- Wear protective clothing, including shoes and long pants, and gloves, when handling and applying this product. Do not apply the product, remove clothing and launder separately before reuse, and pneumatically and thoroughly wash hands with soap and water.

- Remove PPE immediately after handling this product. Wash the outside of gloves before removing.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and may severely adversely affect non-target plants. To protect the environment, do not allow pesticide to enter or runoff into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when wind is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems. This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where wells are permitted, particularly where the water table is shallow, may result in groundwater contamination. Application according to a citizen or may result in contamination of drinking water or groundwater.

CAUTION - Boron and molybdenum are recommended for all crops where boron and molybdenum may be deficient; however, excessive application to susceptible crops may cause damage. Cropped high in molybdenum may be toxic to ruminant animals.

Aluminum typically will utilize 1 to 4 pounds of nitrogen per 1,000 square feet per growing season. When used as a nutrient source, this product will supplement your regular fertilizer program by providing 0.5 to 5 pounds of nitrogen per 1,000 square feet and herbicide to control listed weeds. Please consult your local extension office for questions regarding a regular fertilizer program.
