DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

FOR SWIMMING POOL ALGAE When used as directed, this product kills algae and will not harm your pool of unlyophilized algae spots. This product is ideal for use in vinyl, fiberglass or colored plastic surface pools.

Ensure all pool equipment is working properly. Backflush the filter system following manufacturer’s directions. Adjust pH between 7.2-7.8. Add chlortetracycline to prevent staining of pool surface due to metals. When using other products as outlined in the directions for this product, follow directions on those products. Before using this product, brush all surface-degrading algae paying special attention to pool steps, table tops and around skimmer and lights. At night, or when pool is not in use, broadcast this product directly into the deep end of the pool with pump running. Use less than 10,000 gallons for heavy algae growth and one pound for light algae growth. To prevent possible damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool. Reshuffle any remaining algae and clean backwash filter. If algae is still inside, repeat treatment.

FOR SWIMMING POOL DISINFECTANT: When used as directed, this product is effective as a swimming pool water disinfecting agent. The dosage necessary for your pool will change considerably depending upon those factors that burden the disinfection system. Some of the factors that vary the required dosages are water temperature, bather load, exposure to unblended detergents, thunder or rain storms and length of filtration cycle.

DIRECTIONS FOR USE: Ensure all pool equipment is working properly. Backflush the filter system following manufacturer’s directions. Adjust pH between 7.2-7.8. Add a stabilizer to established pools within 30-45 minutes to neutralize the degradative affects of sunlight upon the chlorine residual. Check for metals. Before using this product, add stabilizer and scale inhibitor to prevent staining of pool surface due to metals. When using other products as outlined in the directions for this product, follow directions on those products. With pump running, broadcast a solution of this product per 10,000 gallons directly into the water in the deep end of the pool as an initial treatment. Repeat additions until a residual of 1-3 ppm is established as determined by the use of a test kit. To prevent damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool. NEVER ALLOW UNDISBLED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. Regular use of a test kit is recommended to determine when it is necessary and to calculate the proper dose of this product to maintain a residual of 1-3 ppm available chlorine in the pool water. An average daily dose requirement is 2.5 oz or 0.125% of this product per 10,000 gallons of water. After use of this product it is recommended that a preventive algae treatment be added on a weekly basis.

DIRECTIONS FOR SEASONAL Use:
Broadcast one pound of this product per 10,000 gallons directly into the water in the deep end of the pool. To prevent damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of your pool. NEVER ALLOW UNDISBLED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. In water temperatures less than 70°F, and as an alternate application procedure, pre-disolve this product prior to applying evenly to the deep end of the pool. Use this product outdoors, in a clean plastic bucket filled with a clean plastic or wooden spoon. Add this product to water, and NEVER add water to product. NEVER add more than 1/2 tsp of this product to 3 gallons of cool water. Do not mix with other products when pre-dissolving.

KEEP OUT OF REACH OF CHILDREN DANGER

ACTIVE INGREDIENT:
Sodium Dichloro-o-Triazinetrine
Hydrated

INERT INGREDIENTS

TOTAL

Available Chlorine

50.5%

WEIGHT 1 LB. (45 KG)

FIRST AID IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes.

If INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call poison control center or doctor for further treatment advice.

If SWALLOWED: Call poison control center or doctor immediately for further treatment advice. HAVE PERSON SIT UP IF PERSON IS ABLE TO DO SO. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. YOU MAY ALSO CALL 1-800-943-2929 FOR EMERGENCY MEDICAL TREATMENT INFORMATION.

NOTE TO PHYSICIAN: Probably mucosal damage may contraindicate the use of gastric lavage.

DI-CHLOR CHLORINATING SHOCK

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Store in a cool, dry and well-ventilated area. Avoid moisture getting into container. Keep out of reach of children. Avoid contact with organic material.

CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Three-drain container (if equivalent) promptly after emptying.

HOW TO CALCULATE POOL CAPACITY

Diameter of pool = Diameter x Diameter x average depth x 5.0
Volume of pool = Diameter x Diameter x average depth x 0.7
Irregular pool:
Volume of pool = Diameter x Diameter x average depth x 0.7
