**Disinfecting/Deodorizing/Cleaning Wipes**

**Z3™ Disinfecting/Deodorizing/Cleaning Wipes** are effective against the following pathogens in 2 minutes at 20°C/68°F:

- HIV-1 (AIDS Virus) **(At an exposure time of 1 min.)**
- **See back panel for complete HIV-1 (AIDS virus) information.**

Additional pathogens in 5 minutes at 20°C/68°F include:

- Tuberculocidal
- Fungicidal
- Virucidal*
- *Human Hepatitis C virus
- **HIV-1 (AIDS virus)**

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION**

**Stainless steel**, **Tablet, chair rail**, **chair rail**

**Preparation of dispenser**: Remove cover from canister and discard covering seal. From center of wipes roll, pull up a wipe corner, twist into a point and thread through the tear throat in the underside of the lid cover. Pull wipe through about one (1) inch. Replace the lid cover on container, assuring a secure fit. Pull first wipe and snap at a 90° angle. Remaining wipes feed automatically for next use. Always remove linted hinged cap after each use to insure moisture retention.

**Areas of Use**:

- Hospital
- **Blood and other body fluids must be thoroughly cleaned from surfaces and objects before disinfection.**
- **Personal Protection**: Specific barrier measures should be used when handling items tainted with blood or body fluids that are likely to be exposed to blood or body fluids. Use latex gloves, gowns, masks, and eye protection. **Cleaning Procedure**: Before cleaning soiled areas, remove all debris. Disinfectant will not penetrate dry organic matter. Use a water-based detergent to remove the organic material. Apply disinfectant to inanimate surfaces:

  - Use with all dry wipes, fiber pads and/or fiber cloths. **Failing of Disinfecting Wipes**: Do not use on food contact surfaces. When used in sufficient concentration, they will kill HIV-1 on pre-cleaned hard, non-porous surfaces when used as directed. More than one wipe may be necessary for adequate results.

  - Use with all dry wipes, fiber pads and/or fiber cloths. **Failing of Disinfecting Wipes**: Do not use on food contact surfaces. When used in sufficient concentration, they will kill HIV-1 on pre-cleaned hard, non-porous surfaces when used as directed. More than one wipe may be necessary for adequate results. **Personal Protection**: Specific barrier measures should be used when handling items tainted with blood or body fluids that are likely to be exposed to blood or body fluids. **Storage and Disposal**

Store in cool area. Keep away from heat or open flame. Do not reuse wipes. Dispose of used wipe in trash. Non-refillable container. Do not reuse or refill this container. Offer for recycling if available.

**PRECAUTIONARY STATEMENTS**

**Hazards to Humans and Domestic Animals**

**WARNING**: Causes substantial, but temporary eye injury. Do not get in eyes or on clothing. Wear protective eye protection such as goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Wear disposable latex gloves, goggles, masks and eye coverings when handling HIV-1 infected blood or body fluids. Avoid contamination of food. Remove and wash contaminated clothing before reuse.

**FIRST AID**:

If in eyes: Hold eye open and rinse slowly and gently with water for at least 15 – 20 minutes. Remove contact lenses. Call a poison control center or doctor for treatment advice. If on skin or clothing: Take off contaminated clothing. Rinse skin or clothing immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice. Wash contaminated clothing before reuse.

**DIRECTIONS FOR USE**

It is the responsibility of the Federal, state, local and institutional regulations for enforcement of required disinfection.
