that flood intermittently. In such areas, one application of FourStar® CRG wetting and drying will not reduce granule effectiveness. The length of control depends on the duration and frequency of flooding events. Alternate mosquito emergence for up to four subsequent floodings or up to 60 days. The actual protection varies based on environmental conditions. More frequent applications may be made if monitoring indicates that larval populations have reestablished or weather conditions have rendered initial treatments ineffective.

Mosquito species effectively controlled by FourStar® CRG.
- *Aedes vexans*
- *Anopheles quadrimaculatus*
- *Culex pipiens*
- *Ochlerotatus vicinus* (Mosquito Larvicide)
- *Ochlerotatus sollicitans* (Mosquito Larvicide)
- *Ochlerotatus stimulans* (Mosquito Larvicide)
- *Ochlerotatus triseriatus* (Mosquito Larvicide)
- *Psorophora columbiae*
- *Psorophora ferox*

APPLICATION SITES
Apply FourStar® CRG pre-hatch or post-hatch as directed above to temporary and permanent water sites which support mosquito larval development.

FourStar® CRG can be applied to areas that contain aquatic life, fish and plants as well as areas in contact with humans, animals, horses, livestock, pets, birds or wildlife. Examples of application sites include: freshwater marshes, cattail marshes, woodland pools and meadows, grassy swales, floodplains, fixed water, standing water, roadside ditches, canals, catch basins, storm drain, storm water collection areas and impoundments, lakes and ponds, abandoned swimming pools, ornamental fountains and ponds, water gardens, water holding receptacles, and other natural and man-made sites where mosquitoes may develop.

Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment and weather related factors determine the potential spray drift. The applicator and treatment coordinator are responsible for considering all these factors when making decisions.

APPLICATION RATES
To control mosquito larvae, apply 7.5 to 10 lbs of FourStar® CRG per acre. Use at 20 lbs of FourStar® CRG per acre where late instar larval predominate; larval populations are high, water is heavily polluted and/or algae are abundant, or under conditions where local experience indicates the need for higher rates to achieve extended control.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry place.

Pesticide Disposal: To avoid wastes, use all material in this container by application according to labeling directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state, local governments or by industry). Do not reuse or refill this container. Completely empty bag into application equipment by shaking and tapping sides and bottom to loosen clinging particles. Then offer for recycling if available, or dispose of empty bag in a sanitary landfill or by incineration. Do not burn unless allowed by state and local ordinances.

NOTICE TO USER
To the extent consistent with applicable law, user makes no warranty express or implied, of merchantability, fitness or otherwise concerning the use of this product other than as indicated on the label. To the extent consistent with applicable law, user assumes all risks of use, storage or handling not in strict accordance with label instructions.

Net Contents: 35 lbs (15.9 kg)
Lot No.: 

**FIRST AID**

- **If inhaled**
  - More person to fresh air.
  - If person is unconscious, call 911 or an emergency doctor, or going for treatment. You may also contact 1-800-248-7763 for emergency medical treatment information.

- **In eyes**
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
  - Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing eyes.

- **If on skin**
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15-20 minutes.

- **Inhalation**
  - Call poison control center or doctor for treatment advice.

- **If ingested**
  - Do not give anything by mouth.

- **In eyes**
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
  - Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing eyes.

- **If on skin**
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15-20 minutes.

- **Inhalation**
  - Call poison control center or doctor for treatment advice.
