FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes. Continue rinsing eye. Call a poison control center or doctor for further advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance. If breathing is difficult, give mouth-to-mouth resuscitation. If breathing stops, give artificial respiration. Call a poison control center or doctor for further advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for further advice.

IF SWALLOWED: Call a poison control center or doctor immediately for further advice. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or when seeking treatment. You may also contact 1-800-929-3676 for emergency medical treatment information.

NOTE TO PHYSICIAN: Probable mucosal damage may require the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE. MAY BE FATAL IF INHALED. HARMFUL IF SWALLOWED OR ABSORBED THROUGH SKIN. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and footwear before reuse.

PHYSICAL OR CHEMICAL HAZARDS

STINGING OXIDIZING AGENT: Use only clean utensils. Mix only into water. Contamination with moisture, other organic matter or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, formation of hazardous gases and possible generation of smoke and explosion. Avoid any contact with flammable or burning material such as a lit candle. Do not use this product in any chlorinating device which has been used with any inorganic or unstable chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read the entire label and use strictly in accordance with precautionary statements and directions.

FOR SWIMMING POOL DISINFECTANT: When used as directed, this product is effective as a swimming pool water disinfecting agent. The dosage necessary for your pool will change considerably depending upon those factors that burden the disinfection system. Some of the factors that will vary the required dosages are water temperature, bather load, exposure to windblown debris, thunder or rain storms and length of filtration cycle.

DIRECTIONS FOR USE: Ensure all pool equipment is working properly, backwash the filter system following manufacturer’s directions. Adjust pH to between 7.2-7.8. Add stabilizer to establish a minimum level of 30-40 ppm to reduce the degrading effects of sunlight upon the chlorine residuals. Check for metals. Before using this product, add stain and scale inhibitor to prevent staining of pool surface due to metals. When using other products as outlined in the directions for this product, always follow directions on those products.

With pump running, broadcast 4 ounces of this product per 10,000 gallons directly into the water in the deep end of the pool as an initial treatment. Repeat additions until a residual of 1-3 ppm chlorine is established as determined by the use of a test kit. To prevent damage to pool surface, use a pool brush to disperse granules that may have settled to the bottom of the pool. NEVER ALLOW UNSOLVED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. Regular use of a test kit is necessary to determine when it is necessary to add another dose of this product to maintain a residual of 1-3 ppm available chlorine in the pool water. An average daily dose requirement is 2-3 oz. of this product per 10,000 gallons of water. After use of this product it is recommended that a preventative algae treatment be added on a weekly basis.

FOR SUPERCHLORINATION: Broadcast one pound of this product per 10,000 gallons directly into the water in the deep end of the pool. To prevent damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of your pool. NEVER ALLOW UNSOLVED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. In water temperatures less than 70°F, or at all alternative application procedures, pre-dissolve this product prior to applying evenly to the deep end of the pool. Dissolve this product outdoors, in a clean plastic bucket stirring with a clean plastic or wooden spoon. Add this product to water; NEVER add water to product. NEVER add more than one pound of this product to 3 gallons of cool water. Do not mix with other products when pre-dissolving.

REENTRY: Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine due to risk of harm.

FOR SWIMMING POOL ALGAE: When used as directed, this product kills algae and will rid your pool of any algae or algae-related algae spots. This product is ideal for use in vinyl lined, fiberglass or concrete pool surface pools.

DIRECTIONS FOR USE: Ensure all pool equipment is working properly. Backwash the filter system following manufacturer’s directions. Adjust pH to between 7.2-7.8. Check for metals and if present, add stain and scale inhibitor to prevent staining of pool surface. When using other products as outlined in the directions for this product, follow directions on those products. Before using this product, brush all surfacing-clinging algae paying special attention to pool steps, ladders, steps and around skimmer and lights. At night, or when pool is not in use, broadcast this product directly into the deep end of the pool with pump running. Use two pounds per 10,000 gallons for medium to heavy algae growth and one pound per 10,000 gallons for light algae growth. To prevent possible damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool. Brush any remaining algae and clean backchannel filter. If algae is still visible, repeat treatment.

FOR WINTERIZING POOLS: To avoid costly spring problems (algae, stains, cloudy water, high chlorine demand) properly prepare your pool for the winter using this product. This product oxidizes organic wastes, provides long term algae protection, helps keep pool surfaces clean, and helps protect water during the off season months.

DIRECTIONS FOR USE:NOTE: FOR WHITE PLASTER POOLS, broadcast this product directly into the pool water.

FOR VINYL, FIBERGLASS, PANTED AND COLORED PLASTER POOLS, PRE-DISSOLVE THE RECOMMENDED DOSE. Dissolve this product outdoors, in a clean plastic bucket stirring with a clean plastic or wooden spoon. Add this product to water; NEVER add water to product. NEVER add more than one pound of this product to 3 gallons of cool water. Do not mix with other products prior to discharging. Before treating the pool, chemically balance the water and adjust pH to 7.4-7.8. Brush and vacuum the pool. Backwash the filter and clean skimmer, pump baskets, and filter. Siphon the clarifier or use the pre-flocculated treatment dose (see NOTE above) into the pool. Use one pound of this product per 10,000 gallons of water. Circulate water for several hours, then apply a winterizing algae treatment following appropriate directions. Cut off pump. Drain equipment or add a swimming pool drain cover to equipment to prevent freeze damage. Install pool cover. A second treatment of the product in mesh covered or non-covered pools may be required prior to water freezing (mid-winter). If second treatment is required, re-disperse treatment (see NOTE above) and pour along sides of the pool.

FOR SPA AND HOT TUB DISINFECTANT: When used as directed, this product is effective as a spa and hot tub water disinfecting agent.

DIRECTIONS FOR USE: Ensure all spa and hot tub equipment is working properly. Backwash the filter system following manufacturer’s directions. Adjust pH to between 7.2-7.8. When using other products as outlined in the directions for this product, always follow directions on those products.

MAINTENANCE DOSES: With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 5 teaspoons per 1,000 gallons) as an initial treatment. Repeat at 15 to 20 minutes intervals until a residual of 3-5 ppm of available chlorine is established as determined by test kit. A test kit must be used regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3-5 ppm.

SUPERCLORINATION: Use one teaspoon of this product per 100 gallons of water (or 1/4 cup per 1,000 gallons). Superchlorination may be needed on a nightly basis in a heavily used spa or as infrequently as once a week in a moderately used spa.

REENTRY: Reentry into treated spas and hot tubs is prohibited above levels of 3 ppm of chlorine due to risk of bodily harm.

EMERGENCY HANDLING: In case of contamination or decomposition do not reenter container. If possible, isolate container in open well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store in a dry, cool and well-ventilated area. Avoid moisture getting into container. Keep off wet floors. In case of spillage, wash with large amounts of water. After each use, keep container tightly closed. Decanting material. Keep away from flames, sparks and all sources of heat. Avoid contact with organic material.

CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Keep empty containers (or equivalent) properly after emptying.

HOW TO CALCULATE POOL CAPACITY

SHAPE OF POOL

Reentrant

Gal of Water (Dimensions in feet)

Circumfer.: Diameter x diameter - average depth x 7.5

Depth with straight sides: full width x full length x average depth x 0.7

Consult pool builder.

Made in USA

EPA REG. NO. 69740-20-58680

DI-CHLOR CHLORINATING GRANULES 10 lb.
