Mocap 15% Granular Lock'N Load® Closed Loading System

RESTRICTED USE PESTICIDE
DUE TO ACUTE DERMAL, PRIMARY DERMAL AND PRIMARY EYE TOXICITY
For retail sale to and use only by Certified Applicators or persons under the direct supervision of a Certified Applicator, and only for those uses covered by the Certified Applicator's certification.

ACTIVE INGREDIENT:
Ethoprop: (O-Ethyl S, S-Dipropyl Phosphorodithioate) ................................................................. 15%

INERT INGREDIENTS: .......................................................................................................................... 85%

TOTAL: .................................................................................................................................................. 100%

EPA Reg. No. 5481-9040
EPA Est. No. 5481-AL-1

ACTIVE INGREDIENT:
Ethoprop is an organophosphate.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER
Fatal if absorbed through skin. Causes irreversible eye damage. May be fatal if swallowed. Harmful if inhaled. Avoid breathing dust. Do not get in eyes, on skin or on clothing. Prolonged or frequent repeated skin contact may cause allergic reactions in some individuals.

EMERGENCY INFORMATION
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
FOR THE FOLLOWING EMERGENCIES, PHONE 24 HOURS A DAY:
For Medical Emergencies phone: ......................................................................................................... 1-888-661-4061
For Transportation Emergencies, including spill, leak or fire, phone: CHEMTREC® ......................................................................................................................................... 1-800-424-9300
For Product Use Information phone: AMVAC® ................................................................................... 1-888-462-6822

FOR ADDITIONAL PRECAUTIONARY STATEMENTS AND DIRECTIONS FOR USE: See Inside Booklet.

PRECAUCION AL USUARIO: Si usted no lee ingles, no use este producto hasta que le etiqueta haya sido explicado ampliamente. TRANSLATION TO THE USER: If you cannot read English, do not use this product until the label has been fully explained to you.

KEEP OUT OF REACH OF CHILDREN
DANGER! POISON
PELIGRO

FIRST AID
Ethoprop is an organophosphate.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

IF SWALLOWED:
• Call a poison control center or doctor immediately for treatment advice.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Have person sip a glass of water if able to swallow.
• Do not give anything by mouth to an unconscious person.

IF INHALED:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

• chemical-resistant gloves,
• coveralls over long-sleeved shirt and long pants, immediately available and must use in an emergency:

Handlers engaged in those activities for which use of an engineering control is not possible, such as
See engineering controls for additional requirements.
In addition, loaders must wear chemical-resistant gloves.

Loaders, applicators, and other handlers using engineering controls must wear:

mils), nitrile rubber (>14 mils) or Viton® (>14 mils). If you want more options, follow the instructions
Some materials that are chemical-resistant to this product are barrier laminant, butyl rubber (>14

coordination, slurring of speech, twitching of muscles (especially of tongue and eyelids), mental
headache, dizziness, weakness, blurring or dimness of vision, excessive tearing, loss of muscular

NOTE TO PHYSICIAN: This product is a cholinesterase inhibitor. Severe symptoms and signs
include diarrhea, pinpoint and non-reactive pupils, respiratory difficulty, pulmonary edema,
cyanosis, loss of sphincter control, convulsions, and coma. Support respiration as needed.
Measures should include removal of secretions, maintenance of a patient airway, and if
necessary, artificial ventilation.
If cyanosis is absent, give ATROPINE 2-4 mg intravenously (0.05 mg/kg for children). Repeat
atropine at 5-10 minute intervals until atropinization occurs (dry, flushed skin, tachycardia,
pupillary dilatation), and maintain for 48 hours. If cyanotic, give initial atropine intramuscularly
and start measures to improve ventilation.
Start 2-PAM (PROTOPAM, Ayerst) at the same time. Give 1-2 grams PROTOPAM (20-40 mg/kg for
children) in 100cc saline over 15-30 minutes. If pulmonary edema is present, give intravenously
slowly as a 5% solution in water over a period of at least 5 minutes. A second dose may be given
after one hour if muscle weakness persists. Additional doses may be given cautiously for
persistent muscle weakness. May be given by intramuscular or subcutaneous routes if
intravenous administration is not feasible.
In case of skin contact, wash patient with soap and water followed by wash with 95% ethyl
alcohol. Keep patient under constant observation for 24-36 hours. Symptoms may persist for
one month.
The use of theophylline, morphine, barbiturates, phenothiazines, reserpine, and succinyl choline
is contraindicated.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

Fatal if absorbed through skin. Causes irreversible eye damage. May be fatal if swallowed. Harmful
if inhaled. Avoid breathing dust. Do not get in eyes, on skin or on clothing. Prolonged or frequent
repeated skin contact may cause allergic reactions in some individuals.

