It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Please read entire label and use strictly in accordance with precautionary statements and directions. Do not use under conditions of water or conditions of contamination from one of this product to impair cope for food or feed. This product contains no special equipment for treating swimming pool water. The correct use of this product may be added directly to the pool or mix or added to the water circulation equipment. This product works best when added directly to the pool water.

INITIAL APPLICATION FOR SWIMMING POOLS

1. Backwash the filter thoroughly.
2. Vacuum algae debris and thoroughly brush pool.
3. Add 25% of the product of each 35,000 gallons of water or 1,000 gallon increment. Vacuum pool after 24 hours to remove dead algae. If algae is still visible move closer, steps 3 & 4, no necessary until pool is free of visible algae. Once algae are under control, clean filter and return to normal operation.

MAINTENANCE APPLICATION: Add 25% excess of this product in 35,000 gallons of water every 3-5 days as needed.

BOOSTER APPLICATION: Add 6.5% excess of this product in 5,000 gallons of water after a heavy or prolonged rainfall or when there is a heavy bather load, the above directions must be followed even when the pool is in use. Algae growth is noticeable, apply initial dose.

VACATION TREATMENT: When you are going to be away for one week or more add 4.6% excess of this product per 10,000 gallons of water for every week uninterrupted. Pour product around the edges of the shallow end of the pool. If stock is also being applied in the deep end of pool.

INSTRUCTIONS FOR USE WITH HALOGEN BASED POOL SANITIZERS

This product is formulated to complement most swimming pool sanitizers. When using other products as outlined in Directions For Use on these products, always follow Directions For Use on these products. This product is effective against the growth of algae. This product is efficient and non-staining when used as directed.

This product will not evaporate and its algae fighting abilities actually increase as pool water temperature increases. Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH between 7.2-7.6. Adjust chlorine residual to 1-5 ppm in a chlorinated pool. Add stabilizer to establish a minimum level of 40-50 ppm to return the degradation effects of sunlight upon the chlorine residual. Check for floats and if present add salt and scale inhibitor to prevent staining or pass through a carbon filter. Check chlorine residual at least once per week. Maintain sanitier residual in accordance with label directions found on your sanitier of choice. When using other products as outlined in directions for this product, always follow directions on those products. Add the product directly into pool by pouring around entire outside perimeter of pool. Allow the filter to run for at least 8 hours after adding algicide. During this period, swimmers must not be allowed into the water.

STORAGE AND DISPOSAL

Do not store near water, food, or feed by storage and disposal. Non-refillable container. Store in original container in areas inaccessible to small children. Keep from freezing. Do not for recycling if available or wrap and discard in trash or recycle.
