Doheny's
Pool Supplies FAST!

1" BROMINATING TABLETS

KEEP OUT OF REACH OF CHILDREN
DANGER
CORROSIVE AND STRONG OXIDIZER
SEE BACK PANELS FOR ADDITIONAL PRECAUTIONARY STATEMENTS AND FIRST AID

ACTIVE INGREDIENT:
Bromochloro-5,
5-dimethylhydantoin ............... 98%
OTHER INGREDIENTS ............... 2%
TOTAL ................................ 100%
Provides 94.9% Available Bromine and 29% Available Chlorine

FREE DELIVERY NEXT DAY!

FIRST AID
IF IN EYES
Hold eye open and rinse slowly and gently with water for 15-30 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED
Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
YOU MAY ALSO CONTACT 1-800-325-8258
FOR EMERGENCY MEDICAL TREATMENT INFORMATION.

NOTE TO PHYSICIAN:
Probable mucous membrane or conjunctival irritation is the use of gastric lavage.

PRECAUTIORY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER
CORROSIVE: Causes irreversible eye damage and skin burns. Eye contact may cause loss of vision. Breathing its vapor or dust irritates the nose and throat. May be fatal if inhaled. Harmful if absorbed through skin or swallowed. Do not breathe dust, spray mist, or contaminated air. Prolonged or repeated skin contact may cause allergic reactions in some individuals. Wear appropriate protective clothing, gloves, and shoes. Avoid contact with eyes, mouth, and skin. Use respiratory, eye, or skin protection approved by Mine Safety and Health Administration and the National Institute for Occupational Safety and Health. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or smoking tobacco, or carrying this tablet. Remove contaminated clothing and wash before re-use. Users must wear chemical-resistant gloves while placing the tablet in the swimming pool. Use with adequat ventilation. Do not smoke, drink, or eat when handling this product. Keep container tightly closed when not in use. Do not ship with foods, drugs, or clothing.

CHEMICAL AND PHYSICAL HAZARDS: Strong oxidizer, reacts with water or metals. Reaction with combustible organic materials, bases, metals, or with oxidizers may generate heat, hazardous gases and, possibly fire or explosion. Do not add to dispensers or other equipment that is not dry and clean of any chemical residue. Does not burn, but will decompose from about 320°F (160°C) with a strong exothermic reaction. Do not use near or in flammable materials or other gases that are susceptible to combustion.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms.

SPECIAL PRECAUTIONS, PLEASE READ BEFORE OPENING CONTAINER. MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION. RELATED COMPLICATIONS MAY LEAD TO DEATH.
PREVENTION OF PHYSICAL INJURY: This product emits a powerful bromine gas. Do not open container indoors. Hold away from face when opening to avoid breathing fumes. Mixing with other chemicals may cause a violent and instantaneous chemical reaction. Do not add this product to water in a pail. Do not add water to this product in a pail. Follow label instructions exactly. Do not take advice from others. Do not experiment.

PREVENTION OF PROPERTY DAMAGE: Contact between this product in its undiluted state and vinyl liners, painted surfaces or other property in or around the pool will result in permanent bleaching of the color.

WARRANTY: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with label directions under normal conditions of use, and to the extent consistent with applicable law either this warranty or any other warranty of MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, assumes the risk of any such sale.

DIRECTIVES FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Keep pH between 7.2 and 7.6 and never allow it to fall below 7.0. The treatment necessary for your pool or spa will change considerably depending upon those factors that burden the disinfection system. Some of the factors that will vary are the required treatment is water temperature, bather load, exposure to windblown debris, thunder or rain storms and length of filtration cycle. Users must wear chemical-resistant gloves while placing the tablet into the swimming pool/spa.

SWIMMING POOLS: In newly filled pools, shock the pool if necessary. Follow directions for use on the label to establish an effective active bromine residual of 2 to 3 ppm. Test water frequently using a reliable bromine test kit. Adjust the flow rate through the brominator if necessary, to maintain the active bromine residual of the following treatments are provided as general recommendations. Automatic and floating brominators use instructions peculiar to their design. Frequently a brominator must be filled to capacity every week - while the adjustments allow the user to ensure only the total amount of this product necessary for proper sanitation. As suggested below, the slow dissolving nature of the chemical combined with the design features of the brominator requires that a greater amount of chemical be exposed to the water.

RESIDENTIAL: Add 17 tablets per 10,000 gallons every 5-7 days or as needed to maintain a bromine residual of 2-3 ppm at all times. Apply a weekly treatment through the use of a floating tablet feeder such as the Multi-Chlor or an automatic brominator which will allow you to adjust the amount of bromine entering the water.

COMMERCIAL: Add 31 tablets per 10,000 gallons every 5-7 days or as needed to maintain an active bromine residual of 3-5 ppm at all times.

SPAS: Before initially using this product in your spa or hot tub you will need to add 0.25 oz. of sodium bromide for each 100 gallons of water. The same treatment must be followed each time you drain and refill your spa or hot tub with fresh water. Introduce 3 tablets per 300 gallons of spa water with the use of a floating tablet feeder or automatic brominator installed on the spa equipment. Adjust tablet feeder or brominator to obtain an active bromine residual of at least 2 ppm. Maintain spa by adding 3 tablets per 300 gallons every 5-7 days or as needed to maintain an active bromine residual of 2 ppm at all times. Spa water has a tendency to foam and cloud; this is directly proportional to the amount of spa use. Cloudiness is due to the accumulation of body fats, oils and contaminants too small for the filtration equipment to remove, and is linked to rapid escalation of total dissolved solids in the water. To a great extent, defoamers, clarifiers, as well as shock treatments, demineralizers, or sequestering agents can be used to clear the water. When water clarification cannot be achieved, drain, clean, and refill the spa.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Keep this product dry in tightly closed, original container when not in use. Store in dark, cool area (86°F/30°C), dry, well-ventilated area. Keep product away from energy sources, combustible organic materials, oxidizers, strong bases, and moisture.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

SPILLS: When handling or disposal of spills, use impact-resistant goggles with side shields, or face shield, body-covering clothes, including impervious chemical-resistant gloves and boots; use a dust respirator if dusting occurs. Sweep up dry spills and dispose of as prescribed for pesticide disposal. If drum contents are contaminated or decomposing, do not re-enter container, isolate unsealed drum in the open or in a well-ventilated area; flood with large volumes of water if necessary.

IN CASE OF FIRE: Do not use ammonium phosphate extinguisher near water and this product. Instantaneous reactions may occur.

POOL GALLON CALCULATOR (all dimensions in feet)

Square or rectangular: Length x Width x Average Depth x 7.5 = Gallons
Round or oval: Length x Width x Average Depth x 5.3 = Gallons

Each tablet weighs 0.70 ounces (19.8 grams).