SYMPTOMS OF POISONING: Nausea, vomiting, abdominal cramps, diarrhea, excessive salivation,
headache, dizziness, weakness, blurring or dimness of vision, excessive tearing, loss of muscular
coordination, slurring of speech, twitching of muscles (especially of tongue and eyelids), mental
confusion, disorientation, drowsiness, difficulty in breathing (chest tightness), runny nose.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are barrier laminant, butyl rubber (>14
mils), nitrile rubber (>14 mils) or Viton® (>14 mils). If you want more options, follow the instructions
for category F on an EPA chemical-resistant category selection chart.

Loaders, applicators, and other handlers using engineering controls must wear:
• long-sleeved shirt and long pants, and
• shoes plus socks.

In addition, loaders must wear chemical-resistant gloves.

See engineering controls for additional requirements.

Handlers engaged in those activities for which use of an engineering control is not possible, such as
cleaning up a spill or cleaning or repairing contaminated equipment, must be provided with and have
immediately available and must use in an emergency:
• coveralls over long-sleeved shirt and long pants,
• chemical-resistant gloves,

• chemical-resistant footware plus socks,
• chemical-resistant headgear for overhead exposure, and
• a non-powered air-purifying respirator equipped with an N, R, or P-series filter.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for wash-
ables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.
Discard clothing or other absorbent materials that have been drenched or heavily contaminated with
this product’s concentrate. Do not reuse them.

ENGINEERING CONTROLS

This product is formulated into a Lock’N Load system that meets the definition of a closed loading
system in the Worker Protection Standard for Agricultural Pesticides [40 CFR 170.240(d)(4)]. In
addition, loaders must:
• wear PPE specified in the PPE section of this labeling,
• be provided with, must have immediately available and must use in an emergency, such as a broken
package, spill, or equipment breakdown, the PPE specified in the PPE section of this labeling for handlers
engaged in those activities for which use of an engineering control is not possible.

Applicators using motorized ground equipment must use an enclosed cab that meets the require-
ments listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)
(5)] for dermal protection. In addition, applicators must:
• wear the personal protective equipment required above for applicators,
• either wear the type of respirator specified in the PPE section of this labeling or use an enclosed
cab that is declared in writing by the manufacturer or by a government agency to provide at least
as much respiratory protection as the type of respirator specified in the PPE section of this labeling,
• be provided and have immediately available for use in case of an emergency when they must exit the
cab, the PPE specified in the PPE section of this labeling for handlers engaged in those activities for
which use of an engineering control is not possible.
• take off any PPE that was worn in the treated area before reentering the cab, and
• store all such PPE in a chemical-resistant container, such as a plastic bag, to prevent contamination
of the inside of the cab.

User Safety Recommendations

Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly
and put on clean clothing.
Users should remove PPE immediately after handling this product. Wash the outside of gloves
before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to aquatic organisms (fish and invertebrates), and wildlife and extremely toxic to
birds. Birds feeding in treated areas may be killed. For terrestrial uses, do not apply directly to water, or
to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff
from treated areas may be hazardous to aquatic organisms in neighboring areas. Cover, incorporate or
clean up granules that are spilled during loading or are visible on the soil surface in turn areas. Do not
contaminate water when disposing of equipment wash water.

This product is toxic to bees exposed to direct treatment. Do not apply this product while bees are actively
visiting the treatment area.

