**Snail Block™**
SLUG & SNAIL KILLER

**PRECAUTIONARY STATEMENTS**
Hazard to Humans and Domestic Animals: CAUTION. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, and using the toilet.

**Environmental Hazards:** To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

**FIRST AID**
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Hotline Number
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information concerning this product, call 1-800-265-0761.

**GENERAL INFORMATION (WHY SLUG AND SNAIL BAIT IS EFFECTIVE)**
This product has a non-toxic mode of action and can be used in areas where pet and wildlife protection is a concern. When slugs and snails ingest the bait, they stop feeding and crawl back to their shelter where they eventually die. It remains effective under varying weather and environmental conditions.

The bait is ingested by slugs and snails when they travel from their hiding places to plants. Ingestion, even in small amounts, will cause them to cease feeding. This physiological effect of the bait gives immediate protection to the plants even though the slugs and snails may remain in the area. After eating the bait, the slugs and snails cease feeding, become less mobile and begin to die within three to six days. Dead slugs and snails may not be visible as they often crawl away to secluded places to die. Plant protection will be observed in the decrease in plant damage.

This product is effective against a wide variety of slugs and snails and will give protection to home lawns, gardens, greenhouses, outdoor ornaments, vegetable gardens, fruits, berries, citrus and plants. The bait can be scattered on the lawn or on the soil around any vegetable plants, flowers or fruit trees or bushes to be protected.

**DIRECTIONS FOR USE:**
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**FOR USE ON VEGETABLES, FRUITS INCLUDING CITRUS, BERRIES, HERBS, OUTDOOR ORNAMENTALS, GREENHOUSES AND LAWNS.**

**HOW TO APPLY:**
Scatter the slug and snail bait granules on the soil around or near the plants to be protected. Do not use kitchen utensils for food uses after pesticide use. Do not place in piles. Reapply as the bait is consumed or every two weeks. Apply more heavily if the infestation is severe, if the area is heavily watered or after long periods of heavy rain.

**WHERE TO APPLY:**
Treat all likely areas of infestation, especially around the base of plants, between rows and around the perimeter of garden plots where pests travel into plant areas from daytime refuges. Slugs/snails favor damp places around vegetable plants such as beans, tomatoes, lettuce, cabbage, celery and squash. Other favorite areas are flower gardens, rockeries, hedges, dichondra lawns, citrus groves, ivy patches, and other ground cover where they obtain shelter by day.

**AMOUNT TO APPLY:**
0.11 - 0.44 lbs/1000 sq. ft. or 0.5 teaspoons/sq. yd.
