DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Algicide 60 is used to control the growth of algae in swimming pools, exterior spas, whirlpools, hot tubs, decorative fountains, and ponds that do not contain fish. For maximum effectiveness pools, spas, whirlpools, hot tubs, decorative fountains, and ponds containing heavy growth of algae must be shocked and cleaned prior to using Algicide 60.

For pools having just visible algae growth, add an initial dose of 11 to 17 fluid ounces of Algicide 60 per 10,000 gallons of water and remove settled algae. For treatment of freshly cleaned and filled pools add initially 6 to 11 fluid ounces of Algicide 60 per 10,000 gallons of water.

Maintenance Dosage: Subsequent additions of 2 to 4 fluid ounces of Algicide 60 per 10,000 gallons of water must be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools, hot tubs, decorative fountains and ponds having just-visible algae growth require an initial dose of 1 to 2 fluid ounces of Algicide 60 per 1,000 gallons of water. For treatment of a freshly cleaned and filled spa, whirlpool, hot tub, decorative fountain or pond, add initially 0.6 to 1.1 fluid ounces of Algicide 60 per 1,000 gallons of water.

Maintenance Dosage: Subsequent additions of 0.2 to 0.4 fluid ounces of Algicide 60 per 1,000 gallons of water must be made every 5 to 7 days after initial treatment for maintenance.

WINTERIZING DIRECTIONS

Algicide 60 will prevent growth of most algae during the off-season winter months when pools are not in use. For pools which have been properly treated during the swimming season and are free of visible algae, add 6 to 10 fluid ounces of Algicide 60 per 10,000 gallons of water. If at the end of swimming season pools have some visible algae growth, add 12 to 17 fluid ounces per 10,000 gallons. It is necessary that a uniform distribution of algicide throughout the water and the pool be made for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the season.

Algicide 60 is compatible with those chemicals normally used in treatment pools and spas and is effective at both acid and alkaline pH. Algicide 60 can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Algicide 60 with concentrated dry or liquid chlorine products.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

STORAGE AND DISPOSAL

Keep container closed when not in use. Store in an area inaccessible to children and persons unfamiliar with its use. Leaking or damaged containers must be placed in a plastic bag and discarded in the trash. Mop up spills with clear water. Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If not, discard in trash.

ACTIVE INGREDIENT:

Polymerized Polyphenylene Oxide

WEIGHT INGREDIENTS:

Net wt. 40 oz. (1.138 ml)

This product contains 7.78 lb. of active ingredient per gallon and weighs 0.6 lb. per gallon.

FIRST AID:

Have the product container or label with you when calling a poison center or doctor for treatment. If in EYES: Hold eye open and rinse slowly and gently with water for 15 minutes. Remove contact lenses, if worn, at least 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor for treatment advice. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance. Give artificial respiration, if needed, or mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice. IF SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