NOTE TO PHYSICIAN: This product is a cholinesterase inhibitor. Severe symptoms and signs
include diarrhea, pinpoint and non-reactive pupils, respiratory difficulty, pulmonary edema,
cyanosis, loss of sphincter control, convulsions, and coma. Support respiration as needed.
Measures should include removal of secretions, maintenance of a patient airway, and if
necessary, artificial ventilation.
If cyanosis is absent, give ATROPINE 2-4 mg intravenously (0.05 mg/kg for children). Repeat
atropine at 5-10 minute intervals until atropinization occurs (dry, flushed skin, tachycardia,
pupillary dilatation), and maintain for 48 hours. If cyanotic, give initial atropine intramuscularly
and start measures to improve ventilation.
Start 2-PAM (PROTOPAM, Ayerst) at the same time. Give 1-2 grams PROTOPAM (20-40 mg/kg for
children) in 100cc saline over 15-30 minutes. If pulmonary edema is present, give intravenously
slowly as a 5% solution in water over a period of at least 5 minutes. A second dose may be given
after one hour if muscle weakness persists. Additional doses may be given cautiously for
persistent muscle weakness. May be given by intramuscular or subcutaneous routes if
intravenous administration is not feasible.
In case of skin contact, wash patient with soap and water followed by wash with 95% ethyl
alcohol. Keep patient under constant observation for 24-36 hours. Symptoms may persist for
one month.
The use of theophylline, morphine, barbiturates, phenothiazines, reserpine, and succinyl choline
is contraindicated.

PRECAUTIONARY STATEMENTS
DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Read entire label before using this product.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Do not allow this product to drift.

When treating agricultural crops, granules lying on the soil surface in turn areas at row ends must be incorporated to remove possible hazard to birds and other wildlife.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Only protected handlers may be in the area during application.

Do not enter or allow workers to enter treated areas during the restricted entry interval (REI) of 48 hours. The 48 hour REI is increased to 72 hours in outdoor areas where average rainfall is less than 25 inches a year.

EXCEPTION: If the product is soil injected or soil incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

PPE required for early re-entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
• coveralls over long-sleeved shirt and long pants,
• chemical-resistant gloves made of any waterproof material,
• chemical-resistant footwear plus socks, and
• protective eyewear.

Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.

REstrictions
• Not for household consumer use. Do not store or use in or around home or residence.
• Do not apply in Long Island, New York.

Rotational Crop Restrictions
• Do not plant leafy vegetables within 30 days of last application.
• Do not plant small grains within 8 months of last application.
• Except for potatoes and sweet potatoes, do not rotate to any root or tuber crops within 12 months of last application.

Application Restrictions
• For application only by tractor-drawn spreader, or by backpack granular spreader for only bananas and plantains.
• Aerial application is not permitted.
• Do not apply by direct hand-held equipment, including measuring containers or spoons.
• Sugarcane workers doing hand planting or other direct field contact activities cannot be present within 100 feet of equipment making applications of ethoprop.

CORN
(Field and Sweet only)

POUNDS OF MOCAP 15% GRANULAR LOCK’N LOAD

APPLICATION TIMING | PESTS CONTROLLED | Lbs. Per Acre | Row Spacing in Inches | APPLICATION DIRECTIONS
--- | --- | --- | --- | ---
At-planting | Corn Rootworms | 6.6 | 40 | **BAND:** Use 8 ounces of MOCAP 15% Granular Lock’N Load per 1,000 feet of row. Apply the granules in a 6 to 7 inch band on the row over a closed seed furrow at-planting. Mix the granules with the top 1/2 inch of soil with mechanical equipment during or immediately following application.
| Wireworms | 7 | 38 | 
| Garden Symphylan (Scutigerella immaculata) | 7.3 | 36 | 
| White Grubs (Suppression) | 8.8 | 30 | 
| | 13.3 | 20 | 

3 days before planting to at-planting | Cutworms | 20 | 

3 days before planting to at-planting | Nematodes | 10 – 13.3 | 40 | **BAND:** Add 3/4 to 1 pound of MOCAP 15% Granular Lock’N Load per 1,000 feet of row in a band 12 to 15 inches wide on the row. Mix with the top 2 to 4 inches of soil with mechanical equipment right after application.
| 10.3 – 14 | 38 | 
| 10.8 – 14.8 | 36 | 
| 13 – 17.7 | 30 | 
| 20 – 26.6 | 20 | 

| | 40 | 

**BROADCAST:** Apply 20 pounds of MOCAP 15% Granular Lock’N Load per acre. Apply 3 days before planting to at-planting time. Mix with the top 2 inches of soil with mechanical equipment right after application.

