For Industrial and Commercial Use
AntiBlu® XP-Quattro may be applied to wood and wood products by immersion or spray methods according to the dilutions provided below. Dilution levels may vary widely and will depend on application methods, wood species, seasonal changes in exposure conditions, length of protection desired, and wood storage and transport conditions.

For spray applications: Mix one gallon of AntiBlu® XP-Quattro to 5-25 gallons of water.

For immersion applications: Mix one gallon of AntiBlu® XP-Quattro to 25-150 gallons of water.

For best results, apply AntiBlu® XP-Quattro to recently felled and fresh sawn or peeled wood ensuring total coverage. Allow treated wood to drain in a contained area before storage, and ensure that freshly treated wood is not allowed to remain unprotected in heavy rains.