**BROADCAST:** Apply 3 days before planting to at-planting time. Mix with the top 2 to 4 inches of soil with mechanical equipment right after application. The treatments for nematode control will also control rootworms, wireworms, cutworms, garden symphylan (Scutigerella immaculata) and suppress white grubs.

RESTRICTIONS FOR FIELD AND SWEET CORN ONLY
- Make only 1 application of this product per growing season.

FOR COMMONLY USED APPLICATORS, SEE CALIBRATIONS CHART BELOW
Suggested gauge settings for 8 ounces per 1,000 feet of row. (Do not change with row width). Be sure to calibrate your applicator under your operating conditions.

<td>Symphylans</td>
<td>1.4</td>
<td>27 – 40</td>
<td>BAND: Uniformly distribute granules in a 12 inch band over the row (36-inch row spacing), either behind the planter shoe next to the closing disk or immediately in front of the planter shoe. Mix with the top 2 to 4 inches of soil with mechanical equipment during or immediately following application.</td>
</tr>
<tr>
<td></td>
<td>Wireworms</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Nematodes (excluding Northern root knot, Columbia root knot, and stubby root nematodes in the Pacific Northwest; suppression of stubby root nematode in areas outside the Pacific Northwest)</td>
<td>1.4</td>
<td>40 – 80</td>
<td>IMPORTANT: Certain early-season environmental conditions and agronomic practices may impose stresses on the potato seed piece resulting in delayed emergence. Under these conditions, the application of MOCAP 15% Granular Lock’N Load as a concentrated band directly in the furrow may increase the potential for delayed emergence. To minimize the contribution of MOCAP 15% Granular Lock’N Load to this effect, apply so as to distribute the product in the soil surrounding the seed piece and avoid application directly into the seed furrow. For moderate* to heavy* infestations of wireworms or nematodes use the broadcast application instead of band or sidedress. Wireworm infestations will be especially heavy* in potatoes planted following wireworm host crops such as (but not limited to) sod, grass for seed, pasture, cereal, corn, hay, alfalfa, beans, onions, potatoes, new ground, fallow ground (weedy or cultivated), or ground not farmed for a year or more. BROADCAST: Apply uniformly and immediately incorporate 2 to 4 inches deep using mechanical equipment. Apply within 2 weeks before planting until prior to crop emergence.</td>
</tr>
<tr>
<td>Northern root knot nematode in the Pacific Northwest</td>
<td></td>
<td>40 – 80 (60 – 80 in the Columbia River Basin)</td>
<td></td>
<td>BROADCAST ONLY: Apply uniformly and immediately incorporate 2 to 4 inches (4 to 8 inches in the Columbia River Basin) deep using mechanical equipment. Apply within 2 weeks before planting until prior to crop emergence. Under severe* infestation or long growing season conditions, MOCAP 15% Granular Lock’N Load may not adequately protect tuber quality.</td>
</tr>
<tr>
<td>Suppression of Columbia root knot and stubby root nematodes in the Pacific Northwest</td>
<td></td>
<td>80</td>
<td></td>
<td>BROADCAST ONLY: Apply uniformly and immediately incorporate 4 to 8 inches deep using mechanical equipment. Best results are obtained with deep (6-8 inches), even incorporation. Apply within 2 weeks before planting. Generally, MOCAP 15% Granular Lock’N Load should be applied following fall or spring application of a registered fumigant nematicide. In the Columbia River Basin it is strongly recommended that MOCAP 15% Granular Lock’N Load be applied following fall or spring application of a registered fumigant nematicide. Under severe* infestation or long growing season conditions, MOCAP 15% Granular Lock’N Load may not adequately protect tuber quality.</td>
</tr>
</tbody>
</table>

RESTRICTIONS FOR POTATOES (West of the Mississippi River)

- Use the broadcast application instead of band for control of moderate* to heavy* infestations of wireworms or nematodes.
- Make only 1 application of this product per growing season.
- Do not make aerial applications.
- Do not exceed 12 pounds of active ingredient per acre per crop for use on nematodes. Do not exceed 6 pounds of active ingredient per acre for use on pests other than nematodes.
- Do not exceed 6 lbs. a.i./A for use on wireworms.
- Do not apply MOCAP 15% Granular once plants have begun to emerge.
- The Pacific Northwest potato growing region is considered to include the states of Washington, Oregon, and Idaho. The Columbia River Basin is considered to include Umatilla and Morrow Counties of Oregon and Grant, Adams, Franklin, Benton, Yakima, and Walla Walla Counties of Washington.
- To determine your infestation level, consult local or state recommendations for sampling methods and economic thresholds.

</tr>
</tbody>
</table>

**RESTRICTIONS FOR TOBACCO**

- Make only 1 application of this product per growing season.

**PRECAUTIONS FOR TOBACCO**

- AMVAC does not recommend the use of MOCAP on tobacco in Florida.
STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE
Do not store in or around home or residence.

PESTICIDE DISPOSAL
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide granules, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL
DO NOT DISCARD THE CONTAINER. Do not attempt to open or tamper with the container. Completely empty container into application equipment. Return empty container to point of purchase or call 1-888-GO-AMVAC for instructions. Refillable container. Refill this container with pesticide only. Do not reuse this container for any other purpose.

LIMITED WARRANTY AND DISCLAIMER

The manufacturer warrants (a) that this product conforms to the chemical description on the label; (b) that this product is reasonably fit for the purposes set forth in the directions for use, subject to the inherent risks referred to herein, when it is used in accordance with such directions; and (c) that the directions, warnings, and other statements on this label are based upon responsible experts’ evaluations of reasonable tests of effectiveness, of toxicity to laboratory animals and to plants and residues on food crops, and upon reports of field experience. Tests have not been made on all varieties of food crops and plants, or in all states or under all conditions.

THERE ARE NO EXPRESS WARRANTIES OTHER THAN THOSE SET FORTH HEREIN. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW THE MANUFACTURER NEITHER MAKES NOR INTENDS, NOR DOES IT AUTHORIZE ANY AGENT OR REPRESENTATIVE, TO MAKE ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, AND IT EXPRESSLY EXCLUDES AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY OF FITNESS FOR A PARTICULAR PURPOSE, OR ANY WARRANTY OF QUALITY OR PERFORMANCE. THIS WARRANTY DOES NOT EXTEND TO, AND THE BUYER SHALL BE SOLELY RESPONSIBLE FOR, ANY AND ALL LOSS OR DAMAGE WHICH RESULTS FROM THE USE OF THIS PRODUCT IN ANY MANNER WHICH IS INCONSISTENT WITH THE LABEL DIRECTIONS, WARNINGS OR CAUTIONS.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW BUYER’S EXCLUSIVE REMEDY AND MANUFACTURER’S OR SELLER’S EXCLUSIVE LIABILITY FOR ANY AND ALL CLAIMS, LOSSES, DAMAGES, OR INJURIES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, WHETHER OR NOT BASED IN CONTRACT, NEGLIGENCE, STRICT LIABILITY IN TORT OR OTHERWISE, SHALL BE LIMITED, AT THE MANUFACTURER’S OPTION, TO REPLACEMENT OF, OR THE REPAYMENT OF THE PURCHASE PRICE FOR, THE QUANTITY OF PRODUCT WITH RESPECT TO WHICH DAMAGES ARE CLAIMED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW MANUFACTURER OR SELLER SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

AMVAC offers this product, and Buyer accepts it, subject to the foregoing Limited Warranty which may be varied only by agreement in writing signed by an authorized representative of AMVAC.

PELIGRO

FIRST AID
Ethoprop is an organophosphate.

If on skin or clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

If swallowed:
• Call a poison control center or doctor immediately for treatment advice.
• Do not give anything by mouth to an unconscious person.
• Have person sip a glass of water if able to swallow.
• Do not give anything by mouth to an unconscious person.

If inhaled:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.
